Here are just a few reasons it's annoying: whenever you hit a moving block that is on the ground, you have to restart the entire level and it gets really boring trying to beat the same tower over and over and over again. Once you get to level fourteen adds get very common, I mean every time I hit the wrong block to add pop-ups, I don't mind adding if they're short, but the ones I get for at least a minute. Here's all the reasons that it's fun: I like that it's unique and how satisfying it is to knock the layers down with the balls. Here are some tips that I have for the game: they give us gems, but nothing to do with them, so I would like if they added something to do with the gems that you earn. I'd like the game to do it so that there's an AFK button or a pause button. I would like the game to do it so when you die you don't have to fight the towers you've already won when you die. I would also like if the game did some VIP where you get something, if you join the group, I thought maybe they could call it Ball Shooter Plus. Once you download the APK of this Android game, you will come across a colorful three-dimensional title that you can only play with one Destroy the tower with a cannon That's your only goal. You will come through the tower in every level that you have to destroy by shooting shooting On every floor. Each tower has blocks that revolve around it, trying to protect it, and we have to avoid them all that is needed. At the top of each tower hides a gift box or gems to be collected. And that's it. Level by level, obstacles will move faster and faster and change directions, so destroying the tower will be more difficult. If you try it and enjoy the game, you can remove video ads between the game and the game and the lower banners by paying a few dollars. This will allow you to play more comfortable and contribute to the development of more VOODOO games. Games.
