This tool will help you create a boundary around the theme you chose in the Style tab. After that, you can apply the texture of your choice. For example, if you want a flower background, you can choose Flowers as a texture and add flowers. You then need to select the Position tab and drag the object you want to spread. Then click delete. You can then adjust the position of the object you want to move. Another way to edit photos is to choose and drag the subject.
