Android TV Box is becoming very popular. They are a great choice for those who want to improve the intelligence of TVs, those who use Cody and Plex to manage their own media files or who travel everywhere, etc. But what is android TV Box? What are the features of the android set-top box? And who should buy Android TV Box? Lets Quantimang.com find the answers through the next article! Learn more about Android TV Box and its features It's an Android TV device TV box or key connected to the TV. You can use this field to watch video-on-demand apps, video sites and TV shows online. Android TV Box is not a term defined completely correctly. They have many shapes, sizes, even very different abilities. What all Android TV Box has in common is its ability to run Android TV. Android TV is a version of the Android operating system specially designed to work on television. It's been around since mid-2014 to replace the now-existing Google TV. Just like the android mobile version, the Android TV operating system is highly fragmented. Many Android TV Box manufacturers have changed this operating system to serve their own requirements and ideas. Even the Amazon TV Fire TV operating system is a powerfully modified version of the Android TV operating system. And, like the mobile version, there are various releases that are distributed due to the unsustainable upgrade cycle. Google regularly releases new versions, but in some cases, it can take a long time to bring the update to all devices through the manufacturer's OTA update. The Android TV operating system is also integrated into smart TVs. At various times Sharp, Sony, Philips and Hisense have used the Android TV operating system for their television products. Finally, the Android TV operating system is the most popular back section for kodi boxes. Cody's box is a set-top box that launches directly into the Cody app. And don't worry, these Kodi boxes won't get you into trouble with the law. The quantriang explained the legality of Cody's box in an article: What is Cody Box? Is it legal? If you want more information. How to find content Android TV Box Interface on Android TV Boxes is a bit like the Android operating system on smartphones. Your app appears on the scrolling feeds on the screen. On most Android TV Boxes, you can customize your favorites, as well as watch recommended content from apps in additional feeds at the bottom of the screen. Android TV Box does not support widgets. Android TV users have access to the Google

Play Store. However, it's not the Google Play Store that you'll be familiar with on Android mobile devices. The list of available apps has been heavily changed. The app developer must make his software compatible with Android TV to be listed in the TV version of the Play Store. This means that many applications are not available from smaller developers. However, all the apps you want to find are present. You can download and watch Netflix, Hulu, Amazon Prime Video, Crackle, YouTube, HBO Go, NBC, ABC, BBC iPlayer, MLB. Some apps face geographical limitations. To overcome this limitation, use high-quality VPN providers such as ExpressVPN or CyberGhost. However, although the Google Play Store is much smaller than the mobile version, the Android TV Box still allows you to sideload the app, meaning that you can get an APK file of any app you want to run on your field and install it. Just keep in mind that applications that are side load can be incompatible with the remote control. A simple solution is to download a remote Android TV app to your smartphone. This app allows you to use your finger as a mouse pointer. Is more content available on Android TV Box? Android TV isn't just for watching videos. There are music apps such as Spotify and Pandora, video players like VLC, as well as various supplement apps such as Explorer Files and side download startup apps. However, the most visible form of alternative content on Android TV is the game. Some Android TV Boxes, most notably Nvidia Shield, even offer alternative app stores where you can download and run games as diverse as Grand Theft Auto and Sonic the Hedgehog. What other features does Android TV Box have? Various Android TV designers have created many features integrated into their products. Some of the features you may encounter on Android TV Boxes include: You can transfer content directly from your phone, tablet or Chrome desktop browser directly to your TV. Google Assistant is increasingly having mid- and high-end products that offer Google Assistant integration. Sometimes this feature can be displayed as a set-top box that always listens. In other cases, you need to activate the virtual assistant with the Android TV Box remote control. Additional ports Again, the number of additional ports is not the same on all devices. Depending on the manufacturer, you can find a USB port, an SD card slot and an Ethernet port for a wired Internet connection. You can use USB ports to connect keyboards, mice, game controllers and other peripherals. Bluetooth If Android TV Box is enabled by Bluetooth, you can use this feature to connect it to your phone, keyboard, laptop or other device. Who should buy Android Box consoles? Android TV is the smart TV operating system of choice for many people. Many people used Roku, Amazon Fire TV and many other alternative smart TV operating systems, but then decided to go back to this Android option. If you like customization, flexibility and integration with many other Google apps and services, Android TV Box is great. For different prices, you can easily install a premium Android TV teleaver on the main TV and then use a cheaper Android TV key on other TVs indoors. This helps to achieve consistent user experience throughout the home at a reasonable price. However, Apple users should note Android TV is not actually compatible with Apple's suite of apps. If you want to learn more about some of the best alternatives to Android TV, read the comparison of Chromecast, Apple TV and Roku, or what experience to keep in mind when choosing to buy an Android TV Box if you decide to buy this product! Want you to find the right choice! Sunday, 30/06/2019 08:53 Android TV Box (illustrated) The world of information technology is growing, accompanied by a growing demand for human use, and above all people you want to own smart technology. Android TV Box was also born based on human needs. Did you know that android TV box? That's not true, is it? TV Box is just a technological device designed to connect to TVs, so you can perform your functions such as watching movies, surfing the web, listening to music or using other apps on the Internet. TV Box is designed delicately and varied to connect most TVs through 2 HDMI and AV ports. Android TV with beautiful images (illustrations) Attractive, serving you most of the entertainment needs, but the price is not too high (usually less than 2 million VND) with a compact size, so TV box items are now on the market very popular among many families. No need for laptops or smart devices at all, as long as you have an Android TV Box you immediately own a smart TV without spending a lot of money to buy a Smart TV, but can use that money to buy TVs with a larger screen size, better image quality. What are the advantages of TV Box? In the past, to be able to connect to the Internet to watch movies or surf the Internet, you can only use it on computers, kneeling on top or on smartphones. Sometimes friends converge on a small computer to watch their favorite movies, but with a computer, it's too little for you to watch with a lot of people and won't feel interested in what you watch anymore. So let's put these images, movies, these excitements on a lot more television for everyone to see. It's a smart TV that can help you do everything on television, you can watch movies, surf the web and play your favorite apps. But everything has its price, any money. Smart TV is very convenient, very attractive. However, for a normal family that are not filled, it is some great asset to buy a Smart TV home. But it's not there until 2015. The tech world has released a small device to turn any TV every family, old or new TV can become a Smart TV that No need to use a large amount of money to buy a Smart TV at too high a price anymore. And you will enjoy the features of the Internet experience like the real Smart TV Turn Normal TV into Smart TV So where do you need to buy this Android TV Box?
