Lovely full foods Try today! Give your puppy the best nutritional start possible with Fish4Dogs. Order a free trial kit today! You can order up to 10 free shipping kits. Dogs love taste, owners love nutritional benefits. As your puppy grows, it goes through many significant changes, including the development of bones, joints, brain, eyes and digestive system. 100% fish protein, no beef, no poultry, no unnecessary fillers, no additives. Fish4Dogs bones and joints help maintain healthy bones and teeth due to its high calcium and phosphorus content. Mineral balance in fish is a major developmental factor and high levels of Omega-3 help make joints suppler. The brain and eyes of DHA found in Omega-3 is a key operation of brain cell membranes and helps form tissue that converts light into energy. There is growing evidence in the role of Omega-3 in brain and eye development. Especially, DPA, which is found only in marine sources of Omega-3. The digestion of your stomach is very sensitive - a good protein should be easily digested so that the body can break it down effectively. Because fish are easily digestible, it reduces the growth of unwanted gut bacteria and improves digestive problems with dogs with sensitive stomachs - like your puppy. Benefits We understand that when considering switching to fish for your puppy you may have a lot of problems - at the top of the list, will he/she taste like it? We have a very simple solution that allows your puppy to taste food at a fraction of the cost. Just add this sample package to the shopping cart for \$2.00, and check as usual. You will receive the following samples of our two most popular products: (2) Samples of Finest Puppy White Fish Large Bite (2) Samples of Finest Puppy White Fish Small Bite Bags (1) Sample Bag from The Sea Jerky Tiddlers Analytical Components: Raw Protein 30%, Fat Content 14%, Raw Ash 7%, Raw Fiber 2.3%, Omega-3 Fats 2.3%. Therefore, they are available from numerous suppliers. Click here for more information. Buy locally: Shop finder list ingredients as printed on the packaging or company website. Ingredients that we find controversial or below are highlighted in yellow with a particularly low grade, highly controversial or overly vague ingredients in red.Information in italics is usually not available on the ingredient list, but has been provided to us by the manufacturer to help with our ratings. The level of dry nutrient matter is the percentage it would not be in food if all the water was removed. With water taken from the equation, these numbers allow the level of nutrients of products of different types (e.g. wet and dry) that can be compared on an even playing field. Click here for more natural information This food does not contain any added artificial preservatives, antioxidants, colors, flavors or other controversial Ingredients. For more information on our logos click here Not Natural This food contains some added artificial preservatives, antioxidants, dyes, flavors and/or other controversial synthetic ingredients. For more information on our logos click here for high meat content food contains at least 30% of the meat ingredients based on the dry substance (once all the food water has been taken out of the equation). For more information on our logos click here Not High in Meat This food contains less than 30% of meat ingredients based on dry matter (once all the food water has been taken out of the equation). For more information on our logos click here Hypoallergenic This food is free of all ingredients that are regularly associated by veterinarians with food allergies and/or intolerance in dogs like wheat, corn, dairy, soy products and artificial supplements. For more information on our logos click here Not hypoallergenic This food contains one or more ingredients that are regularly associated by veterinarians with food allergies and/or intolerances in dogs or uses ambiguous terms that makes it impossible to rule out their presence. For more information on our logos click here Grain free This food is free of all grains including wheat, rice, corn, barley and oats. For more information on our logos click here Not Grain Free This food contains one or more cereals or a list of ingredients that is too obscure to exclude cereal content.
