Proven in 2019, there are many advanced smartphones that bring new features and features that we can't find in older smartphones. The global smartphone market is still dominated by Android smartphones, followed by Apple smartphones as well as a number of other platforms. Why can Android smartphones grow so fast? First, because it's open source, and secondly because it's free. So all brands can use it. Because it's open source, users can use it freely, from customizing appearance, adding features, and more that we can tinker with with an Android smartphone. The community is also very large from all over the world, including Indonesia is one of the countries with the largest community of Android users. It's no secret that on Android smartphones we can customize the look, including changing the background aka wallpaper. There are even some Android smartphones designed in such a way that they can change the look of the themes, fonts and other items on them. Replacing wallpaper on Android smartphones is simple. However, do not look for good wallpaper. We can find a lot of wallpaper for smartphones on the Internet, but not all of them are good and suitable for use on smartphones. Especially nowadays Android smartphones of many kinds. One type of wallpaper that turns out to be well applied to smartphones is type 3 dimensional wallpaper aka 3D. Wallpaper is very much in demand by people because it is liked. Using 3D wallpaper on smartphones can make the look more alive than we normally use. Well on this wonderful occasion we will share information with you all about 3D wallpapers that are very cool and suitable for application on Android smartphones. Curious? But before we share the wallpaper, there are a few tips for choosing good 3D wallpapers to make it look more maximum.

1. Point out the theme you like the first tip in choosing a good 3D wallpaper to define the theme. Because there are so many 3D wallpapers that you can get online, then of course you should choose one that suits your taste. For example, anime, automotive industry, nature, sports or abstract 3D wallpaper. It will be easier to find good wallpaper if you already have a choice. Use high-resolution wallpaperIf you want a good and maximum wallpaper display, then you should use wallpapers that have high resolution. Because if you use the resolution of wallpaper The look will look blurry and unsightly in the field. You can find a pretty lot of cool high-resolution 3D wallpapers on the web. Keep in mind that most android smartphones currently on the market today have full HD resolution 1080p. Therefore it is recommended to use wallpapers or backgrounds that have a minimum resolution of 1080p. It would be great if the resolution above, so the image appears clearer. Consequently, high-resolution wallpapers are larger. Pay attention to the objects in the image, so that the background view or 3D wallpaper you use may be more maximum, you should also pay attention to the objects in the image. Make sure that the position of the object in the wallpaper is in the center or at least symmetrical, so that it feels more professional and nice to see. So when choosing wallpaper, pay attention to it. Potrait or LandscapeMore that you should pay attention to when choosing cool 3D wallpaper is its orientation. If you are using a smartphone, it is recommended to choose wallpaper with potrait orientation. But if you're using a tablet or laptop, choose landscape-oriented wallpapers for maximum results.
