The specific story here is not spoilers, players or personally experience more interesting. In the game level, to put it simply, players will use the latest and most powerful weapon to kill from zero to the tail. CCP has 12 levels that can be closed for 10 hours in plain mode. Kill the enemy there are three main ways: long-range shooting, hand-to-hand combat, the use of auxiliary weapons. Remote Is a fundamental game, players can dozens of functions, firepower of different types of weapons to switch between them. When the player is closer to the enemy, the system automatically switches to closing mode, clicking on the bottom right corner of the dagger can start a bloody murder. Auxiliary weapons play also comes from on-duty, unmanned vehicles, machine guns, air strikes and other auxiliary combat techniques enriched the content of the game. The game is interspersed with many slow motions, in some special scenes you need to slide across the screen to perform some actions, such as fighting, melee, also enriched the gameplay. The two-line character set is made for a basic bright spot. Players in the game need not only to play the heroic salvation of the President of the United States, but also to play the head of the terrorist organization Paige. This setting allows the player to better understand the history, even if you do not understand English, but also to understand the essence of the game context. It goes without saying that the pleasure of one person decorating two corners also means that the player can experience the pleasure of the game, even if the evil spirits are replaceable. Character modeling, environmental modeling, depth of field, lighting, color, detail, each of the visual effects gives a sense of realistic and shocking. The huge amount of rendering depending on the location of the light gives an exciting feeling of immersion, and the placement of sunlight affects the distribution of brightness throughout the environment, something that is otherwise unimaginable in other games. The effect of smoke is bright. Whether it's smoke caused by the arson of a building, or the black fog generated by an airplane explosion, it radiates a strong sense of reality. It seems that you can smell the suffocation of a pungent smell after seeing the picture. Realistic firearms, blood that bullet pierces the enemy's jet, or shards of other items, all send a message to the player - you are on the battlefield. The realistic consequences of the environment, jungle or beach, military bases or building buildings and reality are the same, the proportion of buildings, trees, people, articles just right, without any sense of incompatibility. The effect of death is realistic. The game uses the physical and technical engine Havok and creates a natural sense of death, which means that the enemy will not immediately fall on impact, and will make a series of painful moves. Players will appear after firing bleeding, red blood flowing down from the screen, the player will subconsciously find a place to avoid bullets. Background sound, the game is a lot of effort to make the whole mic environment appear real. The plane whistled past the sky, giving the player the feeling of flying overhead. Executive orders, enemy cries, headquarters tasks instructions all using live Full cinema. Environmental music is wonderful, each scene has its own unique melody, played a role in the plot.
