Mendota dxv 36 manual

The catalytic wooden fireplace of the 36 Elite, shown with the face of the Classic Arch, heats up like an oven, and always attracts admiring glances. It has high efficiency cherry flames and Posi-Pressure heating through a quiet, remotely located 388 CFM fan that circulates heat throughout the house. 36 Elite also has an extra firescreen so you can use your fireplace with the doors open when you are not using the elite to heat. Once you have taken one look you can understand why it is only a fireplace line that can be called extraordinary. Accessories specification sizes installation Guide Owners Manual Door Screen Instructions Catalytic 44 Elite Wooden Fireplace is perhaps the best fireplace ever created. It has the approval of the EPA and Posi-Pressure heating through a quiet, remotely located 388 CFM fan that circulates heat throughout the home. The 44 Elite zC also has an extra firescreen so you can use your fireplace with open doors when you are not using the elite to heat. Once you have taken one look you can understand why it is only a fireplace line that can be called extraordinary. Accessories specification sizes installation Guide Owners Guide Capture the drama of a real wildfire requires the regal presence of a large fireplace. Majestic's SB wood-burning fireplaces range offers an impressive selection of model sizes: 38, 44 and 50 inch models with large viewing platforms. These radiant wood-burning fireplaces come the wit of a fire brick interior available either in a standard fireproof brick pattern or herringbone pattern and offer a tilt up heavy duty lattice for easy ash cleaning. Accessories specification features a brochure of the Sovereign Wood Burning fireplace from Majestic adds warmth to radiant or circulating heat and an unobstructed view of the fire in any room in your home. Available in both 36 and 42 inch sizes, The Sovereign offers a perfectly fireproof firebox lining and a classic brick hearth pattern for easy ash cleaning. With its black mesh fire screen, cast-iron chimney, large heavy grille and ash lip, this classic wood-burning fireplace look will add elegance and tradition to any room. The specification accessories features a brochure sr/sc36a Owners_Manual sr/sc42a Owners_Manual sr/sc42a Specs Majestic allows you to create a gathering place like no other with a genuine style of natural wood-burning fireplace. Best of all, it provides a generous amount of radiant heat without the smoke of the septum to interfere with your view of the fire. Ready to reveal the designer in you? Enjoy the warmth, comfort and elegance of the royal wood-burning fire. Nothing can beat a Royalton wood-burning fireplace from Majestic to add warmth and comfort to your home. These fireplaces offer top-line features and Everything is in an economical and easy-to-install package. accessories specification features Vesta Vesta brochure Georgian models of Freemasonry were the first to show our revolutionary, patent-pending Mosaic MasonryTM real system lining out fire brick. A wide range of models are available at 36, 42, 50 inches wide with 30 inches clear opening height, and a selection of traditional stacked or herringbone brick paintings. When only a genuine masonry fireplace will do, Georgian masonry has the industry's best offer at a fraction of the cost of the site built. The Brochure Owners Guide 36 Dimensions 42 Dimensions 50 Dimensions Preheat any outdoor room with the beauty and elegance of these sophisticated stainless steel fireplaces outdoors. Extensive viewing platforms and radiant thermal design provide a clear view of the flame, while keeping everyone cozy. Available in both 36 and 42 inch sizes and with additional stainless steel double-barrelled doors, these Al Fresco outdoor fireplaces are the perfect complement to your outdoor lifestyle! The accessories specification features brochures odsr36a Guide to odsr42a Guide Dutchwest non catalytic wood-burning stoves earn high marks with the EPA for their outstanding emissions performance. In fact, Dutchwest ovens are among the cleanest in the wood-fired furnace industry with emissions of less than 1.5 grams/h! Combine this with a classic style, a strong cast-iron design, great features and efficiency, and you have a wood-burning stove that can't be defeated! Three sizes are available (small, medium and large) to suit any heating need. Large glass front doors allow for maximum viewing and additional convection blower increases the superb radiant ability of heating cast iron construction to deliver heat throughout the house. The specification specification brochure 2477 Small Owners Manual 2477 Small specifications of the Dutch West Catalytic Wood Oven Line has solid cast iron construction for the guality you can see and feel. With three different sizes, you can easily find the right oven for any room size. They start quickly, long burning, and are surprisingly effective. Exactly what you would expect from Dutchwest. Features specification brochure 2460-2461-2462 Owners Manual 2460-2461-2462 Specifications The largest Vermont Castings wood-burning stove available, Defiant also offers the largest unobstructed viewing area, allowing you to enjoy the full beauty of the dancing wood-burning flame. Top-loading for convenience and with an innovative swing of ash pan and lid, as well as a lower heat shield to accommodate standard pad pockets, it's easy to see why Defiant is often chosen not only for its size but also for its standard features. Features spec accessories brochure Resolute recognition from Vermont Castings is all you can imagine traditional wood-burning stove to be. It offers a comfortable top loading or the usual front-loading capabilities, as well as traditional retractable ash. Its polished cooking grill adds a home element to this classic oven and its high high and low smoke emissions make it a modern environmental and economically conscious choice. With an extra sparkscreen, warming shelves and a selection of traditional Vermont Casting colors,

Resolute Recognition is the perfect choice for a cozy and stylish heat source. Features specification Owners Manual specification, Aspen offers the benefits of a larger furnace, but in a smaller, more compact package. In fact, the low height of Aspen is ideal for installing a furnace and the I.R. Coating Ceramic Glass provides a warm, radiant heat, offering a view of the dancing wood-burning flame. With its standard ash pan, top cooker surface and classic black color, Aspen stands head and shoulders over other small wood-burning flame. stoves. Perfect for a house or cottage, Aspen offers warmth and delight from wood-burning even in the smallest spaces. The specifications do not mislead the compact response size, as recognized for its large heating capacity. A terrific way to heat a smaller house or room and still enjoy the sights and sounds of the tree. Clean burning and efficient, it is certainly the answer to draught, open fireplaces. The answer uses a five-way convection chamber to distribute heat evenly throughout the house. The cool room air is naturally drawn around a hot firebox, heated, and returned back to the room without the use of a blower. With a firebox that measures 1.6 cubic feet (more than most other small furnaces), the answer has more burning time with a smaller fire box contains enough wood to heat for 8 hours without restarting and is ideal for space of up to 1,200 sq m. Accessories specification sizes installation surround panel instructions We would say that this oven is big on heat and small in price. Experience the famous Lopi guality and performance in an entry-level woodburning stove that just heats up. The economically priced Republic 1250 was created with the aim of creating an affordable, aesthetically appealing and practical Lopi Woodstove. Features of the Republic 1250 include a large, radiant surface of the plate of the heat track, as well as a convection surface for maximum heat removal. Fully lined ceramic brick fire box, heavy steel structure, as well as the possibility of either steel legs or pedestal, or external air kit. The zone is heated to 1200 sq m. and enjoys 8 hours of heating without restarting. Ideal for heating small houses or zoning heating for or offices. Accessories specification sizes installation Endeavor is a beautiful workhorse that combines shape and function in an unrivalled heat transfer system. Pure burning with warm, radiant heat. FEATURing the largest and firebox of any medium-sized furnace. It suggests cleaning 4 1/4 inches to a combustible surface (the closest cleanup of any wood-fired furnace in the industry). A higher door opening is shown at Endeavor allowing one to load in larger pieces of wood and extend the time grief. In addition, the by-pass shock absorber makes it easier to run and prevents smoke breaks when rebooted. Heat up to 2,000 square feet for up to 10 hours on a single load of wood. Accessories specification sizes Owners Manual large pedestal instructions legs stove instructions door shell instructions not only the most beautiful wood-burning stove we've ever made, it's also the easiest to use. With the top load design it has the largest fire box you can buy in a medium sized oven. And the ash removal system is our most convenient to date. The maximum burn time of up to 12 hours has been achieved with this furnace, which contains an incredible 65 pounds of wood and is heated to 2,000 square feet. This oven includes small guality details in the castings inside and here. A non-catalytic cross-design system, heavy fireproof, incredible combustion and the ability to blow 160 CFM make this oven an easy sell for you. We even included specially designed, extra-long wrought iron poker and gloves for added convenience! Accessories specification sizes Owners Manual rear blower instructions as Lopi wood-burning stoves have been America's favorite choice on fire for over twenty-five years. Our reputation for solid craftsmanship, reliable performance and unrivalled heating efficiency has been a winning combination year after year. With the classic Lopi behavior and the economic price, Republic 1750 is a practical heater designed to heat medium-sized homes and areas in the house. This with a big radiant cooktop surface let the oven function as a slab top as well, perfect for eating soup on those cold winter nights. Nothing heats up like real wood. Enjoy the sights and sounds of a wood-burning stove in these efficient ovens and never worry about being cold in a power outage again! Heated up to 2,000 square feet. Nothing heats up like real wood. Enjoy the sights and sounds of a wood-burning stove in these efficient ovens and never worry about being cold in a power outage again! Accessories specification sizes installation Owners Manual large pedestal instructions rear blower instructions outside airkit instructions legs stove instructions At only 2.6 grams of emissions per hour, Liberty is the cleanest burning large furnace ever approved by the EPA. It is also the largest oven made The large viewing area and cooktop of the freedom surface gives about as much as a wood-burning stove can ever give. Featuring the largest firebox of any large furnace, logs up to 24 inches long can be loaded into a unit. It also has a single control to adjust the adjustment flow, making it easy to reach burn time up to 12 hours. Liberty's turn-based design is charming but functional, providing cooking and warming surfaces as well as radiant and convective heat. Accessories spec sizes Owners Manual large pedestal instructions rear blower instructions legs stove instructions Lopi is pleased to present Cape Cod as the cleanest burning in the world, the largest 3 cubic feet firebox, cast-iron oven in the world. Cape Cod has enhanced craftsmanship and lopi style as well as cutting edge Hybrid-Fyre technology. The combustion with catalytic assistance is what creates this unique and ultra-efficient Hybrid-Fyre technology. The Cape Cod furnace produces just 0.45 grams of emissions per hour, which is significantly lower than all other high-power wood-burning furnaces. And at more than 80% effective you will get more heat from less wood saving money on your heat bill. Cape Cod is unique in cast-iron wood stoves, as it has a full convection chamber surrounding the fire box. The air of the room is drawn through the back convection chamber then spread through the convection channel where it is heated. This hot air is then expelled from the upper convection chamber (large, cast-iron, heat sink with decorative lopi detailing) through the natural convection of temperature increases in the room. In addition, the additional high performance 400 cfm fan pushes convection air through the oven significantly improves the transmission of heat and air circulation to the room. The oven lattice allows the ash to fall into a large container, easy to open ash ash...
