Video Sharing feature uses a standard that facilitates the process of viewing digital electronics and makes them more convenient for use on the home network. This standard allows you to view and play photos, music and videos stored on a media server connected to your home network.1 Server installation Audio Video Sharing feature cannot be used if the server program is not installed on your computer or if the necessary media server software is not installed on the companion device. Prepare a computer with a proper server program.2 Connect to a wired or wireless network See the heads of wired/wireless communication for details of the configuration.3 Include audio video sharing enter settings Play shared files through Media Browser Highlight the AVS option in the Sources menu using referral buttons and click OK. Available media server devices on the network will be listed. Choose one and click OK to continue. The media browser will then be displayed. For more information about file playback, please visit the Media Browser menu section. If you have a network problem, turn off the TV on the outlet again. Trick and jump mode is not supported by audio video sharing. PC/HDD/Media Player or any other compatible devices should be used with a wired connection for higher play quality. Use a LAN connection to quickly share files between other devices, such as computers. Note: There may be some PCs that may not be able to use the audio video sharing feature because of the admin and security settings (such as a business PC). AppsYou can access apps installed on your TV from the Apps menu. Highlight the app and click OK to run. If you continue browsing without changing your settings, we'll assume that you're happy to get all the cookies on this Toshiba site. You can also Continue to take our policy in your browser so that this message does not appear in the future. Of course, you can change the settings of cookies at any time with browser settings. Details of our cookies and cookie policies are available here. Please find a selection of frequently asked questions about our TVs below. In: Did my HDMI TV come? A: Our TVs don't have AN HDMI cable. In: How to access the Internet portal on my smart Toshiba TV? The Internet portal button is the home button on the Toshiba TV remote control. What external sound connection should I connect to my Surround Sound system? Digital audio output is either via Coax, Optical or Audio Return Channel (ARC) outlet, which will connect to a suitable audio amplifier. A: Can I mount my TV wall? All of our TVs are compatible with the VESA wall mount. Each TV will have a different type of screw, which will depend on the size of the screen. In: Can I transfer content from my mobile device to a Toshiba TV? For all TVs supporting wirelessly, the wireless display will allow you to stream content directly to your Toshiba TV. (Note: iOS devices are not supported). Can't find the answer to your questions? In order to help you further, we will help you in finding a solution for your device. Please use your model number to start your request. Yorkshire Multi-Media Services (CP) (Unit 3), Spencer Business Park BRADFORD BD4 9NW y.mms@hotmail.co.uk Austria B and S Videotechnik Vertriebs- u.
