Dayton winch model 3z842a

Image unavailable forColor: Join August 13, 2008 Message 9 of your W.Spfd.Ma. I took this Dayton winch me and I can find any information about it. I really want to know its attractive capacity. Dayton #3Z842A Include Sep 29, 2004 Messages 2,640 AZ Grainger locations might be able to help. They sold lots of Dayton Stuff Joining Oct 26, 2008 Message 2,138 Location 2 1/2 Hours. from everything I took a new Dayton winch on page sales that are still in the box for 20 dollars. It was only 4000lb, but I couldn't resist! It was similar to the one I had on a working truck and that one was made by Superwinch. Either Dayton makes a superwinch or a versa visa. Yes Grainger is the place for Dayton. good call on granger.... granger owns Dayton... they have had them since 1966. If you call them most likely will tell ya to contact a local representative about the part... and they may or may be able to help Join 4 Feb, 2006 Messages 4,010 SoCal Location that winch is the same as my Superwinch OX. Dynosoar Joined 13 August 2008 Message 9 Location W.Spfd.Ma. The dosage looks like a Superwinch OX. I'll call Grainger tomorrow you might want to call a superwinch too... Located at CT 860-928-7787 they are connected in several ways because the skidplate has expressed one built-in for another.... But... I am leaning on a superwinch I think Dayton might be in the name of just Keep us upto date on what you know ... I would be interested in knowing the superwinch came to find out in the 80s buying FW Winch at one time Fairy winches England who made overdrives for land browsers... as well as mercury Electric Winch corp Joining May 7, 2006 Messages 4,889 eerie Dayton locations i have several dayton winches, still in the garage somewhere and they are made by super winch.they both come from grainger. Joining Feb 4, 2006 Messages 4,010 SoCal Location The Superwinch OX, which Dayton is similarly only reinvested, I have seen officially rated at 8,000lbs. but I have been told the actual rating is 10,000 lbs, whatever that means. Dynosoar Joined 13 August 2008 Message 9 Location W.Spfd.Ma. So, I called Superwinch today and they have no help. Then give Grainger a call, they try harder to help me. They searched the archives and told me it could lift 6,000 # and attract 39,000 # which is pretty confusing. I ask them to fax me what they have and haven't received anything yet, I'll make you posted. Joined August 26, 2009 Messages 5,764 Locations of Midwest Grainger earth flats... Find an archive and tell me it can lift 6,000 # and draw 39,000 # which is pretty confusing. Ask them to fax me what they have and haven't received anything yet, I'll make you posted. That should have been a lot of winch for 40. The lift capacity is usually cited with a 4x protection factor, which figures to 24,000 lbs. Winches today don't recommend you use it to lift at all in many/most/anything? cases for liability reasons. 39,000 lb # visible much like previous comments about it was rated at 8000 lbs, but can really do a 10k pull. No winch that puny is judged in the current day terms at 20 tons... Dayton makes a lot of motoring. Perhaps the relationship between Superwinch and them is that Dayton making motors for Superwinch and Superwinch slapping some Dayton badges on winches for the Grainger market? I never remember ads for Dayton in any of the 4x4 magazines, so I suspect this is mostly for that captive market. Joining Apr 29, 2012 Messages 5 Monticello Location. In a rating of 39,000 lb can load rolling. Or the frictionless load, I've seen both ratings on some of the industrial winch/hoist motors I'm dealing with.
