Precision: 1, 2, 3 or 5 Prism Precision: 2.0mm and 2 ppm Prism/3.0mm and 2 ppm DR Range: 5000m to Prism/DR 800m New Trimble® C5 Mechanical General Station completes the industry's top portfolio with improved performance, saving time features that make the field work easier and faster Trimble C5 is tough and tough with a comfortable design. This limits user fatigue, even if it acts up to the most difficult conditions at work. Through a wide range of projects, in a variety of environments around the world, C5 works hard, quickly capturing accurate measurements and virtually eliminating downtime. Trimble C5 offers easy customization Trimble users have come to expect. Nikon's autofocus allows the Trimble C5 to focus quickly and accurately on the expected distance so that users can simply see, shoot and go, meaning that the days spent in the field can be very productive. The Superior Nikon optics provide users with clear, bright screen reading even in low light conditions. Features Autofocus, allowing accurate and fast focus Powerful Long-Range EDM's Dual ColorEd Touch Displays L2P Location Detection Technology (Locate2Protect) Compact, lightweight and durable system design On-board software: Trimble Access Access Precision prism: 2.0 mm and 2 ppm Prism / 3.0mm Range: from 5000 m to prism / DR 800 m Information The exact way of working Precision 2.0 mm and 2 ppm Prism / 3.0 mm and 2 ppm DR Prism Precision 5000 m to prism / DR 800 m Range New Trimble® C5 Mechanical General Station completes the top portfolio of the industry with improved performance, Improving performance by saving time features that make field work easier and faster Precision 2.0mm and 2 ppm Prism/3.0mm and 2 ppm DR Prism Precision 5000m to Prism/DR 800m Trimble C5 range is tough and reliable with a comfortable design. This limits user fatigue, even if it acts up to the most difficult conditions at work. Through a wide range of projects, in a variety of environments around the world, C5 works hard, quickly capturing accurate measurements and virtually eliminating downtime. C5 offers easy-to-tune Trimble users have come to expect. The Nikon-based autofocus allows the C5 to focus quickly and accurately on the expected distance so that users can simply see, shoot and walk away. This means that any day spent in the field can be very productive. Nikon's excellent optics gives you clear, vivid observations even in low light conditions. The results are always accurate and true, which provides great performance back in the office, too. There's no need to get back on the field because you get it right the first time. Autofocus, allowing accurate and fast focus Powerful long-range EDM Double The touchscreen displays L2P security technology compact, lightweight and durable design of on-board software: Trimble Trimble Winter 2 and 5 models are available to users operating in low temperatures, Trimble C5 2 and 5 all stations are available in a specially designed winter version. Devices, Software, and Accessories Read More Compare Mechanical Total Stations Trimble C5 HP Trimble C5 Trimble C3 Precision 1, 2, 3 or 5 1, 2, 3 or 5 1, 2 3 or 5 Prism Precision 1 mm Prism 1.5 ppm / 2.0 mm and 2 ppm DR 2.0 mm and 2 ppm Prism / 3.0 mm Range from 3000 m to prism / DR 500m 5000m to prism / DR 800m 5000m to prism / DR 800m Precision: 1, 2, 3 or 5 Prism Precision: 2 2.0mm and 2pm Prism/3.0mm and 2 DR Ppm Range: 5000m to prism / DR 800m New Trimble® C5 Mechanical General Station completes top industry portfolio with performance-enhancing, time-saving features that make field work easier and faster Trimble C5 is tough and reliable with a comfortable design. This limits user fatigue, even if it acts up to the most difficult conditions at work. Through a wide range of projects, in a variety of environments around the world, C5 works hard, quickly capturing accurate measurements and virtually eliminating downtime. The precision is 1 mm and 1.5 ppm Prism / 2.0 mm and 2 ppm DR Prism Precision 3000 m to prism / DR 500 m Trimble C-Series Mechanical Portfolio Station offers features that meet the needs of surveyors in all conditions. The high-precision C5 HP model specializes in: The EDM Small Beam allows you to easily measure edges and angles in unreflectable Measure mode with confidence in workplaces that require even the smallest tolerances Ideal for applications in need of direct reflection (DR) measurements or work in industries with rigid tolerances Trimble C5 HP is tough and reliable with convenient design. This limits user fatigue, even if it acts up to the most difficult conditions at work. In a wide range of projects, in a variety of environments around the world, C5 HP works hard, quickly capturing accurate measurements and virtually eliminating downtime. The C5 HP has the longest battery life in the mechanical station portfolio, which keeps going as long as you do. High Precision, Specialized EDM Advanced Battery Life Dual Color Touch Screen displays L2P security location technology Compact, lightweight and durable system design onboard software: Trimble Access Devices, software and accessories Trimble C5 HP works with ...
