WHAT NEW - Further Search Improvements We Have Introduced New Arab 1Yr and Arab layouts with the best interval and key placementApp Information: App name : Firefox Browser fast : name of private package : com.touchtype.swiftkey Developer: SwiftKey Update on Play Play :February 28, 2019 Version title and code: 7.2.3.34 Download SwiftKey Keyboard 6.7.3.28 APK Pure Latest version. The keyboard is important on a device such as a smartphone and laptop. Today, most of the smartphone is in touch mode, so when you enter on the screen you need to click. The basic keyboard may not be enough due to limited capabilities. There are many virtual keyboards for your smartphone, but you should try the SwiftKey keyboard of the latest APK 6.7.3.28 (820183490). Why do you need this app? It's more than a typing keyboard, and it has a function to correct spelling and grammar from many languages. Also, you can get the right word because the keyboard learns about your writing style and conversation. More themes and colors create an attractive and impressive look. This app is very useful as a replacement for the standard keyboard on your smartphone. SwiftKey Keyboard File Info Developer: SwiftKey Version: 6.7.3.28 (820183490) File size: 35.1 MB Downloaded: December 8, 2017 at 10:57AM GMT-07 Requirement: Options with MD5 device: e5074d9f001718f8a26baa4fb67d819b SHA1: 9629e1ac0c7090f397b3257eaa62abd09f72 Download SwiftKey Keyboard APK 6.7.3.28 Swift Keyboard Review Main Purpose when installing keyboard autocorrection app. You don't want to send messages or communicate with the wrong words and sentences, do you! Autocorrect is the main feature in this app. You can choose any language to correct word by word. In addition, this app will add space automatically after one word has already been selected as correct. This is a very convenient feature along with recognition of the style of writing. You can type certain words every time and this app recognizes them immediately as your writing style. This is one of the advantages of the keyboard side from the standard or main. When you send a message or chat, you need a smiley face to express a feeling or situation. Tons of emoticons are available in this app. Smiley is also ready automatically because it's part of writing style recognition. You can access this emoji right away on the next area while typing. This app predicts what you need for the next word and then adds the right smiley face. Recognizing emoticons and writing an app requires permission to access messages and chat history. The basic keyboard on the smartphone is simple without a personal theme. You get more themes and colors, as well as using the SwiftKey keyboard for Android. Simple and flat design is no longer a problem because all themes are free to use. You can change the look of the keyboard according to your personal preferences. An individual theme is a good thing to have, especially for Android users. Get a new style every day. In addition, more languages are available to meet the needs of users from other countries. Pros: There is excellent auto-correct and recognition of the style of writing. More emoticons, themes and colors. It provides a swipe mode for input. More than a hundred languages Cons: Full smiley is only ready for Android 4.1 or above. How to use the app This app works properly for the new version of Android. Make sure you have a recent version of the system to prevent unnecessary problems. Activate and install this app as the main keyboard for everything you want to type on your smartphone. Then choose a language preference to use the automatic correct mode. Give permission to access the story to recognize the style of writing. When the basic setup is ready, the next thing is to type for a chat or send a message. Smiley and words will be displayed automatically based on chat history and preferences. You can also disable auto-correct and choose a different language. Change the theme and color on the menu and then activate it. You'll see a different look when the keyboard is on the screen. ChangeLog Introducing 'Fast Pasta' - copied text will appear right on the prediction bar for easy and quick insertion Now you can enter in the following languages: Chamorro, Ju 'hoan, Lisu, Palauan, Piedmont, Sardinian and Scots We have added new layouts for Narat and VEGA Accessibility Improvement - we have made it easier to long click when using the study to touch you views the old version of the keyboard SwiftKey. Here you will find THE APK files of all versions of the SwiftKey keyboard, available on our website, published so far. Latest: Version:
