Notice the main title of My Post Close about the giant trans 2 2020 This is a bike trail that thrives in the most challenging environments. The frame frame is designed with a lightweight but super strong and rigid aluminum frame of the ALUXX SL. He updated the Maestro rear suspension featuring a trunnion mountain shock and an advanced wrought-iron composite rocker arm to soak up the bumps small and large. You get a 140mm smooth, active back trip that gives you traction and control, you have to be the one with the trail. The frame geometry is designed around 27.5-inch wheels that provide both speed and cross-country control. Ahead, you have a 150mm suspension fork for even more confidence. Just line up, get it and go. Key performance factors 27.5 agility and control: 27.5 inch wheels balance agility and control, giving you the ability to flip rough terrain, flick your bike at speed, change lines and explode out of angles. Latest suspension technology: The updated Rear Suspension Maestro is equipped with a trunnion mount with a longer impact and a smoother feel. With a 140mm rear travel (and 150mm forward), it has a new Advanced Wrought Composite Upper Hand rocker to increase stiffness and strength plus a lower overall frame weight. Trail customized chassis: The lightweight, hard and durable ALUXX SL aluminum frame features updated geometry to give you confidence in the technical tracks. The result is flexible and efficient climbing plus extra control for piste ranging from chunky singletrack to high speed descents. To soak up every punch, from big rocks to small undulating, we gave it a trunnion mountain of shock and an advanced wrought-iron composite top rocker arm. This combination produces a 115mm smooth, active rear-wheel drive trip that puts you in control. Ahead, it has a 130mm travel suspension fork, and the overall geometry has been customized and designed to maximize its performance on sturdy tracks.
