Inflammation and Repair Pathology Practical Class 30-10-10 2 Gross and Histopathology 3 1- Fibrinous Pericarditis 4 Organ: Dx: Fibrinous Inflammation 5 ACUTE FIBRINOUS PERICARDITIS 6 7 Fibrinous Pericarditis: The heart section shows: pericardium is distorted by a thick irregular layer of pinkish exudate fibrinic with some red cells and inflammatory cells. The subpericardial layer thickens with swelling and shows dilated blood vessels, chronic inflammatory cells and calcification areas. 8 2- Acute appendicitis 9 ACUTE APPENDICITIS 10 11 12 13 14 15 Acute suprapurative appendicitis: Cross-section of appendix shows: Accumulation of inflammatory exudate and gnomie cells in lumen and mucous ulcers. All layers of the appendix wall show swelling, dilated and congested blood vessels and infiltration by many neutrophils. Fibrin-glued exudate is present on the serosic surface. 16 3-Skin pylonidal sinus 17 18 FOREIGN BODY REACTION (PILONIDAL SINUS) 19 20 Other Body Reaction (Pylonidal sinus): Skin section shows: sinus tract aligned with inflammatory granular tissue in the dermis. Lumen sinuses and walls contain a large number of hair shafts with inert cells of the body, lymphocytes, macrophages and neutrophils, macrophages and neutrophils. Neutrophils. pathology practical slideshare. pathology practical slides pdf. oral pathology practical slides. a practical handbook of pathology specimens and slides pdf
