Roppe wall base adhesive

MM-100 DETAILS OF LOW HUMIDITY DILUTION VOC DOES NOT CONTAIN WATER OR SOLVENT SINGLE COMPONENT DOES NOT MIX REQUIRED EASY APPLICATION DOES NOT REQUIRE SHOTBLASTING MOISTURE BLOCKS UP TO 99% RH 20 LBS. MVER install flooring in as little as 2 hours compatible with most NP-230 non-porous substrate primer details zero VOC water-based components of single drying quick drying patch or underlayment within 1 hour compatible with most Cementitious CP materials -300 Cementitious patch details details to a wide range of substrates substrates does not require primer on porous substrates installing flooring in less than 30 minutes exceptional work and quick self-drying coverage compatible with most cement cement material Self-leveling bond layer details to a wide range of pumpable walkway substrates within 2 hours can install exceptional low-flow self-shrinkage self-processing on distressed flooring compatible with most CSU-400 Cork cement material sound control Underlayment details underlayment certified for use with flexible flooring manufactured with fast-growing resources that contains >90% after manufacturing recycled content of easy cutting and install high resistance to high recovery pressure from excellent starting distance & airborne air-based reduction qualifies For LEED balances compatible with most fsu-410 floating flooring materials sound control under the detail layers supported for use with flexible flooring no adhesives required to install contains 80% industrial after recycling content can be installed on VAT, paper and vinyl solid resistance to high recovery pressure of excellent indentation effect & Airborne sound reduction resistance to moisture damage qualifies for LEED balances compatible with most flooring details no adhesives or fasteners required increases flexural strength of layered layers Increases the tensile strength of the layers allows for the installation above the distressed flooring eliminates the aggressive surface preparation of easy-to-install SP-500 acrylic adhesive details zero VOC water based on the ease of installation of excellent shear strength passing Hill Room Hospital bed test immediately usable contributes to LEED credits resists up to 90% RH, 8 lbs. MVER can install immediate use of the flooring directly over mm-100 AW-510 Acrylic Wet adhesive set details low VOC water-based solvent-based solvent-based stable stable easy-to-install excellent grade strength certified floorScore contributes to LEED credits AP-520 acrylic You roll on the details of the adhesive zero VOC water based easy, roll on the installation of excellent shear power no clutter, easy cleaning contributes to the easy use of LEED for the flooring can be installed directly over mm-100 WB-600 ACRYLIC wall adhesive details low voc water Menu, excellent free solvent early power compatible with Excelsior distributed nozzle easy to install easy to clean FloorScore Certified Power Shear contributes to LEED Credits Low Details VOC High Free Solvent Shear Power Provides Nose Support Improves Tread Stair and Straight Longevity Mounting Over Concrete, Metal or Wood Easy-To-Install FloorScore Certified Contributes to LEED TP-62 Credits 0 Pressure sensitive adhesive details low VOC solvent free shear power superior allows instant stair traffic to be installed directly on concrete, metal or wood easy to install no cleaning, Waste Limited contributes to LEED C-630 water-based contact-based adhesive details zero VOC existing details On water roll on the installation of a higher shear shear head resistance or immediate horizontal usable contributes to leed credits compatible with most materials and can install more direct substrates than MM-100 MS-700 modified Silane Wet-set adhesive details zero VOC no waterproof Or excellent solvent excellent internal power shear/outdoor waterproof will not pass or color flooring materials easy to clean contributes to LEED credits can be installed directly more than MM-100 U-705 U-705 Urethane Wet-set VoC zero adhesive details no water or solvent no moisture or RH internal boundaries / outdoor resists moisture and few can be installed on porous and non-porous substrates EW-710 epoxy modified urethane adhesive details voc free non-flammable internal solvent / in The outdoor ideal for installation under heavy equipment bond power superior shear power excellent contributes to LEED credits can be installed directly over the MM-100 ASD-800 acrylic wet esd set extremely low adhesive adhesive details VO water-based solvent free improves the conductivity of ESD flooring freezing melting flooring stable flooring soluble flooring certified flooring Score contributes to LEED credits USD-810 Uretan wet ESD adhesive details VOC free solvent free improves esd flooring behavior ideal for installation under heavy equipment superior bond strength shear excellent strength contributes to credits LEED can be installed directly over mm-100 WB-600 acrylic wall adhesive base is free of high performance adhesive solvent, wet acrylic adhesive set specially designed for durable installation of rubber, TPR and vinyl wall base products and formed corners preset on vertical surfaces. WB-600 is 100% solids, low VOCs-free solvents. The WB-600 rup can be installed on porous substrates in internal applications. Roppe cove adhesive base is non-flammable and freeze stable melting, as well as water and alkali resistance. Unit size: 30 oz. Cartridge 4 gallon unit weight: 2.5 lbs. (Cartridge) 44 lbs (4 gallons) WB-600 wall adhesive base is a premium solvent-free acrylic adhesive for use with Roppe rubber and vinyl wall base installations. Commercial mats and rubber offers free UN shipping in the continental United States on orders over \$50. Excelsior_WB 600_DataSheet.pdf Excelsior_WB 600_DataSheet.pdf
