Ati firepro v4800 (firegl) graphics adapter specs

© 1996-2014, Amazon.com, Inc. or its affiliates © 1996-2014, Amazon.com, Inc. or its affiliates ATI FirePro V4800 - graphics cards - FirePRO V4800 - 1 GB - Smart Buy | WL049AT General DVI-I (double link)2 x DisplayPort DirectX 11. OpenGL, OpenGL 3.2 DVI: 2560 x 1600 / DisplayPort: 2560 x 1600 / VGA: 2048 x 1536 at 85Hz Memory Power Device Miscellaneous Manufacturer Selling Program Video Output Supported Display Graphics 2560x1600, QXGA (2048x1536) Colors Max Resolution (external) Graphics Processor Manufacturer DVI: 2560 x 1600 / DisplayPort: 2560 x 1600 / VGA: 2048 x 1536 at 85Hz DirectX 11, OpenGL, OpenGL OpenGL 3.2 Digital Visual Interface (DVI) Video Colors Max Resolution (external) Header Video Memory Interfaces Dual Link DVI-I, DisplayPort Dimensions & Weight Slot Required ATI FirePro V4800 professional graphics card is a strong, basic-level 3D graphics card for workstation users who work with medium to large data sets in production environments and want the flexibility to use more than two monitors. The ATI FirePro V4800 has 1GB of memory using 400 stream processors and uses AMD Eyefinity technology to support up to three monitors. AMD Eyefinity TechnologyAdvanced multi-display technology delivers a highly immersive graphics/computing experience with innovative display features that support massive desktop workspaces. Automatic detection technologyAs a user moves between applications or opens new ones, graphics driver settings are automatically configured to optimize performance. Multi-View displayWith two DisplayPort outputs and a dual-DVI output, Multi-View provides up to three monitors with independent screen resolution, refresh rate, and screen rotation settings. Full 30-bit screen pipelineDe the entire 30-bit screen pipeline allows for more color values than 24-bit products for more accurate color reproduction and superior visual accuracy. (30-bit display is required for full 30-bit display.) Optimized and certified for many CAD and DCC applicationsCertification of professional AMD FirePro graphics solutions ensures compatibility, reliability, and the highest level of performance when used with professional 3D software packages. Industry-leading API SupportFull Shader Model 5.0 support helps create very complex geometry and scenes without taxing the CPU. Advanced DirectX 11 and OpenGL 4.1 features provide optimal performance in leading applications. Support for industry standard OpenCL 1.1, an open multi-platform development platform, helps enable a broad use of heterogeneous computing. Report a Fault Graphics Processor Redwood 640x480 1280x720 1366x768 1600x900 1920x1080 2560x1440 3840x2160 FirePro V4800 was a professional mid-range ATI card launched in April 2010. The map is built on the 40 nm process and is based on the Redwood graphics processor in Redwood XT GL-variant og understøtter DirectX 11.2. The Redwood Redwood processor is an average size chip with a door area of 104 mm² and 627 million transistors. It has 400 shadow units, 20 texture mapping units and 8 ROPs. ATI paired 1.024MB of GDDR5 memory with the FirePro V4800, which is connected using a 128-bit memory interface. The GPU runs at a frequency of 775 MHz, the memory runs at 900 MHz (3.6 Gbps efficient). That is a single-slot card, the ATI FirePro V4800 does not require additional power connectors, its power pulling is rated at 69W maximum. Display outputs include: 1x DVI, 2x DisplayPort. The FirePro V4800 is connected to the rest of the system using a PCI-Express 2.0 x16 interface. The card measures 168 mm in length, 111 mm in width and has a single-seat cooling solution. Its price at launch was 189 US Dollars. Dollars.
