Start practicing this simple napkin once now on Valentine's Day. January 26, 2009 1 of 4 Little Romance It is also suitable for any heart occasion such as Mother's Day or wedding reception. 2 of 4 Step One Bring the top and bottom edges of the napkins to meet in the middle. Now bring the lower edge to almost the top, causing about 1/2 inches (13 cm) exposed. 3 of 4 Step Two Place your finger in the center of the bottom, and fold both sides up to meet in the middle. 4 of 4 Step 3 Turn the napkin, keeping the point to you. Fold in each of the top four corners to form the top of the heart. Clicking on the final folds helps keep the shape. Turn over the napkin. You have to be in pictures. No really. Companies are increasingly using simple photos to distill complex concepts into easily shared, easy-to-remember nuggets. Graphic expression and visual thinking are a central part of human cognition, says Neil Cohn, a researcher in cognitive psychology and linguistics at Tufts University. These ideas range from how companies sell what they do - as in UPS's Whiteboard ad campaign, featuring the creative director of their agency sketching out what Brown can do for you - to build a strategy. For example, Mark Zuckerberg said that Facebook is based on social graphics, a visual model of how people interact. Between information overload, globalization and the complexity of modern business, we need to be more visual and less dependent on language in communicating with ideas, says Dan Rome, a visual consultant who advises major organizations such as eBay, Wells Fargo and the U.S. Navy. (His book on how to use pen-and-paper sketches to your advantage, Back Napkin: Solving Problems and Selling Ideas with Pictures, was published in March.) Turn the page for four cases in which Roam customers have forced their thoughts into photos with great success.Infosys ConsultingTo annual business model Infosys is simple. Bring a job to the workers instead of getting employees to work. But the company's connection was a mystery. We were responsible for PowerPoint's death, says CEO Stephen Pratt. We struggled to get our messages through. So Infosys launched a program called Perfect Pitch, aimed at simplifying presentations, both domestically and outside the world. It worked. Our people are much more effective now, Pratt says. The contrast between the classical world economy and the Infosys system is especially convenient. (It's after right.) Pratt found himself using a sketch at the World Economic Forum in Davos, Switzerland, this year to help explain what the company is doing and how it works, instantly. Peet's Coffee and TeaAbout a year ago, Peet's management faced a challenge: how to bring its new vision, mission and values to 3,500 employees. If workers are bought into serve, manage, evolve, inspire concepts, the plan will flop. The challenge was to make this seemingly head-to-head concept simple and fun, CEO Pat O'Dea says. Everything we do in our store fits into one of our four principles and if people realize that when we bring these four together we create fanatical customers. O'Dea wanted a visual guide that could be distributed in all stores and throughout the company to get everything from guy cleaning bathrooms to execs headquarters on the same page. Page, simplified version on the left.) When we introduced it, O'Dea says, it was like the light bulbs went for people. In fact, he says many managers pull him out during interviews to show candidates what they're signing up for: being recruiters for Pete's Fanatics, not just coffee makers. Wal-Mart You take almost everything we deal with related sustainability, says Andy Reuben, vice president of private brand strategy at Walmart and former vice president of corporate strategy and sustainability, and it affects hundreds of other things. As the retail behemoth ramped up PR around its sustainability initiative, the team needed a way to let the public know how Wal-Mart pays attention to environmental issues. As we do the moves, there have been intended consequences - such as energy economy - both unintended, both positive and negative, he says. Visual representation of complex ideas helped clarify trade-offs. The group started with sketches showing aspects of the supply chain along with sustainable development goals for each of them. (Pictured here are the designs of the four-part chain - see the rest on the walmartstores.com.) The sketches were then turned into computer illustrations for the website. When Microsoft CFO Chris Liddell realized that the financial statements he had received internally were difficult to reconcile, he intended to streamline the software giant's incredibly complex system. But first Microsoft needs to understand the connections inside. So the team developed a series of sketches in which they examined how information was distributed and then suggested smoother systems. (On the right is a vicious circle that the team tried to break and how it did it.) The final prototypes depict a financial dashboard that gives the CFO what he needs in a single view. One thing that blew me up was that there's some emotional connection to hand-drawn stuff, says Joel Creekmore, Microsoft's financial group manager. You wouldn't have the same connection to it if I did it on a computer with a very, very straight line. Pretty recognition from the creators of Visio. Creators. napkin man theme song lyrics
