Introduced in 2004, Cisco 1841 is a router that handles integrated services. It is part of the company's popular Cisco 1800 series of select integrated service routers. The 1800 series, in turn, is one of many series in the company's broader portfolio of integrated routers. A big leap forward from the 1700 Cisco series router, the router 1841 increased performance fivefold. It can support more than 30 WAN interfaces as well as multiflex backbone maps. Cisco 1841 Router Router enhances VPN performance using the acceleration module, which is optional buyers can add. It provides many slots and performance opportunities for users who want to expand their network. The watch is integrated into the device itself in real time. The Cisco 1800 series of integrated router services (modular) Equipment Installation Guide Cisco 1841 is a modular platform that supports both T1 and E1 wire speeds. It supports more than 90 modules and contains two 10/100 integrated fast Ethernet ports. It has an optional 4-port Ethernet switch that extends its capacity to 15 VLANs. Backed by the Cisco IOS firewall, Cisco 1841 has many security features lacking in its competitors. It offers encryption on board. With the AIM module, the device supports more than 800 VPN tunnels. Antivirus protection is provided through network check-in control. It provides built-in encryption based on the hardware itself. Encryption is enabled by an image from Cisco's IOS security software. The router provides small and medium-sized businesses with an efficient and secure solution for online travel. Cisco 1841, like the rest of the Cisco 1800 series, provides a secure way to transmit different kinds of data, including video and voice. It has 256 MB SDRAM memory and 64MB Flash, allowing users to deploy services simultaneously. It is available on Amazon.com and other online stores at a fraction of its original price tag, which was about \$1,300, since the router is larger produced. Cisco will complete router support in October 2016. It was replaced by the Cisco 1921 Modular Router. The Cisco 1841 router belongs to cisco 1800 integrated service routers. Cisco systems are the best for small and medium business routing with a new line of integrated router services that are optimized for secure, delivering speed wires, voice and video services. The Cisco 1800 integrated service routers are an award-winning series.
