This makes it easy to search for and delete duplicate files onyour Android mobile phone and tablet. Nowadays, with such space in Android devices, we usually reset everything we canuntil storage fills to the brim. And the next step most of them will do is to try to delete useless files. But we often cast a blind eye to duplicate files. On average, about 10% of any physical device is filled with duplicate files. Remo Duplicate FileRemover will help you delete these files and make room on your Android device. Here's an example of some of the features packedinto is a lightweight app: - Free - Remo Duplicate File Remover isa free app - One Tap Scan - Just Tap will initiate scanning forentire storage space - Simple and easy to use interface - Displaysthree different menus for media, documents and others - you'll receive notifications for new duplicate files in every 15 days Working with Remo Duplicate : Click Scan After Scan , it will display three tabs: - Media documents - Other Select tab that suits you Tab In'Media, select from images, video and audio Under'Documents', all duplicate files, such as .pdf, .txt, .xlsetc ... The 'Other' tab is designed for all other file types such as .zip Select one of the duplicates of the file and delete Remo Duplicate Photos Remover 2.0.1.66 APK Countless duplicates of photos consuming your storage device? Instantly scan your phone's memory and remove duplicates of files with RemoDuplicate Photo Remover. As one of the iconic apps in the Remo storage management kit, this tool is designed to find, view and remove duplicate photos. With a million downloads the app works on remo's own intelligent De-DupeAlgorithm to scan and find similar photos taken in splash mode or HDR photo mode. Get rid of re-image and similar images quickly through instant messaging apps and social media. On average, 17% of the photos on your device are identical copies of the original, which puts it at risk and the performance of the phone. Sowhy keep them when you don't need them?!! Remove duplicates-organize and optimize phone app scans and displaysduplicate or similar photos in sets. It then serves you with theoption to remove duplicate photos by selecting the whole whole set of images from it. The best part is, even if you remove theentire set, it will ensure that one copy of the photo is still with you. Cheers!!! Restore storage space for free!! Download NOW Features --Smart De-Dupe Scanning Modes: -- Scan for similar photos: Images that are similar to each other, but not quite the same, for example, the same background, but different tilts. -- Scan for exactphotos: Accurate scanning slides across all images and finds photos that are exactly the same. -- Preview of duplicate sets of images: After scanning your phone, photos are placed in sets to view accurate or similar photos. -- Identify memoryconsumed: Displays memory absorbed by duplicate images after scanning your phone. -- Runs the app in the background to find duplicate images while you perform additional tasks on the phone. The scanning time depends on the number of images on your phone. -- Saves a single copy: securely saves one original image, even if you delete the entire system. -- Explore the number of duplicates: The user can even track thenumber images removed from the phone's memory. -- Removes scannedups in seconds: After scanning, it only takes a few seconds to displace duplicate photos. Without jailbreak/root access, Undeleter can only scan image apps. READ BELOW FOR INFORMATION ABOUT ROOT. The free app will restore all supported types of image files and all types of data, including SMS, call logs and WhatsApp or Viber conversations. It will also shred and safely remove. Unlock it to restore other supported file types, delete ads, and accessable background scans. ROOT/SUPERUSER PERMISSIONS require you to change the operating system on your device, visit this website for more information: caches may contain images that would otherwise not have been revealed: you can find photos that have been shared with you on social media, but you have never opened, or lower quality copies of images you have already deleted in the past. They can also contain images that have been pre-loaded by your browser or other devices on your device - even images of people you don't know. They can be filtered using Hide-to-end files. File Types: Scanning logs can detect files with any conceivable extension. Essentially these files are still on your own with their data in the allocated sectors. Scanning the log EXT4 and derivative file systems. Deep scanning heuristically scans and restores the following file types: BMP, JPEG/JPG, PNG, MNG, JNG, GIF, MP4, AVI, MKV, MP3, OGG, OGM, WAV, FLAC, AMR, MP4A, PDF, SXD, SXI, SXC, SXW, ODT, ODG, ODS, ODP, DOCX, XLSX, PPTX, SIP, JAR, APK. Data scanning is available for a select number of apps, including the system phone and SMS apps. The data will be restored in the form or HTML files for WhatsApp and Viber, as we cannot combine our directories. Shred/secure delete: Files found on free disk areas can be erased in bulk with Shred. You can also use the Share system menu to securely delete files directly through any other app, such as opening a gallery, selecting the number of images, clicking the Share button and choosing Securedelete.ACCOUNT - necessary for Google Drive and Dropbox uploadCALL /SMS - necessary for the app's data scanner - remote SMS and calllogsLOCATION - for The Master Security ads - Antivirus, VPN, AppLock, Booster APK Original CM Security updated to thewhole new security master Antivirus Instead of providing all popular equipment, Security Master Antivirus-VPN (by CM) has presented a synthetic diagnostics to detect your phone status and advise needsolution, including antivirus, unwanted cleaning, and phone booster (Battery Saver, and Cooler processor) in time.
