Twitter is the official Twitter app that lets you use one of the most diverse social networks of the time on Android devices anywhere. From breaking news to sports or entertainment, everything happens on Twitter first. You can watch live streaming and explore the whole world. The app's homepage features a toolbar with Home, Notifications and Messaging option. In this app you can visit the profiles of your desired individuals and can follow or un-follow, tweet or re-tweet on your posts with ease. The main function of this app is to do something trending through one click on your Android device in a matter of seconds. In a trend, everyone can post their own overview of the subjective trend. With this trending option, you can judge your favorite person from Entertainment, the news industry, politics or other events around the world. Alternatively, you can chat with friends privately or do group chats. You can customize your profile with photos, current location. You can relive the memory of old tweets by scrolling through the tweet window. Similar trending options are now available on Facebook, where you can get to any trend using the #hashtag Twitter App Update We will discuss the Twitter App 2019 updating its basic features and fixing bugs. Whereas it used to lag behind third-party Twitter apps, now perhaps the best way to tweet and interact with its followers. When you open the app, there are three screens to swipe between them. First, your feed featuring tweets from the people you follow as well as the occasional advanced tweet. There are also tweets suggested by Twitter based on who you follow. Swipe left to view the Discover tab. Here you can see current trends (which you can set by location), popular tweets, retweets and suggestions for users to follow. Scroll up again with the Activity tab. It shows you what people you follow have been up to on Twitter. You can see what tweets people love, for example, and feel what people are talking about when not creating their own tweets. You can also see your own Twitter profile, messages and notifications. When you tweet from the app, as well as sharing links and 140 characters of text, you can now take photos and videos and share them directly in your tweet. The video can last up to 30 seconds. Update: You can download the Twitter Lite APK file from the following link, a link from APKMirror which is the most reliable site when it comes to downloading Android APK files, the Twitter Lite App APK file is always updated there. It is also recommended that unknown sources be included on your Android phone, so you can install the latest version of Twitter Lite APK. Twitter is looking forward to adding new users to its social platform, and now the company is after much testing lite, which was a beta application only for the Internet. This includes all the functionality of its mobile site, as well as the push notification feature, now available for download in the Philippines as a standalone Android App. Yes, only users from the Philippines, for now, will be able to take advantage of this recently introduced Lite and effective Twitter client. This version of the Twitter app, dubbed Twitter Lite, has the entire all-fashionable timeline, as expected, along with a data screensaver to effectively use limited data. In addition, you also have complete control over your profile. In addition, you can also change your profile picture, background coverage and update the location as well. Twitter Lite features highlights: Running on 2G and 3G Networks File Size is under 3MB Embedded Data Saver In a statement from TechCrunch, the social networking giant said: Testing the Twitter Lite app in the Google Play Store in the Philippines is another opportunity to increase Twitter's availability in this market. The Philippine market has slow mobile networks and expensive data transmission plans, while mobile devices with limited storage are still very popular there. Twitter Lite helps overcome these barriers for use for Twitter in the Philippines. The image shows Twitter App on Android Phone Image Courtesy: Mashable.com How you may not know that Twitter was a little curious to grow its user base after receiving the news that Facebook's Whatsapp is growing high with new users joining the messaging app every day in large numbers. So Twitter has made it troubling, and now the company is looking to grow its stake in Southeast Asia; where internet speed is nothing short of scary. Another social networking giant Facebook has launched a duo of apps called facebook Lite along with its infamous version of life messengers, as well as for the Indian market. So Twitter is following in the same footsteps and making sure more people join at a constant pace. Twitter Lite Download Twitter Lite was released in March as a progressive web application. Not only was this a significant update compared to Twitter's previous mobile site, but it included almost all the functionality of the home app (including push notifications). In fact, it earned a place in our list of top Twitter customers a few months ago. Now it looks like Twitter has packed a web app into the Android app and posted it on the Play Store. At the moment it is only available to users in the Philippines and it appears to be identical to the existing web application. In case you're wondering, support for multiple accounts is still missing, so don't your hopes. Twitter said TechCrunch, the Test Twitter Lite app in the Google Play Store in the Philippines is another opportunity to increase Twitter's availability in this market. The Philippine market has slow mobile networks and expensive data transmission plans, while Limited storage devices are still very popular there. Twitter Lite helps overcome these barriers for use for Twitter in the Philippines. A Twitter spokesman went on to say that the app was an experiment and the company is still evaluating to attract it to other markets. Like many 'Lite' apps, Twitter Lite specializes in using as little cellular data as possible, even including the extreme Data Saver mode, which loads images and videos only when clicked on. If you live in the Philippines, you can grab it from the Play Store below. Twitter Lite is now available on APKMirror, so you can try it outside the Philippines. You can grab it here.
