This is the first job of this IT pilot fish out of college, and the company in which he works has just hired a new vice president of sales and marketing from a major computer supplier . To motivate us and make a big splash, he T-shirts made that said: 5280'1 at the front, and Go Extra Mile! On the back, says the fish. We all got one at an all-hands meeting. There, in front of 130 of my peers and managers, I pointed out, '5,280 is the number of feet per mile, so actually, this shirt says: Go extra leg! Dead silence from my peers, after a collective sigh at my courage to point out the obvious . The new vice president laughed: I'm from marketing! We can't do math! Fortunately, everyone else laughed with him. Do the math with Sharky. Send me your true history of IT life in sharky@computerworld.com. One story equals one posh shark shirt if I use it. Comment on today's tale in Google's Sharky community, and read thousands of great old tales in Sharkives. Get your daily dose of out-takes from the IT theater Absurd delivered directly to your inbox. Sign up now for the shark's daily newsletter. Copyright © 2017 IDG Communications, Inc. There are several sheets in each category and you can print them out for different levels in either color or black and white. The key Available for all Easter sheets. Mint Images/Getty Images Children aged up to schoolchildren will enjoy learning money money Coins. Teach them to count money, starting with a penny and then nickel. Help them learn the value of each coin and then provide these sheets with images of pennies, nickel, and mixed quantities to help them understand the concept. Each practice page can be printed as a PDF. Print PDF: Counting pennies - Leaf 1 and complete the activity. Starting with a penny, explain to your student that the cost of a penny is one cent. Do your student count the number of pennies in each line and write the total amount they count in space provided. Let them know that some of the coins are right side up, while others are upside down, but the value remains the same. Print PDF: Counting pennies - Leaf 2 and complete the activity. For this activity, the student will become comfortable counting and recording large quantities of nickel coins. Remind the student that some coins in each row will be flipped and other coins will face up. Print PDF: Counting pennies - Leaf 3 and complete the activity. When the student is confident in a smaller number of pennies, try to enter this sheet with more pennies in each row. Once they are successful with the practice of pennies, you can enter the nickel and then the pennies and quarters. Print PDF: Counting Nickels - Leaf 1 and complete the activity. For the first nickel activity, explain to your student the value of nickel versus a penny. Also, let them look at the nickel coin to observe the difference in size, color and images from those on the penny. Teach them to count on fives so they can successfully complete the sheet. Print PDF: Counting Nickel - Leaf 2 and complete the activity. For this activity, the student will become comfortable counting and recording large quantities of nickel coins. Remind the student that some coins in each row will be flipped and other coins will face up. Print PDF: Counting Nickel - Sheet 3 and complete the activity. When you feel the student is ready, try to enter this sheet with a large nickel in each row. Once they are successful with the practice of nickel, you can introduce a mixed coin practice, with nickels and pennies. Print PDF: Mixed Practice - Leaf 1 and complete the activity. When introducing mixed coin practices, remind the student that each type of coin has a different meaning. Point out the differences in each coin and remind them of the value of each one. Start with this sheet, which has fewer coins, and allow the student to increase the number of coins in each row as they become more confident in counting mixed coins. Print PDF: Mixed Practice - Leaf 2 and complete the activity. Once the student has successfully completed the first sheet of mixed coins, provide another course of practice to make sure they have understood the skill. Remind them to look at the coins in each row so they assign the correct value to each coin. Print PDF: Mixed Practice - Leaf 3 and complete the activity. As the student becomes more confident, provide this sheet that has more coins in each row. Remind the student that some coins in each row will be flipped and other coins will face up. Print PDF: Mixed Practice - Leaf 4 and complete the activity. When you feel the student is ready, try to enter this sheet with a large penny and nickel in each row. Once they are successful with this practice, you can introduce dimes and quarters to mixed coin practice. Average sheet 1. D. Russell Print 1 with PDF answers. Please note that the answers are on page 2 of the PDF. Average, median and mode are measures of the Central Trend. The median is the middle value on your list. When the numbers list is odd (e.g., there are 9, 13, 27, 101...numbers, the median will be the average entry or number on the list after you sort the list into an upstream order. However, when the list totals are oatmeal, a slightly different calculation is required. Be sure to remember the strange and even rule. The quick rule is that the median is average, the number in the middle in an increasing set of numbers. Examples: Calculate the median: 9, 3, 44, 17, 15 (There is an odd number number: 5)Line numbers: 3, 9, 15, 17, 44 (smallest to largest) Median for this group of numbers: 15 (number in the middle) To calculate the median: 8, 3, 44, 17, 12, 6 (there are even number: 6) Number line: 3, 6, 8, 12, 17, 44Add 2 averages, and then split them by 2 : 8 12 and 20 ÷ 2 and 10The median for this group of numbers is 10. Average sheet 2. D.Russell Print Median Sheet 2 with answers in PDF Exercise Questions:34, 43, 45, 1, 30, 4Median No 32 7, 32, 1, 28, 43, 37Median No. 30 35, 33, 15, 32, 2, 28, 42Median 3, 42, 17, 17, 48, 7Median No 17 45, 29, 17, 12, 13, 28Median No 22 5 14, 41, 6, 31, 6, 16Median 15 35 4 , 16, 36 , 46, 42, 17Median 35 35
