Temple Run 2 is an endless game released by Imangi. Since its launch, the game has been called the mobile game redefining the game and has been played by a huge number of players around the world. You can easily notice a noticeable change in Part 2 when it is heavily updated in terms of images compared to the previous version. In addition, the game also updates a host of new features and interesting characters, giving you an unforgettable experience and making you addicted to bad times. I bet your friends are all playing this game, can you beat their record? Non-stop running Temple Run 2 has endless run gameplay. I find it very similar to Metro Surfer, but this game has a different context and content. You are an adventurer lost in a mysterious forest, but you are lucky to find an artifact hidden for thousands of years. But you have no idea you were having a real nightmare. This artifact has a terrible curse, one who dares to awaken it will have a disastrous end. You've woken up a giant monster guarding artifacts, and now you have to run as hard as you can if Remember, don't look back because it's always behind you! GameplayTemple Run 2 requires you to be able to avoid obstacles while picking up coins on the way. You have to really focus to overcome dangerous rocks, zip wires and dark catacombs full of traps. Just for real, you're going to be a dinner for another monster. The gameplay is probably well known, it's pretty simple including swiping the screen up to control the character jumping up, swiping down to roll, swiping over the spread or the right move to the side. It's always easier said than done, especially when the game finds ways to derail your efforts by designing a lot of pretty complex traps that you can lose at any time. There are some supports that you can find during the run, such as a shield to protect you for a certain period of time or a magnet to suck coins (such as Metro Surfer). Especially when dead, you can use blue diamonds to continue the journey. Next time, the amount of diamonds you have to spend is doubled. They are very valuable in this game, you can use your face to buy them or watch ads. The system of characters and attributes the amount of money you collect will be used for you to unlock more of your favorite characters. The game has many different characters for you to choose from and is constantly updated in updates. In the latest version, you can unlock the king of speed is athlete Usain Bolt. To chase Usain Bolt, the giant gorilla will work hard! During the game you collect money and diamonds. They are used to update character attributes. Each character has certain attributes that directly or indirectly affect the gameplay. In which, each property has 5 levels, you can use money or diamonds to upgrade. The higher the level, the greater your strength. For example: Coin Value will help you get more GoldShield Duration: Time to get a layerCoin Magnet shield: Magnets suck money! many other properties... To get enough coins and diamonds to unlock the characters and update the attributes, will have to spend a lot of time in the game. And you can't achieve that without playing the game hard. But if you have little time, then in fact you should use temple to run version 2 of MOD APK, it is regulated for you to buy characters and upgrade properties for free. The Design of Temple Run 2 has been significantly updated compared to the first version. Excellent image experience allows you to play for hours without getting bored. In addition, the sound is also very impressive. You will feel your heart pounding every time you hear the roar of the gorilla behind you. The game's main interface system is divided into many different areas. You can unlock to experience new areas, including: Sky Summit, Pirate Bay, Burning Sands, Lost Jungle, Spirits Cove, Frozen Shadows, Holl Festival...
