Cloud Cover -% Rainfall - Water Temperature YAQUINA USCG STA (Newport) Today, Monday, November 2, 2020 Hilarious YAQUINA USCG STA (NEWPORT) Today, Monday, November 2, 2020 The most frequent waves will be the height of about half the critical wave of the most frequent waves. The critical height will be about 14% waves exceeding the critical wave height (about 1 in every 7 waves). It is normal to expect a wave of height of twice the height of the critical wave about 3 times in the maximum waves 24 hours. This means that at this time you need to be prepared for a wave before you go out on the water. HIGH TIDE AND LOW TIDE YAQUINA USCG STA (NEWPORT) TODAY. Monday, Nov. 2, 2020 TIDE YAQUINA USCG STA (NEWPORT) Today, Monday, November 2, 2020 TIDE TABLE YAQUINA USCG STA (NEWPORT) all time are generated in Oregon local time and daylight saving time changes have also been borne in mind for your convenience, so you don't need to add or subtract anything. Height means are expressed in the legs in terms of low low water (MLLW). This is the average of the low low water height of each tidal day, on which the official time segment is observed on which tide observations are taken and reduced to achieve the mean value. You can change the time format and default unit for height in press any day in tide table to load all information.
