Make group video calls with up to 32 people share and join group calls with the link Take photos of your video call Try doodles, masks and fun effects with family mode (enter with a google account) Google Duos for PC is a must. But the problem is that the app is only available for Android and iOS. So here's the good news for you. There is a way to download and install Google Duo for PCs. And if you're interested, even if you won't use the official Google Duo app for Windows, then by all means, keep reading. Google Duo is one of the latest apps from the Google family. It was released in August 2016. So it's barely over a year ago. The Google Duo app is a video call app that focuses on providing quality video reception at both ends. Ultimately, it is optimized to work even in the lowest bandwidth network possible. This makes visual communication possible even when the Internet is virtually inaccessible. Google Duo is best suited for those who prefer video calls, such as business interaction and family communication. We all know that just photography sometimes just isn't enough anymore, especially when we're talking to our loved ones. And that's it. restrictions that Google is trying to break so that users will be able to connect to people who are important to them. For those who are not familiar with Google Duo, it is similar to other messaging apps such as Snapchat, Kik, Hike and the messenger app lmo. The big difference is that this app focuses more on voice and video calls. The app doesn't now have a specially designed software version that can work on Windows, so we'll give you a way to overcome this limitation. Download Google Duo for PC NameGoogle Duo v74.0.294155Size7.04 MBRequirementWindows 7/8/10/XPAuthorGoogle LLC Important reminder: Downloading only google Duo app won't work on Windows PC. You should read the full instructions on how to properly install a file on any Windows machine. SEE ALSO: How to download and install Google Duo for PCs This method may not be the most convenient, but it is definitely the best choice out there. And you don't have to hack or cheat your way just to get a Google Duo on your Windows device. We will use an Android emulator that runs Android apps and games. If you're familiar or have heard of the BlueStacks Android emulator, this is what we'll go for. You will need to download the BlueStacks installation either from their official website or from our own download links. You can use the download button we provided so you can start downloading the app. It would be better to serve you if you would use a download booster and accelerator to make the download a little faster. The IDM app can give you up to five times faster download speeds. When you've finished loading the installer, double-click on it to start installing. Follow the instructions on the screen and give permission for BlueStacks to download. You can create a new folder or simply use the program files folder instead. It will take a few minutes, but once BlueStacks finishes installing, find the desktop icon immediately. Double tap the icon to initiate the program. Follow the instructions by clicking on the BlueStacks screen. Also, try to familiarize yourself with the button on the screen while you're at it. When you reach the main BlueStacks interface, do nothing. Leave the emulator working as you will need to do one more thing first. We've provided you with Google Duo APK with the download button. Find this download button somewhere here in this article and click on it to start downloading. When the APK file is ready, double tap THEK to start installing blueStacks. Or just drag and drop the APK file on the BlueStacks screen. Then it should automatically download Google Duo.When it ends, you can use Google Duo for PC. Recall that you will need a phone number for this to work so your smartphone for one-time check. Enjoy! Download BlueStacks Installer In conclusion This method may not be the official Google Duo for PC, but it is still still All the functionality of the Android app. No more, no less. Depending on the Windows device, the performance of the app will depend on these factors. Not to mention the integrity of the internet signal that you will use to make calls. So in today's question, why do you think Google has made a great decision to create a special app exclusively for video calls? Do you think there is another feature that Google Duo should have?
