Despite the simple premise, not all gallery applications are the same. Some of them work fantastically with great design and speed. Others suffer from poor design and slowness. The good news is that you have many options to replace yours if necessary. Whether it's sorting photos, hiding them, or you just want something clean and fast, we have you covered with the best gallery apps for Android. We also like Focus, even if it hasn't been updated for a few years. Remember also that OEM gallery apps are a great option, and these apps are usually designed for the phone they're on. 1GalleryA's GalleryF-Stop GalleryFocus GoGallery VaultGoogle PhotosMemoria Photo Gallery PhotoMapPikturesSimple Gallery ProPrice: Free/\$2.991Gallery is the newest gallery app on the list. It's also a mix between the gallery's standard app and the gallery storage app. The app works like any standard gallery and you can view your photos by date and in the form of a grid. However, the app also allows you to hide your photos and videos behind a pin, pattern or fingerprint lock. Hidden files are not only hidden, but also encrypted for your privacy. Some other smaller features include a super simple photo and video editor feature, as well as a light and dark theme. It's cheap, dignified, and it needs to get better over time. AS GalleryPrice: Free/\$9.99A Gallery is a simple gallery app. You can do ordinary things like manage your photos, create photo albums and share your photos. Along with this, it has the support of Dropbox, Amazon Cloud and Facebook. This means you can view these photos as well. In addition, it comes with a storage feature where you can save private images. The design is solid and not difficult to use. It combines material design and iOS styles in one look. You can download it for free with an additional professional version available as an in-app purchase. It's not bad how far the gallery apps go. F-Stop GalleryPrice: Free/\$4.99F-Stop Media Gallery is one of the gallery's old apps. This one features a flatter, cleaner design emphasized by a material design with a few really decent features. You can search for photos based on its metadata, which is kind of awesome, and you can add tags to the photos for a simpler organization. It also reads metadata (including EXIF, XMP and IPTC information) and has a Smart Albums feature that will help you sort your stuff on your own. Best of all, he plays GIFs! This is easily one of the most flashy gallery apps for those who love their stuff loudly. Some require a pro version, but the free version is still very functional. GoPrice Focus: Free/Focus Go is a new gallery app. This is a lighter version of the popular Gallery Focus Francisco Franco. It's a lightweight and simple gallery app. You open it, it opens the files, you can share them, and that's really all you need. It does not include the side of the editor editor With the size of the app. In addition, it has an additional 32-bit coder to improve image quality and some customization options as well. The main Gallery Focus app is under development for an overhaul. So, if you want something like this with even bigger features, it's best to check that out on Google Play and see if the massive update has fallen yet. Gallery VaultPrice: Free/\$3.99 Galleria Sanctuary does almost exactly what the title says it does. It creates a private repository for your photos to keep them away from prying eyes. With it, you can hide photos, videos and any other type of file that supports this app. You can also hide the icon so no one knows how to access it, but you get alerts if someone breaks in and it supports some fingerprint-enabled devices (Samsung devices are only now). This is a good option in terms of gallery apps if you want some privacy and you can try the free version before you buy it. Google PhotosPrice: FreeThere has a few places where Google's fingers hegemony don't reach, and it's not one of them. The Google Photos app is a cloud-based storage app where you can upload as many photos and videos as you want. The only downside is that images and videos will be compressed into Google's high quality settings. However, the app is also able to see your device's folders to see any things you haven't downloaded. It's a great app that most people use anyway, but its secondary functionality means that having another gallery app is essentially redundant. If you use Google Photos, you can also use it as a gallery app too. Google has a super stripped down version of this for lower end devices as well. Memoria Photo GalleryPrice: Free/\$3.99Memoria Photo Gallery is one of the new gallery apps on the list. This one has a good level of customization, usually smooth performance, and even some security features. You get themes, fingerprint authentication, and you can even hide albums that you don't want. The app also comes with encrypted storage and various viewing modes. It seems to tick all the boxes, although the app still has occasional bugs here and there. The developers are in a bit of a rough patch with this, but when it works, it works very well. PhotoMapPrice: Free/\$2.99PhotoMap is one of the gallery's most unique apps. This allows you to take pictures and save them through the place. You can then use the map to view the photos depending on where you took them. For example Have to go to the beach to see the pictures you took near the beach. This is one of the pure GPS-based gallery applications that we could find. It's also just fun to play with. You can download it for free or pay for the pro version for \$2.99 as an in-app purchase. There are even FUNCSies AR to play. PikturesPrice: Free with in-app purchasesPiktures is one of the simple gallery apps. However, this does not mean that No features. You can sort on different things, such as location, and you can hide albums if you don't want people to see them. It works best on big screens. This makes it worthy for big phones or tablets. There is also GIF support for those who love it. It looks like Chromecast's support is on its way as well. It also has gesture-based controls that are delightful to use once you get used to them. It's a solid option all around. Simple Gallery ProPrice: Free /\$0.99Simple Gallery Pro, well, a simple gallery app. The app is completely disabled without unnecessary permission. In addition, you get image and video search, 32 languages support, a favorite quick access feature, a trash can to recover lost photos, and a variety of ways to filter a massive collection. There is also a security feature with unlocking fingerprints for additional privacy. There was a free version of the app. However, only the premium version gets updates now. This is not a big deal because the app is only \$0.99. It is also open source and supports most types of photos and videos. If we missed any of the gallery's best apps for Android, tell us about them in the comments! Video editing is one of the hardest tasks a device can do. On computers, it requires decent specifications, tons of RAM, tons of storage, and some know-how on how to make it work. Phones don't have the specification or power to replicate experiences like Final Cut Pro or Adobe Premiere Pro. However, some apps can do basic things very well. It's even good enough for some pro vlogging with some patience. Here are the best video editor apps on Android, at least until Premiere Rush CC does it on Android. You can also click here to see the best video editors on most platforms! ActionDirectorAdobe Premiere RushFilmoraGoFunimateInShotKineMasterMovie Maker FilmmakerPowerDirectorikVivaVideoPrice: Free/\$3.99ActionDirector is one of the most popular video editing apps on PC. It is also available on Android. He's doing the basics. You can import clips, edit them and visualize videos. You can do things like add your own music, trim and cut videos, add text, use slow motion, and more. This is one of the few apps for video editor who also supports 4K video. Developers have a great tool connected in the Google Play Store to see if your can. He also gets Update. Adobe Premiere RushPrice: Free /Up to \$53.99 per month Albe Premiere Rush is one of two above-average Adobe video editor apps. Another Adobe Premiere Clip, which is closer to a standard mobile video editor. Anyway, Adobe Premiere Rush is one of the new video editor apps on the list, and that's pretty good. It comes with plenty of must-have features, including multichannel timing, cloud synchronization, and some advanced editing tools. The app still needs some user interface interface and some bug fixes, but it has a ton of potential. It's also included in the Adobe Creative Cloud subscription, so it's worth a try if you're using this service already. FilmoraGoPrice: Free /\$7.99FilmoraGo is the video editor of the Wondershare app. This is easily one of the best video editor applications. This video editor packs whallop. You can make basics like trim and cut, visualization, and the like. It also includes the ability to play backwards, make square videos (1:1) for Instagram, and 16:9 videos for YouTube in particular. It also has support for things like slow motion, transitions, music, overlays, and more. It's not half bad for what you get. There are in-app purchases that add to the power. However, most features are, in fact, free. Funimate Video EditorPrice: Free with in-app purchasesFunimate is one of the surprisingly popular but not too powerful video editor apps. It positions itself as a great app for creating music videos or simple videos of things you already have on your device. There are 15 video filters that you can play, and the process of creating is pretty painless. This is not something you would want to use on a serious video. It has things like video effects. However, it's better for short little posts on social media rather than actual video production. You can download it for free to try it yourself. InShotPrice: Free/\$2.99 per month/\$9.99 per year/\$29.99 timesInshot is a super simple video editor with a heavy focus on things like filters, video trimmings, and short videos. It has a fairly simple timeline editor with multiple video and audio channels. You will also get basic tools such as pruning, a selection of music, and various other little things as disappears in and out. Its toolkit, sticker packs, speed control and other features make it great for things like YouTube, TikTok and similar platforms. We also love how it has one price tag along with its subscription in case you want to go down this path. KineMasterPrice: Free/\$4.99 per monthKineMaster is one of the most powerful video editor apps available, and one of the first. You can do the basics like most of these other video editors can. However, this includes several videos, images and effect layers. In addition, there are audio filters, chrome key (for your green screen fans out there), various video effects, transitions, and more. It's not as powerful as a full desktop editor. However, this is getting much closer than most other competitors. We would recommend this for actual video production (at least for things like YouTube). You can use it for free in trial mode for a while. However, you need a \$4.99 per month subscription to get everything forever. Filmmaker FilmmakerPrice: Free/Movie Maker Filmmaker among the best free video editor apps currently available. You'll be able to trim, trim and reorder video content as established focal points. The app also boasts a variety of video effects and you can create your own custom filters, although this functionality is not surprisingly powerful. It also has other basics like music. The app has struggled with some bug problems since it's a major redesign, but it's still one of the best video editing apps out there. It's also completely free with ads. PowerDirectorPrice: Free/\$5.99PowerDirector is one of the most comprehensive video editor apps on this list. It comes with tons of features, including quick editing tools, various effects and other tools, and it even comes with things like a collage maker and slow motion support. The interface is relatively easy to work with and uses the classic timeline editor method. It should be more familiar to those who often edit videos. It's free to download and use, but you need to fork out extra money to get all the features. This is for a real video editor, especially for big screens such as Chromebooks or tablets. KvikCena: FriKwick is a new generation of applications for video editors. It's halfway decent if you need something simple. As it works, you add up to 50 photos and video clips to the app. The app then analyzes them and spits out a short video from them. The quick contains about two dozen video styles, and you can re-order and customize the video before you export it. It's not as powerful as something like Adobe Premiere Clip or PowerDirector, but not everyone needs something intense. It's free to download without shopping in the app. VivaVideoPrice: Free /\$3.99VivaVideo is one of the exceptionally popular video editing apps. In practice, however, it is a very mid-road video editor. It works especially well for short clips for social media. The app uses storyboard style editing where you upload clips, edit and crop them as needed, and then move on to the next segment. It includes more than 200 video filters and various other effects, typing, as well as fast and slow motion support. VivaVideo has a free version that comes with a watermark and a time limit for any video. You can remove these restrictions by buying a pro version. If we missed any of the best video editor apps for Android, tell us about them in the comments! You can also click here to check out our latest Android app and game lists! Lists!
