Maytag model mvwx655dw1 manual

8The cycle knob to choose your washing cycle. 7.Select cycleLiquid Chlorine Bleach5.Add liquid chlorine bleach to dispenserDo not overfill, dilute, or use more than 1 cup (250 mL). Do not use color-safe bleach or Oxygen products in the same cycle as liquid chlorine bleach. Add a measured amount of HE liquid detergent to the cleaning tray. This tray contains 3 oz. (89 mL). If adding powder he removes detergent inside the tray. Do not fill the tray - adding too much detergent can cause the detergent to be distributed to the washing machine too soon. NOTE: Make sure that the tray in the drawer when using liquid detergent and remove when using detergent and do not pass through the Max line. The package will be marked HE or Highly Efficient. Low water washes create excessive sudsing with a regular non-HE detergent. Regular use of detergents can lead to longer cycle times and a decrease in washing performance. It can also lead to component failure and noticeable mold or mildew. HE detergents are made to produce the right amount of suds for the best performance. Follow the manufacturer's instructions to determine the amount of detergent to use. USEFUL TIP: See Washing Machine Maintenance for information on washing machine tray cleaning methods.4.Add HE detergentHE removal detergent trayNOTE: Do not add single-dose laundry packs, color safety bleach, Oxygen type boosters or fabric softeners to the distribution machine. They won't distribute correctly. Add to the basket before adding laundry. Use laundry products dispensers6. Add liquid fabric softener to berriesPour a measure of liquid fabric softener into the tray; always follow the manufacturer's instructions for the correct amount of fabric softener based on your load size. Close the fruit drawer, and then select Fabric Softener - On Options. Fabric softeners are added during washing. IMPORTANT: The fabric softener option must be selected to ensure proper delivery at the right time during the cycle. Do not fill or dilute. The oversistribing machine will cause the fabric softener to immediately distribute to the washing machine. If the Extra Rinse option is selected, the fabric softener will be distributed on the last wash. It is normal for a small amount of water to remain in the fruit at the end of the cycle.
