Concept - StoryMinion Rush - is a one-game game, created on the basis of the infamous 3D animation franchise Despicable Me the most favorite characters - Minions. The game inherited all personalities concepts and abilities. So get ready for unbridled funny funny and a bright 3D cartoon graphic design style. The story of Mignon Rush is mainly related to the film Despicable Me 2 and 3. The faithful creatures of Gru now work for a secret organization called AVL (short for the Anti-Villain League). They must perform specific tasks, including collecting bananas or collecting stars on the moon, etc. to combat the activities of the supervillain. Your main mission, of course, works continuously without any restrictions. You will play the game by controlling the minion that runs away from the bonds and goes through an assortment of obstacles, trying to eat every coin and banana on its way. Your minion aims to do your best to catch as many bananas as possible. An innocent character will face evil bosses on the way without realizing it. You will visit various places along your journey such as Gru Laboratory, Durakavalian, Minion Beach, and a number of other areas. These places are also inspired by original films. To complete tasks and collect bananas, you can earn virtual currency to unlock colorful clothes for the main character, boost your skills, and activate extra bonuses. We use mostly items collected to upgrade the rank and improve the recipe jam - Minions' all-time favorite. In older versions, they converted bananas into tokens to unlock costumes and purchase costume cards. In the new arrangements, bananas are used to increase the chances of getting unique banana prize pods. We'll discuss this in more detail in the instruction section below. There are many characters in Minion Rush, and they are classified into three main types: Minions, the other main characters of the film, and the villain bosses. Minions are the only symbols that you can control and customize. They can be either Dave, Carl, Jerry, or Mel (a new character from the third film). On your first visit, your default character will be Dave. Aside from their core missions, these four Minions can also compete with each other in some fast-changing challenges. Paul recently presented a particular mission video clip, but this character has not played until now. Players can increase their Minion's more important stats by buying different costumes for them. Dave is the one who has the most affordable costumes among the four choices. Later, Karl, Jerry, and Mel outfits were also added to the same closet as Dave. You can go to this section to buy and unlock different costumes. The characters of the instruction consist of Gru, three girls and other AVL agents such as Lucy and Dr. Each character will give you recommendations to perform specific in-game missions. They are managed and built by developers and cannot be in the game or customizable. In addition to obstacles, Minions can be hampered by bosses, just like the movie's supervillains. Currently, there are four and they they they available in Despicable Ops. Vector and El Macho are characters that you may know because they have already been featured in the Despicable Me series. The other two Meena and Villainloquis are non-canonical characters created by Mac Guff Lighting. These bosses usually throw objects toward minions and sometimes even try to break them up. You have to avoid attacks and throw items back to defeat the villains. Otherwise, your Minion is dead and the game ends. Your main goal is to raise the level in the game. You will achieve a new title for every five ranks you upgrade, including Up-and-Come, Secret Operator, Clandestine Operative, etc. Labels also come with coins and costume cards as a reward. As we mentioned earlier, you'll start the game by running with Dave. There are three lanes to run and you will see bananas floating on the race, waiting for you to eat them. So how are they? Like other runner games, let the character go through them. To avoid obstacles, you can swipe up to jump, swipe down to duck, or jump to another lane. Switching between three lanes is also easy. Just lift the Mignon left or right to get to the route you want. To counterattack the bosses, you need to equip your Minion with certain bonuses. During the race, you can change the costumes of Mignon several times to beat different bosses. Bonuses are gadgets that perform a certain function in the game. Your minion can use them to collect bananas, clear obstacles, or attack other minions and bosses. Costumes aren't just clothes your Minion wears. Each suit has its own stats and bonuses to help Minion exhibit his missions. The costumes also have different dash styles, not only jeans in general as in the film, but also a new design added to each updated version. These costumes can be earned through prizes or buy bananas, coins, tokens and costume cards. You'll get new small tasks every day, perform these daily tasks to get costume cards, tokens, and prize pods. Bonuses integrated into costumes perform special abilities. Don't forget to charge them before use and you can use them at any time to activate the necessary bonuses after a full charge. Jumping, sliding, and dodging obstacles are a way of charging abilities. Combining these activities with collecting bananas and picking up food ups on the go can increase charging time. Be sure to pay attention to any food you pick up while working because it only lasts 5 seconds. In addition to the usual single-headed mode, the game also offers a special mission mode, requiring players to collect special items at certain locations during the race. These places are separated from the available rooms, and each special mission consists of six stages, as opposed to standard missions. At each stage you will receive different items, and at the end of the All tasks, you will be awarded Market Tickets, Fever, Coins, and Prize Pods special mission. If you are bored of playing alone, practice in training mode and bring your own minion to compete with other players around the world. By winning the race or defeating some of your friends, you will reach a higher rank in the world leaderboard. The game has stunning tones of color and many variations even in the same area. The voices and gestures of the Minions are imitated precisely for the correct expression of their personalities. Every Minion has its own way of dying, and every style is crazy in its own way! The gameplay also provides a good mixing experience for players. It changes perspective on the side view usually and throws you into motion-controlled sliding parts. If one meal lasts 5 seconds, then two bonuses completely change everything for their duration. XXL zelier flips the camera to the front; Meanwhile, you tilt the screen to control your giant minion, smashing everything in its path. The perfect time-killer for millions of Minions fans Mignon Rush imitates accurately and recreates the design, graphics and many characters of the memorable franchise vividly. A wide range of costume collectionsCosuits often go on the scenery, and each of them has a unique concept. You can choose any Surfer style, ballerina style, spy style, Cupid style, Cancan style dancer, and more for your characters. Created for all ages and genders, Sweet and Hilarious Minions, along with unexpected twists, can make you laugh along with your kids, friends, and even your parents. Easy to play, but still challenging. No complicated rules of the game and plot twists. There are no troublesome weapons. All you have to do is work by swiping the jump, dashing to continue rolling your adventure. The game seems like it's trying to make you bug your friends. It's a simple genre of the game that isn't as bloated as it used to be.
