Abbey, Edward. *Monkey's wrench gang*. Philadelphia: Lippincott Williams and Wilkins, 1975. The Monkey Key Gang is concerned with the use of sabotage to protest environmentally harmful activities in the American Southwest. The abbey's most famous artwork is the story of four environmental warriors liberating parts of Utah and Arizona from evil road workers, miners and redheads. The book fueled a new generation of angry young environmentalists (such as Earth First!) who practice agonizing monkey or sabotage for the sake of protecting wildlife. The book was so influential that the term monkeywrench began to mean, in addition to sabotage and damage to machines, any sabotage, activity, law-learning, or violation of the law for the preservation of wildlife, wildlife and ecosystems. (Text adapted from Wikipedia, free encyclopedia and Abbeyweb.net.) *Monkey Wrengues Gang Edward Abbey (1975)* French name: Le gang de la Cle Molette. Translation: Juak Maiphos. This book, though fictional in form, is based solely on historical fact. Everything in it is real or actually happened. And it all started a year later. Edward Abbey. Wolf Hole, Arizona. This mysterious edward abbey quote is the first thing you read when you discover the Monkey Key Gang. Abbey (1927-1989) was an American writer and environmentalist. He recounted his experience as a seasonal park ranger in Arches National Park in the 1960s in an autobiographical book, *Pasert Solitaire*. Monkey key gang is set in desert areas of the American Southwest. Think Arizona, New Mexico and Utah. It was published in 1975 and remember that the city of Page was founded in 1957, the Glen Canyon Dam on the Colorado River was opened in 1964, and that Lake Powell was the result of this dam. All these designs are fresh in the memory and make news when Abbey wrote his novel. The region is changing rapidly with the development of tourism, the construction of interstate and other huge engineering works. The monkey key gang refers to the fast-paced path of four poorly assorted environmental activists. Or at least that's what we'd call them now. Dr Sarvis, Bonnie Abzug, George Washington Hajduk and Rarely Seen Smith joined forces to sabotage machines, bridges and structures to slow down roadworks and construction sites in natural locations. They cannot bear the scars that these human works do with the natural landscape. But who are they and how do they form this revolutionary group? Dr. Sarvis, Doc, the surgeon from Albuquerque. It's his day job, but at night, with the help of his girlfriend Bonnie Abzug, he burns a billboard along the highway because they spoil the view. Bonnie is a Jewish young woman from the Bronx. She is a feminist, exploring her sexuality freely and in rebellion against her upbringing. In other words, Abzug at war with the with myself and my family. She loves the adrenaline of her mission and she follows The Dock around. She is much younger than him, and their relationship suffers from this because he expects to be dumped at any moment. He introduced her to environmental sabotage, and she found a reason to take in this fight against the system. Despite their illegal activities, Dok and Abzug remain active members of society. Doc is still a surgeon, and his profession is profitable enough to finance his clandestine activities. He's an operation banker and a closed anarchist. The cover of the original Hayduke edition is a former green beret from the Vietnam War. He suffers from post-traumatic stress disorder, his days in Vietnam haunt him. He is well trained and able to survive in difficult conditions. He knows how to manipulate explosives, thanks to his time in the army. He knows all the tricks to make secret missions successful. But his character is volatile, very flammable. He swallows beer as if it were water. He loves firearms and carries an arsenal. He despises all kinds of power. He is an outsider, unpredictable and scares others. He has nothing to lose, and this makes him dangerous, even in the eyes of his accomplices. And he's sexist and acting like an off. He is a lonely man who loves hiking, spending time in the desert. Rarely seen Smith is a Mormon. He lives in Utah and has three wives in different houses. They rarely see him, hence his nickname. He works as a tour guide in the area and he knows this very well. Smith is based on his wives. He has houses to return to, his life is there, in these mountains, in this desert, and he has much to lose if something goes wrong. Three men have additional skills: one can bring money, one knows the ground as the back of his hand, and the other has organizational and technical knowledge to make their missions happen. Abzug tags together, but is still an active participant. She also has the classic role of a femme fatale. Four of them met when Doc, Abzug and Hajduk booked a tour with Smith. They share a common hatred of all the destruction of nature in the region; roads, dams and mines are their targets. This group of losers finds common ground in their protest against the destruction of nature, to build dams, to exploit the soil or to drive faster on the autobahn instead of using Highway 66. This team, which sometimes struggles to work together, engages in a dangerous run against the clock to destroy as many machines and roadworks as possible before they are caught. Their only limitation is that no worker should be injured or killed as a result of their sabotage. Abbey takes us on an exciting journey with this quartet of self-made activists. Monkey Key Gang has something westerns, and cartoons, which means that the suspension of faith is necessary to enjoy the ride. Hajduk and Hardy, the character invented by Dwayne Swierczynski in the Charlie Heeley trilogy, seems to have a connection somewhere in their league tree. They have crazy survival skills like the Road Runner and Wild E. Coyote episode, and they run away from the law. In the abbey's book, Bishop Love, local law enforcement is in compliance. He is like a villain in a cartoon, the godfather of the mafia with a court henchman and a lot of means to track down our quartet of natural vigilantes. The abbey knew the region very well and it shows in its magnificent descriptions of the landscape. I was in the area, and although I stayed on the tourist tracks, the abbey's words brought back memories. Instead of writing an essay or a pamphlet, he wrote this indescribable novel, full of fervent condemnation of the irreversible damage that humanity inflicts on nature in the name of progress. And forty-four years later, look where this has brought us. The abbey managed to write a revolutionary and playful book at the same time. This is a book that stays with you for a long time after you've read it, probably even more these days, with the entire state of our planet. The abbey loved the region and wanted to fight for it. He loved him so much that he asked to be buried in the desert, and no one knows where his grave is. He returned to the wilderness and thirty years after his death, his books are still relevant and fun. It is highly recommended to all, but especially people who intend to visit the area. B2After the life of Hajduk! Monkey wrench Gang is a novel by the American writer Edward Abby (1927-1989), published in 1975. Easily the abbey's most famous artwork, the novel deals with the use of sabotage to protest environmentally harmful activities in the South West United States, and was influential that the term monkeywrench has come to mean, in addition to sabotage and damage to machines, any sabotage, activity, legality, or violation of the law for the conservation of wildlife, wildlife and ecosystems. In 1985, Dream Garden Press published a special edition for the 10th anniversary of the book with illustrations by R. Crumb, as well as a chapter called *Seldom Seen at Home*, which was removed from the original edition. Crumb's illustrations were used for a limited edition calendar based on the book. The last edition was released in 2006 by Harper Perennial Modern Classics. The plot summary of the book's four main characters are the eco-minded losers-Seldom Seen Smith, Jack Mormon River Guide, Doc Sarvis, a strange but rich and wise surgeon; Bonnie Abzug, his young Jewish feminist assistant, and a rather eccentric Green Beret Vietnam veteran, George Hayduke. Together, while not always working as a close-knit team, they form a little group dedicated to destroying what they see as a system that pollutes and destroys their environment, the American West. As gunn attacks on deserted bulldozers and trains continue, the law closes in. The 10th Anniversary Edition (1985) from The Garden press of the Dream Garden, with illustrations by Robert Crumb For Hami, an enemy of those who would greet the American southwest-despoiling earth, befouling the air, and destroying the nature and sacred purity of the abbey desert world. Their biggest hatred is focused on the Glen Canyon Dam, a monolithic building made of concrete that tormented monkey's seek to destroy because it is a dam of a beautiful wild river. Reception from the National Observer: Sad, funny, exuberant, vulgar fairy tale... This will make you want to get out and blow up the dam. This quote needs to be quoted From The New York Times, Since the publication of the Monkey Key Gang, Mr. Abbey has become an underground cult hero. This quote needs to be quoted from The Washington Post, one of the best writers to deal with the American West. This quote needs to be quoted from the Houston Chronicle, What a Thing of Beauty by Edward Abbey's Monkey Key Gang. This quote needs to be quoted Legacy is a monkey wrench and a stone hammer on the Earth's first logo! In his book *Wint Unto Others*, George Hayduke claims that Edward Abbey was his mentor, and mentions the Monkey Key Gang as the origin of the term monkey excruciatingly. Hayduke says the Monkey Key Gang inspired ecologist David Foreman to help create Earth in the first place! It is an environmental direct action organization that often promotes much of the petty vandalism depicted in the book. Many scenes of vandalism and environmentally motivated chaos, including a billboard burning at the beginning of the book and the use of catpotes to elude a group of vigilantes, are presented enough detail to form a skeletal how-to-for-for Saboteurs. The action is presented in a larger-than-life format because much of what Hayduke and the rest of the characters in the story face more than life obstacles that require larger-than-life approaches. The symbol of the Earth Liberation Front is a wrench and a hammer. In his book *Canaline, Gas and Electric: Public Works Trilogy*, author Matt Ruff notes: One of my other literary inspirations for the subplot was Edward Abbey's Monkey Key Gang. This is the book hero, George Hayduke, is a Vietnam vet and former prisoner of war who launches a campaign of sabotage against the pollutants that destroy his beloved southwestern desert. Hajduk is a pretty angry guy, but he also loves life, and in his own fatalistic way he remains optimistic (my favorite line in the novel, uttered at the moment when Hajduk's luck seems to be over, is when the situation is hopeless, nothing worry about). The Hajduk sequel *lives!* continues the story from where the Monkey Key Gang left off. Film, TV or theatrical adaptation This article should be updated. Please update this article to reflect recent events or newly available information. (September 2015) In 2012, the film adaptation of the book was planned, directed by Henry Joost and Ariel Shulman. The film's rights holders filed a lawsuit against the producers of *Night Moves*, accusing that the plot of the film is significantly similar to the history of the book.
