turbine windmill, electricity window glass, house wine fruit, alcohol Wire electricity, metal witch man, broom /magician, broom wizard man, energy wolf dog, forest/wild animal, moon/wild Animal, dog tree tool, wood wood, wood, oatmeal, tool/scissors, sheep, zombie corpse bacteria, life The following elements no longer appear to be maintained, but in due course can be created using the game's app version that was offered through Pokki They are not counted in the current total, shown in other versions of the game. As a result Element Ingredient Combination (s) Atomic Fireballs Atomic Bomb, Fire Cadbury Eggs Chocolate, Egg Caramel Apple Garden, Caramel Caramelo Chocolate, Caramel Chocolate Milk Chocolate, Milk Chocolate Willy Wonka, River Cookie Dough Dough Dough Cotton Candy Sugar, Electricity Frozen Yogurt Cold, Yogurt Fun Dip Sugar, Sand GoldFish, Cheese Guinness Float , chicken Pokki computer, protein Pop Rocks stone, explosion of Red Vines sugar, Wire Ring Pop Diamond, Sugar Skittles Rainbow, Sugar Starburst Rocket, Swedish Fish Fruit, Sugar Sweet Love, Sugar Twix Caramelo, Willy Wonka Engineer' Cookies, Sugar Think of Prevailing Scientific Theories, How The Earth Is Formed, and That You Most Of the Planet Is Made up of Lava, which is cooled to the rocks, and the most different rocks are the result of the Water is also a critical factor, as over time it can break down different materials. If you can get some basic ingredients created, you can combine them intuitively to produce all sorts of neat combinations in Little Alchemy. Click on the created object as you combine the two elements and hold the mouse button for a moment. You will produce a tool tip that lets you know which two items you have combined to create this particular combination. If the item on the list is highlighted, it means you can't combine it with anything else to create a new item. One of the first combinations you have to make is air with air (or earth and earth) to form pressure. Air plus fire create energy that is extremely useful and even allows you to produce electricity (when you combine it with metal). Air plus pressure creates an atmosphere and there are different weather conditions that you can create from there. Water and land are mixed to produce dirt, which can be combined with fire to produce bricks. If you instead combine dirt with sand, it produces clay that you can combine with fire to produce ceramics. The game is full of similar combinations, which give slightly different results and open new options. Be sure to check the result regularly if you combine two of the same elements. One example happens if you combine the brick and brick that produces the walls. Combine the wall and the wall to make the house. Combine a house and a house to make a village. The village and the village make the city. Look for similar chains elsewhere. Combine rain (air and water) and land to produce a plant option that expands your choices greatly. You can combine plants creatively to produce ponds, swamps and For beginners. There are more than 500 combinations available and there is no penalty for learning any concept you can arise with you. Some interesting interesting resulting in a mix of obvious components found in the world around you. Some results are quite abstract, such as time itself. If everything else fails, just try the random combinations until you get something new and exciting. Before you know it, you will open up all sorts of new ways to succeed. Most of the game's achievements are related to the total number of combinations found, but there is one exception. To unlock the achievement of Is This Just Fantasy, combine the ring (which is made by mixing diamonds and metal) with the volcano (which is created when you mix lava with the ground. little alchemy 2 guide human. little alchemy guide how to make a human
