All equipment, whether internal or external, should always be accompanied by software to operate it and communicate correctly. It's no different when we talk about installing printers. Printers also require software (often called driver) so that it can communicate with the computer and properly do its printing, copying and scanning service. In this text, we'll show you a simple, uncomplicated tutorial on how to install a 3636 printer. How to install the HP 3636 printer - Step by step All printers usually come with the installation of a CD. This CD contains the drivers you need to install it on different operating systems. However, it may be that one model or another does not come with this CD. In this case, the driver can be easily downloaded from the manufacturer's website by entering only the printer's serial number or printer model. In the case of the HP 3636 printer, the site is: Installation Drivers are always intuitive and will provide the user with information on how to proceed with the next steps, but we will show you step by step below. Check! Step 1 - Start by removing the plastic that protects the printer and then remove the blue protective tape: Remove the seal from HP 3636 Printer Step 2 - Lower front cover of the equipment and remove the cardboard compartment and other protective tapes: Open the cover of HP 3636 and remove the protective sands. Step 3 - Inside this cardboard compartment are cartridges as well as a power cord. Connect it to the back of the printer and plug it into the socket: Don't forget the printer power cord. Step 4 - Turn on the printer with the power button, as shown in the picture below: Click the button specified to turn on the printer 3636. Step 5 - The button will flash several times, the printer will turn on and the printed car will move to the center of the equipment: See the correct positioning of the cartridge compartment. Step 6 - Completely remove the protective seal from the cartridges hp 3636, making sure not to touch the cartridge circuits: Remove the seal from the cartridges hp 3636. Step 7 - Insert cartridges into these compartments (the color is on the left side and the black one is on the right side). Keep an eye on the correct docking position: correctly install black and colored cartridges hp 3636. Step 8 - Close the front cover. Now, in the driver's possession at hand, insert it into the computer's CD player. In case it was downloaded from HP's website. If you need it, here's how to install an HP printer without a CD. Step 9 - Installing Software: Start-Up installation file by clicking on the file twice. The following prints are from the English installation software, but the steps are the same for those who download the installation software in Portuguese. Step 10 - Tap the Connect new device on the screen that opens: Connect the new Device Step 11 - Without connecting the USB cable to the printer, select the option highlighted in the image below, and click next: Click on. Step 12 - The system will automatically detect the printer. To start the installation, click finish: Click finish. Step 12 - After that the printer will be installed! Step 13 - Now you can connect the USB cable to your computer and it will be ready to use. USB or Wi-Fi connection Some printer models, including HP 3636, offer the user the ability to connect the same via USB (cable) or Wi-Fi. The installation is selected during the process of installing the printer driver, in the second stage of this tutorial where you chose to connect later - Don't connect to the device now. I'll put it together later. If you want to communicate only through USB CABLE, just keep with installing steps through as we guide, without disconnecting from the cable that will stay connected so you can use the printer. If you want to choose a Wi-Fi connection, repeat the installation procedure by selecting Wireless - Make a wireless connection to the device. Installation will continue with the usb cable still connected to the computer. The program itself will guide you to the point where it should be removed. At the end of the installation, the software may offer to register the printer. You will be redirected to an internet site where you can additionally fill in your personal information, such as name, address, email address and phone number, as well as determine what the usefulness of the printer will be. All of this will facilitate the process of servicing and technical support of the same thing in case of problems within the warranty period. After installing and registering the process, just use your printer, always forgetting to use a cartridge hp of good origin and quality, like those on the PrintLoja market, in order to extend the life of your equipment, and do not have a loss of quality in your prints. PrintLoya sells office supplies and all stock for the entire print line, including the HP 3636 printer cartridge. We hope this tutorial on how to install the HP 3636 printer was helpful. If you have any questions, leave a comment below and we will do our best to clarify it.
