This note looks at how transformational periods usually unfold. It then examines how the core strategist's tools can be deployed during such periods and how new tools come out at first will stand. Periods of transformation of the industry pose a serious threat and huge opportunities for companies. Industry leaders are often unseated at such times, replaced by outsiders and entrants. Perhaps most importantly, periods of transformation give companies the unusual freedom to influence the future structure of the industry. Training goal: Designed to support training modules that view strategy in the face of uncertainty or the intersection of competitive strategy and technology. Related topics: Newsletter Promo Summary and excerpts from recent books, special offers, and more from the Harvard Business Press Review. World tech leaders share how they motivate their teams and create environments that make employees want to stay in their companies. You are reading Entrepreneur india, India, Entrepreneur Media franchise. Housing.com has been making a lot of noise lately. A few months ago, he even decided to close his short tenure, land and commercial real estate business. Major cities became a target when they stopped working in small towns. Now she has decided to continue to streamline her business. The focus will be on buying and selling homes and all other verticals like listing, leases, PG, hostels, etc. will be reduced. Top management is delighted with the potential impact that its solutions will have for both developers and consumers in the near future. Jason Kotari is the newly appointed chief executive officer of Housing.com who intends to reorganize the company with this new focused strategy and expects to cut the workforce too. Over the past few months, the company has revised its core business. Now, the goal is to generate revenue and build an advertising business. Its competitors are well-established names like 99Acres and MagicBricks so the focus will be on making its presence felt in this space. In addition to Kotari, other people who have joined the startup in the recent past are Mani Rangarajan, CFO; Abhishek Hota, Chief of Staff; Nikil Rungra, Marketing Director, and Nandini Mehta, General Counsel. Do you have a message in your heart that you need help getting into the world? Do you have a calling, a vision that you want to articulate with more power? Do you want to learn how to express your inner intentions in a way that communicates effectively and at the same time motivates people to act? Then I have a book for you: Transformational Talking - If you want to change the world, tell the best story to Gail Larsen. This is not an ordinary book but an alchemical read that will transform your relationship to your voice through the deep excitement of your soul. Larsen combines her personal ideas - she is a former executive vice president of the National Association of Speakers - with a distinctly spiritual approach to help you explore and uncover your most compelling material. It also provides valuable execution recommendations. From her point of view, technology always flows into the internal resource from which your true me comes. Gail told me recently, I was working on the structure of the book so it doesn't start with tools and techniques. As long as we do not do internal work, it is difficult to show in general and confidently. While this work takes some time and investigation, I think it is absolutely necessary if we are going to bring completeness to who we are on the talking platform. So I started the book by stopping at the heart of a transformational speech that is literally in my heart. I have found a huge resource in the teachings of indigenous peoples, and I share them in the book. I am these concepts, like original medicine, are so useful to people. As soon as someone can put their words around basic momentum and stand in their power, they are less likely to shrink when they take the stage. I teach a creative process that allows what we care deeply about come up naturally. Then it might surprise us! The material that we have yet to make conscious is often the best that we have to give. Great talk to me not out of dictation from old thinking. Instead, it allows life to move through us, to speak not only of what we have prepared, but also of trusting what arises at the moment. Gail emphasizes what is rarely talked about - an internal resource that informs our words, our actions. Her book is less about technique and product. It's much more about how to learn how to use an inner source of creativity that gives expression through the spoken word. If you are looking for a journey that leads to a better expression from the platform, or anywhere else you happen to stand, this book is your ticket. Seth Kahan (Seth@VisionaryLeadership.com) is a leadership change specialist. He has consulted with the leaders and leaders of more than 50 world-class organizations, including Shell, the World Bank, the Peace Corps, Marriott, Prudential, the American Society of Association Leaders, the International Bridge Tunnel and Turnpike Association, the Institute for Project Management, and NASA. He is the founder of the Seth Kahan CEO of the Leadership Forum, a year-long training experience for executives in Washington, D.C. His next book, Getting Change Right: How Leaders Transform Organizations From within, will be published in the spring of 2010 by Jossie-Bass.
