Mrs. Norris Statue of what creature marks the entrance to the director's office? Gargoyle's History of Magic is unlocked in Year 5 of Harry Potter: The Mystery of Hogwarts. The class is taught by the ghost of Professor Binns and is infamous for being the most boring class at Hogwarts. This is amplified when Binns falls asleep almost immediately after the start of first grade. Several familiar characters from the series of books will be kneaded in the history of magic. There will be lectures from the almost headless Nick, a portrait of Rowena Ravenclau, Nymphadora Tonks, Rowan Hannah and even Peeves. However, most students will spend time goofing off as Professor Binns sleeps or stays completely oblivious. The history of magic will reward the attribute of Knowledge and is slightly different from other classes. There is no form of tracking mini-games. The expanding circle of mini-games is replaced by sense hexes activity (as seen in defense against the dark arts), which involves tapping the screen at a constant speed to raise the scroll in a given area. And most of the time you will answer the history of magic a specific question. For example, an 8-hour class tends to have 4 questions and 1 Sense Hexes Activity Tapping or holding your finger on the screen will lift the scroll, the speed at which it rises depends on how quickly the screen is tapped. You want to tap the screen at just the right speed to keep the scroll in the green marked area, keep it there for 5 seconds and you win. There is a 30-second completion date for Sense Hexes. Finally, we take a walk through all the questions you can ask in the History of Magic class. Check out our Class Guide for a full list of general guestions asked in any class. She will again play a big role in the Year 5 Cursed Vaults storyline as she recruits a group of students, including the main character, to search for repositories against Dumbledore's wishes. Given the curse placed on protection from the dark arts teaching position, it probably won't be around for year 6. The protection against the dark arts is similar to other classes with one of three random mini-games assigned after each completed star. Players will still be instructed to track the shape with their finger or answer a guestion from a classmate or Madame Rakepik herself. However, the expansion of the mini-game circle has been replaced by a new activity that requires players to tap the screen and keep t present at leisure. You will only have to click on the correct frequency to keep the scroll within the marked area for 5 seconds. If the scroll comes out of the marked area at any time, the timer is reset. Red laptops are used to take each creature while some of the new releases require some extra blue laptops. Creature Food can be obtained from The Search for Creature Food Activities in the Hogwarts corridor located at the end of the Lower Floor - West Zoning. This is a 3-hour session that rewards a total of 8 power creatures (4 for the first star and two for each of the two bonus stars). This activity is almost never worth doing as it rewards anything but food. An alternative method of getting Creature Food is to simply complete normal classes. Every time a star is completed in any class a 2-10 creature food can potentially be available as a reward. I'm ashore hundreds of Creature Food out just by randomly completing classes and choosing food when it doesn't compete with a massive reward like 1000 gold or 40 attributes. Obviously, Creature Food is used to feed your magical creatures. Creatures receive a level of trust based on the amount of food fed by them: 1 food and 3 experiences 2 foods and 7 experience 3 foods and 12 experience Three is the maximum that can be fed at once. As there is a 3 hour delay in feeding pets, feeding the maximum amount of food (three) each time will result in a guick learning experience every time a pet is fed. A recent update added the maximum level of adopted pets. This will give a similar reward to complete the star during the The class however the reward pool is improving and you may sometimes be offered the option to choose a brown laptop for making cosmetic pets. It's feeding on a 6-hour cooling timer, so you might want to start picking up some more pet food from the classes.
