Fish in the Stardew Valley can be found in ponds, lakes, rivers, ocean or at certain levels of the mine. They can be obtained by fishing through fishing as well as by baiting crab pots. Fish can be bought in a mobile shopping cart in Cinderella Forest. Content show Common / Common Fish Image Fish Season Time

These fish are one of a kind, and have their own special icon in fishing mini-games. The methods of obtaining these fish were revealed after finding and reading a number of Lost Books libraries. In order to catch the fish Legends, the player needs at least the 6th level in fishing. This will prevent players from getting a quick jump by using it on the first catch when the green fishing progress bar does not go down. (Caught Crimsonfish with 6 fishing in patch 1.07.) Fish Season Time Time Note Price Price Price Fall Any north Joja-above the bridge - : : 900g: 1125g: 1350g Crimsonfish Summer Any 6am-8pm Ocean (East Pier) Can be caught from Level 5 in fishing (checked) : 1500: 1875: 2250g Glacier WinterFish Winter Sunny 6am 8pm South End Arrowhead Island - In the Forest Deep Water: 1000g: 1250g: 1500g Legend Spring Rain 6am-8pm Lake Mine (cast in magazine) Can be caught with level 10 in fishing: -: 7812g?: 11250g? For the index of the completed fish collection see for a guide to catch all the fish, see Fishing Strategy. See also: Bait, Tackle Fish can be found in ocean, lakes, rivers, and in some levels of mines. Most fish can be caught with a fishing rod (see fishing), but some require crab pots to catch them. Some fish only spawn at certain times of the day, while others appear only when it rains. After catching them, the name of the fish and its length is displayed. Players can track how many fish they have caught and their record lengths in the menu collections. Fish can be used as ingredients in cooking and are needed to restore the aquarium to a community center. While players can fish near any body of water, some places have lower success rates. These areas are likely to produce garbage that can be sold for a small profit or saved and turned into useful items using a recycling machine (which opens with a level 4 fishing.) Fishing Mini-game When a fish hooked box appears with a fishing mini-game. The player must move the highlighted area up or down to keep the fish inside it. While the fish overlaps its catch meter will fill, while the fish is not inside the area it will decrease. If the catch counter is fully filled, the fish is caught, if it becomes completely empty, the fish runs away. If the fish does not leave the counter once, you will receive a perfect notification. When making ideal catches, the quality of fish improves - high-quality silver fish becomes a gold quality, and golden fish - the quality of iridium. (The normal quality of the fish does not affect.) When playing a fishing mini-game with a mouse and keyboard, the bar will grow when the left mouse button is pressed and lowered when the mouse button is not pressed. Behavior There are 5 species of fish in Mixed: These fish use basic motion patterns. Smooth: These fish have a more stable movement structure. Sinker: These fish have a faster acceleration down. Floater: These fish have a faster acceleration up. Dart: These fish move more randomly with 2 x difficulty above the possible amplitude in both directions, moving erratically up and down the fishing bar. There is also a 0.4% chance of catching a pearl. Legendary fish there are five fish in the game classified as legendary. These fish are caught in certain places and have a high complexity. When winding them up, these fish are shown wearing a hat. The legendary fish will not appear again in the save file after being caught once. In Multiplayer, each fish can be caught once per person. Legendary fish can be caught at any time of the day. A lost book called Secrets of legendary fish contains the seasons and places of the legendary fish. The high complexity of these fish makes catching them a challenge. Higher fishing skills than is required just for hook fish may be needed, especially from food bonuses (such as from Seafoam pudding). Having an Iridium Rod and using tackles such as The Bobber Trap or Cork Bobber can also Ultimately, catching these fish may depend more on luck than on good reactions. You just have to try again and again until the fish moves too violently. Some are just catching using the bait crab pot. Crabs fall from rock crabs (15%) and lava crabs (25%); On the beach you can sing clams, cockles, mussels and oysters. Between beach feeding and prey of the crab Rock/Lava can be supplemented with a bunch of crab pot without the use of crab pot. The bait is rewarded with crab pots however, not possible without first reaching level two in fishing, or viewing Linus' 4-Heart cutscene. All crab fish can be used in cooking. Some recipes require specific fish, while others can use any fish. (It's changing with fishery and the fishing profession.) Please note that any fish dumped by monsters or thrown from the beach is not considered towards the fish collection. They should be caught with a pole or in a crab pot. Fish with cereas can be normal, silver, gold or iridium quality. Fish caught in crab pots are always of normal quality. All crab fish cost 5 XP. In doing so, it removes dangerous toxins from the environment. 40 40g 50g 60g 80g 50 50g 62g 75g 100g 60g 75g 90g 120g Ocean 3% 14% Other Catchables there are some non-garbage items players can roll during fishing. They didn't cause a fishing mini-game, but instead immediately picked up. Each gives 3 Fishing XP when caught and always standard quality. All three are displayed in the Fish Collection tab, and count on four fishing achievements. However, they are otherwise not considered fish, and therefore cannot be sold to Willie at the Fish Shop, and they cannot be used instead of Any Fish in Recipes. Recipes All the items shown on this page, except for other Catchables and clams can be used in the following recipes: When to turn your fish into sashimi Below is a quick reference table showing when it is profitable to turn a fish into sashimi based on fish quality. Fish that never make a profit when turned into sashimi are not listed (crab, crayfish, lobster, legendary fish, etc.). Fish with a sale price of 75 grams, just like Sashimi, are not listed. Fish No Profession Fisher Occupation Anglers Profession Anchovy Always Regular, Silver, Gold Regular, Silver Bream Regular, Silver Regular, Gold Regular, Silver Regular Carp Always Regular, Silver Regular, Silver Chub Regular, Silver Regular Never Cockle Regular, Silver Regular Never Ghostfish Regular, Silver Regular, Silver Regular, Silver, Silver, Silver, Regular Periwinkle Always Rainbow Trout Regular Never Red Snapper Snapper Silver Regular Never Sardine Regular, Silver, Golden Regular Shad Regular Never Prawns Regular Never Smallmouth Bass Regular, Silver Regular Never Snail Regular Never Sunfish Always Regular, Silver, Gold Regular, Silver, Gold Turn Sardines in Dish o' Sea temporarily increase the level of fishing may be the best choice. References No. 1.0 1.1 1.2 For all underwater fish, fish.xnb input data identifies the upper/bottom values of size 8 and 25. However, these fish can only be caught in a submarine, where the maximum possible fishing area is 2. As a result, even with a fishing skill of 14 and the perfect catch, the largest possible fish size is 20 inches (which happens to be barely large enough to be the quality of iridium). Crab pot content determined by CrabPot::DayUpdate. For sailors, there is no chance of junk, and all creatures are equally likely. For non-sailors, there is a 20% chance of junk, then each creature is tested sequentially, using the odds specified in Fish.xnb. One of the results of this algorithm is that the actual chance of finding a given creature is less than the value in the input file, because it can only be found if unwanted elements and all previous creatures have failed their tests. Molluscs are not classified as fish by game. Therefore, they cannot be used in fish recipes, do not enjoy bonuses for the price of fishing, do not appear in the Fish Tab section, and are not counted in the four fishing achievements. In the game data (ObjectInformation.xnb), the type assigned to algae and algae is Fish, but it is not assigned the category Of Fish (-4). The label is displayed in the game, and most applications are controlled by the category. Story 1.4: Added the ability to fish iridium with a perfect catch. Added flounder and midnight carp. The legend can now only be caught once per save file. Snails are now Vincent's favorite gift. Vincent.
