Hello. Hello. Hope you're doing well. I would like to tell you that you did not mention the name of the college you are studying in. Referring to the issue of the documents of your own college or university helps in the best way possible. So, it's advisable that you mention the name of the college so I can help you better. Good luck in the future. Are you looking for BSc 1st Year important questions in physics? Well, you're in the right place. In this post, we're going to share some of the most important physics questions for BSc students. You can also check out our recent post on physics notes for BSc.These issue banks according to the UGC curriculum and work best for students at most Indian universities. However, if you are an outsider, then I suggest you also try to resolve these issues and practice issues from the tutorials. This is due to the fact that most of the time the curriculum remains the same. The best thing you can do is download question jars from our website and then match your physics program. If your program corresponds to the questions asked in our bank, then this is good news. You have to solve all the issues with your tutorial. But what if your program doesn't fit our bank's questions? Nothing to rest in this state. However, you can write your requirements (with the name of the university and the subject) in the comments section. Note: We created these bank issues using the previous year's documents and important questions from the curriculum. The questions asked in the exam may differ from those available on our website. However, you can resolve these issues to get the best grades in the exam. We focus on important issues that were repeatedly asked at last year's exams. These documents are based on the latest curriculum. How to download Bsc 1st year important questions in physics? Important questions in each of the three parts (i.e. mechanics, electricity and vibration theory) are below in pdf format.
