April 30, 2020 Amazon We said it once and we'll say it again: When it comes to keeping your home clean, it's all in detail. With regular cleaning and maintenance, your home will always feel fresh and well kept. Don't know where to start? Check out our guide on how to clean almost everything in your home. It even includes tips on how to tackle some of the most complex cleaning projects, how to remove carpet coffee stains and how to clean your trash. If you're looking forward to spring cleaning this year, start with tough stuff, but reveal some time for seemingly trivia, too. Cleaning the solution used on tile countertops is an easy way to make your kitchen shine, and cleaning down floors in your bathroom will have your bathroom tiles looking squeaky clean. We scoured the web for the best solution cleaners on the market and share our best recommendations for solutions that will actually get the job done. Some are professional strength, and others are instructions that are a little easier to navigate, but whether you choose a pen or a bottle of spray, we have the feeling that there is at least one product on this list that will help make cleaning the solution much easier. 1 in 10 Black Diamond Ultimate Grout Cleaner Is a bold statement to refer to itself as the ultimate cleaner solution. But with over 1000 5-star star reviews on Amazon, this spray makes a very good case. 2 out of 10 Rejuvenate Grout Renewer Pen amazon.com This pen removal solution not only makes the faded white solution look intact, but it also seals and protects the material from future damage. Let's talk about a win-win. 3 out of 10 Grout-E'E' Professional Power Grout Cleaner When you doubt, enlist the help of this heavy, professional-strength cleaner. It even comes complete with a stand-up head brush, so you don't have to do any cleaning on your knees. 4 out of 10 Goo Gone Grout and Tile Cleaner Is There Anything That Goo Gone Can't Remove? Their mortar and tile cleaner destroys the hard stain of the solution and is safely used on porcelain and ceramic surfaces. 5 out of 10 Marblelife mold and Mildew Remover Grout may have sometime been discolored due to mold, mold, algae and fungus. Make sure the stains are not left with this mold and mold removal spray. 6 out of 10 Grout Pen rainbow chalk markers Featuring antibacterial agents to get rid of mold, this pen removal solution is also available in a variety of colors to perfectly match your floors. 7 out of 10 Marble Marblelife and Travertine Cleaner Nervous about cleaning the solution between the marble tiles? This one Without strips does not have any harsh chemicals, making it safer for natural stones. 8 out of 10 Mapei Grout Update this is it The treatment instantly removes years of dirt accumulation and comes in a variety of colors to match the solution in your kitchen or bathroom. 9 out of 10 Black Diamond Natural Stone Sealer protect your solution against mold before it appears. This granite seal is designed to protect your solution from water, coffee, wine, fat and ink. 10 out of 10 Granite Gold Grout Cleaner and Brush Deep Clean and restore the natural proteins of your solution with this gold bottle that comes with a non-abrasive brush for a more effective cleaning. According to DIY family experts Handyman MagazineYou can also sniff: TBDVideo: Removing GroutSimplify tiles ceramic tile removal solution using a carbide-grit blade in a reciprocal saw or oscillating tool. Both speed up this tough, tedious job of removing the solution. How to remove Grout with DremelPhoto 1: Strip away the old caulkSlice through an old plug with a oscillating tool and scraper blade. Then remove the remaining seal marks with the razor blade. Photo 2: Remove the groutTurn on the water to get a light spray. Then the center of the oscillating blade of the instrument in the middle of the solution line. Dip it in the solution and slowly press the blade forward to start removing the solution. If you have a solution that is stained or moldy, you may get lucky and find that cleaning chemicals can handle this problem. Skip traditional solutions such as vinegar, bleach and baking soda, although they don't work nearly as well as a powdered oxygen pure mixed into a paste (OxiClean is one brand). Or try commercial solution and mold elimination products from the home center. If the chemicals work to remove the solution, great. If they don't do that, you'll have to remove a layer of old mortar and replace it with a new one. After the chemicals failed for me, I tried everything else: a grout removing the mount for my rotary tool, a blade removing solution in my mutual saw, a pulsating tool with a triangular carbide bit, and a tool that looks like an electric engraver with a chisel tip. All of them either destroyed the tiles or were painfully slow. In addition, they all climbed the dust storm. I finally figured out the easiest and fastest combination for a work-oscillating tool equipped with a diamond blade (about \$10). One source of oscillating diamond tool blades is fitzallblades.com.You will need at least two diamond blades depending on the size of the work. Work. also need a scraper blade for your oscillating tool (e.g. Dremel MM610 Multi-Max flexible scraper available through our affiliation with amazon.com) to scrape shut at the interior corners (Photo 1). Next, you should make a cooling system for a oscillating tool. I built a mine out of inexpensive drip irrigation parts (see Build the cooling system below). As you work with water, connect the tool to the nearest GFCI-protected outlet. If you don't have one, buy a GFCI-protected extension cord. Don't do this project without GFCI protection. Then remove the solution (Photo 2). Your goal is not to remove all the solution- only about 1/8 inch deep or so. Make a few light passages until you reach your preferred depth. It will be deep enough to embed a new solution. Once you've done the grinding, clean the tile and let it dry before applying the new solution. The necessary tools for this Grout Removal ProjectHave are the necessary tools for this DIY project lined up before you start-you will save time and frustration. The oscillating tool with diamond blade and blade scraper IsRectried Materials for this Grout Removal ProjectAvoid last minute shopping trip, having all your materials ready in advance. Here's the list.1/4-in. Drip irrigation tubeElectric tapeGarden hose adapterhook and loop ribbon circle sprayValve Carrie Waller Carrie Waller, founder of lifestyle and crafting blog Dream Green DIY, has mastered the art of strategic color. Ever since she began cataloguing her designs in 2011, she's used a whole range of shades to play everything from the front door to the photo frames. But if there is one often overlooked place where she would like to see more shades on display, it is a tile mortar. We forget that the solution is just as important as the tile of choice, she says. Grout has the unique power to make otherwise boring tiles really pop into space. You can experiment with a complete kaleidoscope of tiles, and these colors can be used to distinguish between other design options such as texture and shape. Ignoring this opportunity is a missed opportunity. We end up spending so long trying to choose the perfect tile that all our energy is wasted when it comes time to choose a solution to go with it, she continues. My advice is not to leave your choice of solution until the last minute. Choose it the same day you choose the tile because a bad choice of solution can end up ruining a good selection of tiles. Mint ImagesGetty Images To make this process less intimidating, Waller breaks down what you need to know about choosing a high performance color solution, how to test it, and the best way to apply it. Follow her example, and this detail can Your new favorite feature of your bathroom or kitchen. Thinking about, testing, and applying Grout ColorsPick to a free sheet of solution color. If you spend time in home improvement stores On the tiles, you've probably noticed a sheet of color solution in the immediate vicinity, too. These sheets are usually free and they are worth bringing home with tile samples. The sheets show a true-to-life printed color unit for each version of the color solution provided by the manufacturer, she says. Whatever you do, however, don't choose your color mortar there in the aisle of the store. Take the colored sheet home and look at the color solution options in your particular room so that you can choose based on lighting. Your tiles are convenient to lie down next to the printout line solution for a fairly accurate presentation of the finished product. Let's take a look at the size of your solution. The color of the graut can be used as a way to counter minimalism or emphasize maximalism. Depending on your personal tastes, you can go as unique or as traditional as you please. To compromise between extremes, Waller recommends this trick: Go shade or two lighter or darker when choosing the color of the tile solution, she says. And when you nail the color, pay attention to the size of your solution. It will determine how your choice is received. Poor solution choices can eventually ruin a good selection of tiles. If you're worried that your color might be a little over the top, just make the solution line a little thinner, so it tones down the statement, Waller explains. In other words, use 1/16-inch spacers when tile instead of 1/8-inch, so your solution line will be thinner in the finished space. The solution will still be visible, but a little more refined. Be sure to remove enough solution during application. Before you start installing, take a look at the depth of the tiles: How thick or thin are they? Their size should hint at how much solution is needed. Your instinct may be to leave it thick, but the depth of the tiles should determine how much you end up leaving behind, notes Waller. Protruding, uneven solutions lines are the first sign of amateur use. To hide your DIY work, just make sure to use a heavy hand when wiping out excess wet solution between the tiles. Navigate the sponge back and forth through the space between the tiles, and gently but firmly wipe until you see the edges of the tiles show through. Our four favorite Grout Color IdeasAlabastre: It's a great choice when working with marble tiles, as it helps to highlight the dark streaks that runs all over the natural stone, says Waller. Coal: Everyone knows that white subway tiles is a classic choice that will never go out of fashion, but consider punching this pretty safe choice of tiles using an ultra-dark solution, she notes. Coral: I was inspired by fellow blogger Kelly Mindell, a DIY studio, when I chose this solution for project, Waller adds. This subtle pop of blush would go particularly well between white or gray penny tiles, and Gold plumbing fixtures for T. Bright white: If you're working with black hexagon tiles, then use a bright white solution to help accentuate that unique shape and really make your tile work shine,' she says.
