With Android smartphones and tablet specs getting better and faster, now playing Nintendo Wii games on Android is possible. Here's how you can play Nintendo Wii games on Android. What you need to play Nintendo Wii on Android 1) Dolphin Emulator AndroidPriceFREEOSAndroid 5.0 (Lollipop) - Uplinternet Connection RequiredNoDownload LinkGoogle PlayStore Link 2) 7 Cipper (optional) It's optional. As long as Nintendo Wii games are already in ISO or WBFS format, then you don't need it. AndroidPriceFREEOSAndroid 5.0 (Lollipop) - Uplinternet Connection RequiredNoDownload LinkGoogle Link 3) Bluetooth controller (optional) In case you can't really play with the virtual button display, you may want to consider a Bluetooth controller. Not only are the buttons more responsive (of course the mechanical buttons are against the touchscreen), but using the Bluetooth controller will also free your screen from your hands - the full game is shown! There are many shapes and form factors, but here's mine: IPEGA-9083 - the latest retractable controller from IPEGA that can fit up to a 10-inch tablet. Retractable Bluetooth Controller - Great for playing Nintendo Wii on Android Here's the Amazon link if you need to get it. LifeTechHow-ToPositive Cash FlowAndroidTravelAll articlesiOS and iPhone Here's how to play Nintendo Wii games on Android 1) Set the Dolphin Emulator Download link above. The minimum requirements for running a Dolphin emulator on your Android are these: a) Run Android 5.0 or with a 64-bit processor b) 2GB of RAM if you're unsure of the phone's specification or would like to try your luck, just download the emulator and try to run it. 2) Set 7-sipper (optional) Download the link above. You only need to install this in case you need to extract ISO/ROMS games if they are stored in .7z. 3) Get ISO/ROMS Download games ISO/ROMS is illegal, so I can't share anything here. But that shouldn't stop you from playing The Nintendo Wii on your your So there are 2 ways here: a) Reset the game yourself that requires you to have a Nintendo Wii and games. Based on the recommendation given by the creator of the Dolphin emulator, for dumping games with the Wii, you want to install a homegrown channel and launch an app like CleanRip. b) Google around and download from the internet, as I said, I can't stop you from downloading games from the internet. Searching yourself, you can find one or two links. Dolphin emulator supports the following format of games: GCM/ISO (non-waste dumps, must be 1.4GB for GameCube games and 4.7GB for Wii games) C (Dolphin can be used to compress your games in this format) CISOWBFS (not supported in Dolphin 3.0 or earlier) 4) Connect The Bluetooth controller (optional) If you have a Bluetooth controller like me above - IPEGA-9083, you can pair it with Android. Here are the steps. The steps below may be slightly different from yours - depending on your version of Android. a) Go to Android Settings and then find Bluetooth. b) Turn on Bluetooth ON. I use the IPEGA-9083 Bluetooth controller with) Now go to the Bluetooth controller, turn it on in pairing mode. d) Back to the Android screen, still in the Bluetooth settings window, go and find the Bluetooth controller and click on it. (e) Once the pair is done, the Bluetooth controller LED lights will usually stop blinking. Try to press a few buttons to make sure it's paired correctly. 5) Run the dolphin emulator Tap the dolphin emulator to start. But before any games actually work, you first have to set up a few things. Set up a dolphin emulator (MUST-DO). a) Click to 3-points at the top right top of the screen and click on Gamecube entry b) Make sure that all Gamecube input 1-4 is all disabled in) Click on 3-points again at the top right of the screen, this time click on the Wii input g) Make sure to turn on the Wii Remote 1 as a emother (if you have a real Wii Remote) and disable the Wii Remote 2-4. Now, if you use a Bluetooth controller and pair it, click on the Wii Remote 1 as a mimic and then click on the extension. Choose a classic controller and start displaying the buttons. Click the Wii button then press the right button on the controller. Repeat for all Wii buttons. Once the settings are done, now is the time to play The Nintendo Wii game. Here's how to play Nintendo Wii games on Android. a) Inside the Dolphin emulator, click on the Wii tab. b) Click on the I button to select the iso/ROMS catalog game. c) After selection, you'll be able to see all your Nintendo Wii games inside the catalog. d) Choose any game and click on it. If the game runs on a dolphin emulator, you'll soon see the Nintendo Wii launch screen. If not, it's likely that the dolphin emulator doesn't really fully support it. You can visit list of dolphin emulator compatibility here for a full list of games that are compatible with Enjoy playing Nintendo Wii games on your Android! In case the steps here aren't clear enough, probably you'll want to see a YouTube video here at TheHackSpot let me know if you have any difficulty in setting everything up to be up and running. And let me know what you think of the dolphin emulator. Do give your comments and thoughts below. Cheers! Find more interesting topics on JILAX'ONE: FREE!
