With these apps around, there's no reason to settle just for your stock camera app! Why get other video editing apps for Instagram? Although Instagram has become one of the most popular social media (along with platforms like Facebook and outdimilating others like Snapchat or Twitter), it hasn't gotten there based on the quality of its video creation experience. In fact, the platform achieved its popularity initially by completely ignoring video options: instead, it focused on easy-to-use phone photography, which offered many filters, editing and placement options. This has allowed people to post beautiful photos from their smartphones faster and easier than ever before, which is why the platform has become so successful. As part of its recent growth, Instagram has introduced video features designed to combat the likes of Vine (RIP) and Snapchat. However, its video creation and editing software leaves much to be desired, especially if you are looking to make high quality videos for your Instagram following to enjoy. How do you choose this list? One of the main areas of this list is to ensure that all applications are used for Android and iOS. Many best lists in this category don't meet this task, and are often only vouched for for iOS apps (because Instagram is much more popular on this platform). With this list, we're going to make sure that all applications can be used on both platforms, so that no one misses out. The next, of course, is the features. Every app on this list should offer compelling features to justify downloading and using it with your Instagram videos. We've tried to avoid selecting apps that do the same thing as well- no one likes redundant apps clogging their phone. With that aside, let's get started. The best video editing app for Instagram Horizon Horizon is a simple app that allows people to convert vertical videos into Video. In the rush to record life events and other interesting things that happen, many amateur Instagrammers will make a vertical record: while it's good for some, others very much prefer videos in the proper horizontal format. Horizon does just that. With Horizon, you can easily adjust the vertical video horizontally. Teh Teh The version also offers a plethora of tantalizing add-ons, but the app remains solid on Android. Even if you don't use it for Instagram, you can use this to make your Instagram-recorded videos easier to watch on other platforms like YouTube. Lapse It Lapse This is one of the time-lapse video editing apps for Instagram, and shows itself on this list, being one of the most highly rated solutions. Unlike other apps that can make a lazy port from iOS to Android (or vice versa), Lapse It offers a native, fully functional version for both operating systems, which means that no one misses. The length of time can be quite interesting content, especially made in short form and posted on Instagram. Kwick comes from GoPro, but does not require a GoPro to use. In this spin on video editing apps for Instagram, Kvik allows its users to take photos and videos from a variety of sources, including GoPro, Google, Facebook and storage of their own phone. With up to 75 pieces of photo/video, Kvik will comb through and discover notable moments as well as facial and color settings. With the help of Kvik, you can choose from a variety of filters and video styles, as well as have access to a powerful, easy-to-use editor in the app that allows you to stitch multiple unedited videos into one, edited, high-quality. You can also use the music along with the videos that the quick will be being cuts and transitions. Kvik has earned its highest rating and is one of the most popular video editing apps for Instagram, and smart devices in general. Very recommended. Magisto Magisto is an interesting creature. Through what he calls Emotion Sense Technology, Magisto performs several tasks aimed at creating the best video of what is provided. Magisto takes raw footage, a user's choice of video style (of which there are many) and a selection of music. The result clearly works well because Magisto has earned crushing ratings on both the Play Store and App Store, as well as several Best of and Editor's Choice awards. Use Magisto for some of the best and easiest in fast video creation. YouTube (Capture) Right, YouTube! Or YouTube Capture if you're on iOS. (Android users can do the same in the basic YouTube app.) YouTube Capture offers YouTube mobile recording and editing features, with no limit on the number of clips you can use or the time that your video can run. By integrating with the YouTube platform, it also offers access to a massive free audio library, as well as allowing you to quickly and easily edit and post videos on YouTube, Instagram and more. If you want to increase With your Instagram presence supporting other video platforms, YouTube Capture is a great choice. Giphy Cam Giphy Cam comes from Giphy, one of the most popular online storages for GIFs. GIFs and other short video content are quite popular on on and other social media apps, because of their simplicity, and Giphy offers a quick GIF writing tool for all platforms, with lots of fun/wacky edits to use on it. Phhhoto Phhhhoto (It's a strange name spell, right?) is a short application to create videos. It is designed to instantly capture moving photos - that is, an extremely short video designed to add the illusion of motion to the image. Boomerang Last, but not least comes the app from Instagram itself: Boomerang. What's going on around going around, we assume. Boomerang allows users to create fast videos using multiple photos and turning them into a fast, high-quality loop.
