Neil Carlson, U Mass Amherst -- Emeritus Professor at the University of Massachusetts at Amherst, Neil Carlson's research focused on the relationship between brain and behavior, particularly on the role of the limbic system in learning and type-typical behavior. Dr. Carlson holds a bachelor's and Ph.D. from the University of Illinois. In addition to writing the Basics of Behavioral Neuroscience, Dr. Carlson is also the author of Behavioral Physiology and co-author of Psychology: The Science of Behavior. Dr. Carlson's books have been translated into Spanish, Italian, Portuguese, German, Hebrew, Japanese, Chinese and Korean. Pearson New International Edition: Basics of Behavioral Neuroscience 9th Edition (International Version) in PDF is the perfect choice for a university instructor who wants a short tutorial with a good balance of animal and human research. The 9th International Edition of Behavioral Neuroscience Foundations offers a brief introduction to behavioral neuroscience. The tutorial includes the latest research and research from around the world in the rapidly changing fields of neurology and physiological psychology. The topic of learning strategies helps students apply these research results in everyday life. MyPsychLab (not included in this sale) is an integral part of the Carlson program. Key learning apps include MyPsychLab Brain. This tutorial is available in a variety of formats - digital and print. Pearson offers its names on devices that students love through Pearson's CourseSmart, MyLab, Amazon, CST and more. Teaching and Learning Personalize Learning - MyPsychLab (not included) online help, tutorial, homework, and assessment program. This helps readers prepare for class and instructor to evaluate individual and class performance. Improving Critical Thinking - Each chapter begins with a list of learning goals that also serve as the basis for the instructional guidance that accompanies this tutorial. Attracting Students - Intermediate resume follows every major section of the e-book. Resumes provide useful reviews, as well as break each chapter into manageable pieces. P.S All our prices in the US\$ North American version of Basic Behavioral Neuroscience 9e are also available. See below. This product contains only the e-book Of Behavioral Neuroscience Basics, the 9th edition (Pearson International Edition) in PDF. No access codes or MyPsychLab are included in this sale. Only registered customers who have purchased this product can leave a review. Carlson International Edition, Neil ISBN 10: 0205947999 ISBN 13: 9780205947997 New Paperback Number Available: 2 International Edition Seller: Bookstore99 (Wilmington, DE, USA) Seller Rating: Description of the Book Paperback Condition: NEW, International Edition, Soft Brand New, ISBN ISBN The cover image may be different, but the content is similar to the U.S. Edition, printed in black and white. Exercises at the end of the chapter may be different. There is no CD/access CODE. Legally used, despite any reservations, we ship PO, APO and FPO dresses in the U.S. Select expedited delivery for FASTER DELIVERY. Customer satisfaction is guaranteed. The Inventory Seller and US: 9789352865628 more information about this seller in this section: 1. Brief Table Of Content 2. Full table of content 1. Summary Of The Content Chapter 1: Origins of Behavioral Neuroscience Chapter 2: Structure and Cell Function of the Nervous System Chapter 3: Structure of the Nervous System Chapter 4: Psychopharmacology Chapter 5: Techniques and Strategies Research Chapter 6: Vision Chapter 7: Listening, Body Feelings, and Chemical Senses Chapter 8: Sleep and Biological Rhythms Chapter 9: Reproductive Behavior Chapter 10: Emotions Chapter 11: Not Gesticative Behavior Chapter 12: Learning and Memory Chapter 13: Human Communication Chapter 14: Neurological Disorders Chapter 15: Schizophrenia, Affective Disorders, and Anxiety Disorders Chapter 16: Autism, Attention Deficit, Stress, Full Table Content Chapter 1: The Origins of Behavioral Neuroscience Understanding Of Human Consciousness: The Physiological Approach Nature Behavioral Neuroscience Natural Selection and Evolution of Ethical Issues in Research with Animal Careers in Neuroscience Strategies for Learning Chapter 2: The Structure and Cell Function of the Nervous System Of the Nervous System Of the Nervous System Communication in Neural Communication In Neurons Chapter 3 : Structure of the Nervous System Main Features of the Nervous System Central Nervous System Peripheral Nervous System Chapter 4: Psychopharmacology Principles of Psychopharmacology Sites Drug Action Neurotransmitters and Neuromodulators Chapter 5: Techniques and Strategies Research Experimental Ablation Records and Stimulating Neural Activity Neurochemical Techniques Genetic Techniques Chapter 6: Vision Stimulus Anatomy visual system encoding visual information in retinal analysis: Role of Striate Cortex Visual Information Analysis: The Role of the Visual Association Cortex Chapter 7: Listening, Body Senses, and Chemical Senses Listening to the Somatosenses Vestibular System Olfaction Chapter 8: Sleep and Biological Rhythms Physiological and Behavioral Description of Sleep Disorder Why Do We Sleep? Physiological Mechanisms of Sleep and Wake biological clock Chapter 9: Reproductive Behavior Sexual Development Hormonal Behavior Control Of Sexual Behavior Neural Behavior Parental Behavior Chapter 10: Emotions Emotions as a Response To Emotion Communication Model Feelings of Emotions Chapter 11: Not Gesticular Behavior Physiological Mechanisms for Regulating Drinking Eating: Some Facts About Metabolism What Begins Eating? What stops food? Brain Mechanisms Anorexia Nervosa/Bulimia Nervosa Chapter 12: Learning and Memory Nature learning synaptic plasticity: Long-term potency and long-term depression perception of classical conditioning Instrumental Conditioning Relational Learning Chapter 13: Human Speech Message Production and Understanding: Brain Mechanisms Of Reading Disorders and Writing Chapter 14: Neurological Tumor Disorders Removing Disorders of Cerebrovascular Accidents Of Traumatic Brain Disorders Develop Degenerative Disorders Caused by Infectious Diseases Chapter 15: Schizophrenia, Affective disorders, And Anxiety Disorders Of Schizophrenia Major Affective Disorder Anxiety Disorder Chapter 16: Autism, Attention Deficit, Stress, nd substance abuse disorder of autistic attention deficit disorder/hyperactivity disorder stress abuse in this section: 1. Brief table of contents 2. Full table of content 1. Summary Table Of Content Chapter 1: The Origins of Behavioral Neuroscience Chapter 2: The Structure and Cell Function of the Nervous System Chapter 3: Structure of the Nervous System Highlights of the Nervous System Of the Central Nervous System of the Peripheral Nervous System Chapter 4: Psychopharmacic Principles of Psychopharmacology Sites Neurotransmitters and Neuromodulators Chapter 5: Techniques and Strategies Research Experimental Ablation Recording and Stimulating Neural Activity Neurochemical Techniques Genetic Techniques Chapter 6: Vision Stimulus Of Visual Coding System Visual Information in Retinal Visual Information Analysis: Role of Striate Cortex Analysis of Visual Information : Role of the Visual Association Cortex Chapter 7: Listening, Body Senses and Chemical Senses Listening to the Lobby system Somatosenses Gustation Olfaction Chapter 8 : Sleep and biological rhythms Physiological and behavioral description of sleep disorder Why do we sleep? Physiological Mechanisms of Sleep and Wake biological clock Chapter 9: Reproductive Behavior Sexual Development Hormonal Behavior Control Of Sexual Behavior Neural Behavior Parental Behavior Chapter 10: Emotions Emotions as a Response To Emotion Communication Model Feelings of Emotions Chapter 11: Not Gesticular Behavior Physiological Mechanisms for Regulating Drinking Eating: Some Facts About Metabolism What Begins Eating?
