Working through the IKEA Assembly may be a real test of love, but IKEA Russia now has fort instructions for the whole family. Assembling does not require special tools or parts, but household items that are already classic blanket blanket pieces of history. Because it's IKEA, no blanket fort is just an empty fort: There are instructions for six architectural variations called C'stle, Kev, Krepping Tent, Fortress, Geeuse, and Wigw/m. #StayHome was the common slogan of this spring. Self-isolation and quarantine measures are continuing. Parents no longer know how else they can entertain their children stuck in four walls, said Dezeen, one of the founders of the Instinct initiative. Mike Reddy We all sat cross-legged on the floor, looking at deceptively simple instructions to assemble a bed frame or table while casually texting friends, of course! See you for a drink in 20 minutes. There are only three steps. Then, two hours later, you need a drink because you're sure your desk shouldn't have had three legs, and it certainly shouldn't have wavered like this. Cooking can be like that too, especially when it comes to over-finity pasta. There are dozens of tutorials on the internet, complete with photos of every step in the process, down to what a bag of almond flour looks like (in case you're lost in the store and start contemplating whether you can just sub to some good ol' all goals). It seems too easy to mess up when they break it as perfectly as it is. And yet, one way or another, the experience is more like this: Mike Reddy If tears can form the ointment and seal our cracked pasta, we'd have flawless treats every time. Every time. This isn't the first time the IKEA MAN represents the core of our very being- he also embodied exactly what he wanted beer to be able to chicken, and the agony that tries to push a trendy watermelon keg (and seeing its cracked and leaking gritty watermelon juice all over the floor). But the company's approach to physical retail is changing, along with the evolving digital strategy. After a 40% drop in its profits over the past year, Ikea has announced plans to build small stores with footprints that are easier to build in cities. The first smaller venue, opening this autumn at Tottenham Court Road in central London, signals another shift, too: its restaurant won't serve any meatballs-not even futuristic meatballs out And so on. The new approach, as reported by The Times, is currently under way Ikea UK retail manager Javier Kignones. This seems to be a European strategy at the moment, but it would be reasonable for other company markets around the world. We've seen chains ranging from Target and Sephora to Whole Foods and Taco Bell embrace small concept stores to cram their brands into an increasingly dense and expensive urban environment. Smaller stores are cheaper to operate and they are potentially faster to open. The concept of small Ikea stores can be opened within six months, while large-scale Ikea stores take an average of three to four years. Even if these stores can't carry all the flagship location it will be, they can serve as an exhibition hall-more accessible place to gain physical experience with the Ikea brand. Also, having more seats can come with a secondary advantage: It creates a network of delivery centers that could compete with lightning-fast delivery times for companies like Amazon. Ikea is investing heavily in its own delivery infrastructure, and over the next year, it wants to be able to allow customers to order any of its 10,000 products online and receive them throughout the day. We can only hope that these options will include the famous meatballs. Again owner Leslie Pritchard looked past this set of outdated chairs and saw the potential. Four chairs should be reglued first, before grinding, priming, painting and new fabric. They were so wobbly! Pritchard talks about his vintage find. The new attractive look has an artificial finish and bright pink velvet uphol an uphol an uphol an uphol an uphol an uphol an upsized. Drum roll please ... Do you like the new look? Check out the amazing reveal and make sure to check the site for bigger projects. This makeover is courtesy of hometalk member Thrifty and Chic. I began to realize how desperate I was in need of extra storage in my bedroom. My nightstands were just two boxes of little things that weren't really held. I went to Ikea and found a Rast 3 chest drawer, which would be the perfect size to replace my current nightstands, offering a little more storage space. The best part? Being able to finish it the way I wanted! Thrifty and Chic through Hometalk To get a faux three-box look, I took my and there are two lines on each box. Thrifty and Chic through Hometalk To make sure the pulls were focused on each faux drawer, and not to go crazy measuring each one, I did this little trick. I took a piece of paper and cut it down to a size size (I had two separate sized boxes, the middle row is a little smaller, so I created paper for this size as well). Then I folded the paper in half and then half again. I lined the drawer to pull at the folds, so it would be centered and marked where the screws would go. Then I lined it up on a drawer, and used a pen to mark through the screw marks on the drawer. Then when I took off the paper, I knew exactly where the pull was supposed to go. Thrifty and Chic through Hometalk Height this dresser is perfect for nightstands as well. And I'm a sucker for pharmacist cabinets. . Now I got one for the cost of an Ikea dresser rather than a couple hundred bucks. The price to pass one of them was \$53- \$35 for the dresser itself and \$18 for the equipment. I had paint and a stain already on hand. See all the makeup on Thrifty and Chic. To help your search for the perfect dresser, we scoured our favorite retailers for some available options that fit the bill. Ready to give your bedroom a serious upgrade? We picked up the best parts of the accent bedroom out there (and, yes, IKEA's favorite MALM makes a necessary appearance). Here are the best dressers. Invest in this hand-held beauty and every morning you will feel like you have woken up to a five-star resort in Bali or Chiang Mai. The perpetual medallion patterned dresser comes in three stunning trims - indigo, washed gray, and white, and with its tropical hardwood designs, it is sure to last a lifetime. While we can't all live in Palm Springs, we can certainly decorate as we do, right? Bay Isle Home's Lamont Dresser playfully mixes two midcentury tones of modern silhouette with tropical touches like rattan woven boxes and leather bindings. If you just can't bear the idea that it's hidden in your bedroom, it works as well as a console or entrance desk. Want to fill your space with a bright pop of color? Instead of going for a traditional wooden dresser, pay your attention to this juniper green beauty from France. The dreamy seven-wheel-chest has five large boxes, as well as two small velvet linings from the top. Adding further interest to the design of shiny aged brass equipment and legs. Due to its high appearance and affordable price tag, hands down our favorite IKEA dresser. Despite its luxurious leather pulls and sleek Scandi design, it won't work more than \$250. If you have enough space in your home and budget stop what you are doing and take a look at the Room'Board in Copenhagen Dresser. The modern, handmade piece is available in 10 different sizes and a handful of woods and finishes from walnut and maple to sage and saffron. If you have trouble cleaning old clothes or you just have an affinity for online clothing stores, we think you will find the 10-drawer option particularly appealing. Think you can't find a spacious dresser under \$400? Think again. This six-cardiac dresser of Target's 62 project has clean modern midcentury lines and a light walnut finish. This mod, 70-inspired West Elm dresser is a big size for nightstands, but it will also hold its own in a small bedroom. We love to pull detailing and chic metal legs. Despite the \$200 price tag, Walker Edison's midcentury dresser will stand the test of time. The sturdy chest is made of solid pine and is finished with a deep walnut stain that complements almost any decor. Ready to retire your college-era dresser and make a major upgrade? The four-handed Caspian 4-Drawer Dresser is made from a mixture of luxurious materials including reclaimed Australian and South American hardwoods, a cathedral of grainy Indonesian forests, a stone washed jute, and shiny brass. The result? An exquisite piece of furniture that instantly draws eyes. Babytto's Hudson Double Dresser is technically a nursery dresser, but without changing the top, who could say? If you're looking to equip your child's room with versatile pieces that will be just like comfortable post-diapers (or you don't have kids but just love the look of it), we think it's a class-option. If your home relies on a modern farm aesthetic (think exposed wooden beams and lots of natural materials), this barn door inspired dresser will fit in nicely. The six-drawer block has plenty of room for all your clothes and the buttered rubbed bronze pulls the tie rustic look together. This campaign-style piece is small but universal. Use it alone in a small bedroom, or pick up the two flanks of your bed. While a crisp, all-white piece can work the most anywhere, we imagine it in a beach house or country cottage.
