Remind is a communication platform for teachers and students to talk to each other. Web software also has several useful features, such as sharing files and translating messages. This platform is designed for both offline and online teachers. As a teacher, you can send schedules, photos, files or even quizzes through messages to all studentsRemind acts as a social network for educational purposes. Professors can easily contact their students as well as their parents without having to request personal phone numbers or emails. The website can also tell you if all your students have received your message or if someone is missing it. Educators start by creating a class that can function as a group in certain social networks. this is where teachers message everyone in the classroom. The platform also allows you to send private messages to a student or his parents. This makes educational resources such as Powerpoint lessons accessible to each participant. Parents can also see your messages. All documents, spreadsheets, and other files are available under the Files tab for everyone in the class to access. Integrated Platforms and Other Features Educational Platform also supports other resources to help you with class abilities. This includes a Google class that provide students with course jobs and their grades. You can also use a monkey quiz and review for exercise or after-school activities. Another way to recall can help you is the translation feature. You can translate any posts on the site into some of the most commonly used languages, such as Spanish, French and Korean. This can help you understand what your students can say. It also allows you to communicate with people who can only speak a particular language. Where can you run this program? The Remind website is available through any browser. You can also use a mobile phone app that is compatible with android 4.4 or better phones, as well as iOS 10.0 and up. Is there a better alternative? A good alternative to Remind is Twiducate. A social media app that provides a private platform for both teachers and students. The app is compatible with Google Docs and YouTube.Remind fulfills its goal of providing you and your students with a social media platform for effective messaging and sharing. It also goes beyond its function with integrating other websites and platforms such as Google Docs. You can also contact international students or teachers with Remind. The only limitation of the site is the 140-character limit, which is similar to Twitter, before it doubled the character limit. will you download it? Yes, a free account provides teachers with the tools they need to communicate and provide resources to the class. Get a handy calendar app on your Android with Google Calendar.Google Calendar is a free app for Android that offers you a more functional calendar compared to many others and against your stock app. The app is also the official Google Calendar app, it is connected to gmail and fills your Android with events and meetings from your computer and other android devices. The app has the usual calendar app features such as events, goals, cases, but the most important feature is connecting between devices and Google Calendar on your computer and Gmail.Download Google Calendar app now and replacing the old promotion app with a more functional and better app. Please check out Tom's Guide for more interesting apps and the latest tips on Android.And you can go visit Tom's Guide Forums for any concerns about your Android. David Weinberg's Android smartphone is designed to integrate with your Google account to keep your personal information synced between your phone and Google's online apps such as GMail and Google Calendar. Each of Google's apps on your phone can access this information, allowing you to link certain information, such as calendar records, to other information, such as contact names. By adding contacts to your calendar record, you can track who will participate in the events with you, and you can quickly contact these people directly from the calendar record. Google will also send your guests information about the event in the invitation. Tap the Calendar icon on your Android home screen or in the app drawer to open the calendar app. Click the date to view your appointments for the day. Click on the meeting for more information about the event. Click the phone's Menu button and click Change. Scroll down to the Guest field and tap the text entry area. Click Contact to make a list of contacts on your phone. Scroll through the list and tap the contact to add that person to the current event. Click Save to save changes in the event. It will also send out invitations to the guest list. Click on the guest's name on the event details page to make a list of contact options. Click on the contact option to call, send a message or email a contact. Calendars are useful tools. Even paper is great for remembering dates, taking out trash and tracking family birthdays. Some of the first mobile apps were datebooks and calendars. They are useful to this day for exactly the same things as their outdated paper ancestors. Surprisingly, the technology behind the calendars has changed little over the years. Most calendar apps are still just massive datebooks with customization features. However, there are many greats out there. Here are the best calendar apps to keep you organized! Read: How to Share Google Calendar (en) How to customize and use Google Calendar on any deviceCalendar.AIPrice: FreeCalendar.AI is a smart calendar solution that uses advanced algorithms and platform hooks to make life easier You. It packs a lot of smart features such as surveys for service meetings, smart planning, and AI research that automatically sources relevant information from around the internet, so you always know exactly who you're talking to and where they come from. You will nail every first impression. Calendar.AI with other apps such as LinkedIn and Google Suite to share information with both customers and teammates. Calendar.AI it's more than just another calendar app; This is a whole new way to think about organizing your life.aCalendarPrice: Free/Up $5.99aCalendar is one of the classic calendar apps. It has basic things like different kinds of dates, reminders, notifications and more. The app also includes customization features, Google calendar support, tasks, themes, and even special things like moon phases and holidays. The developer also gives 10% of all revenue applications for rainforest conservation. We loved it. The app has a free version and a reasonably priced pro version. It has also recently undergone a complete redesign. Any.do Tasks and CalendarPrice: Free/$2.09-$2.99 per month (account annually)Any.do is a combination of to-do list and calendar. It has the best of both worlds. This includes a large overview of the calendar with in-depth functionality to perform list tasks. It also supports Facebook, Google and Outlook calendars. This makes it great for multiplatform fans. The user interface is a material design and it looks good. The only downside is the price. This requires a subscription. This makes it difficult to recommend for those who need something cheap and simple. It's more for hardcore performance people. Business Calendar 2Price: Free /Up to $6.99Business Calendar 2 is one of the surprisingly popular calendar apps. The app has good customization features. This includes nearly two dozen themes, seven calendar widgets, and different types of calendar. It also has the support of the Google calendar and calendar sharing, as any good business calendar should. He even has weather information along with everything else. We like that it supports sub tasks, something that you usually only get on the to-do list of applications. It's also free through Google Play Pass if you use it. The NotifyPrice Calendar: Free /Up to $5.49Calendar Notice is one of the new calendar apps on this list. It does a lot of the right things, including a full set of customization tools and an on-the-look style of the user interface. The premium version also gets more advanced customization tools. In terms of basics, you'll get a Google Calendar as well as any other calendar with Android calendar support. The app does the basics without problems, but its a big draw of customization and control users get behind their calendars. Calendar Widget Home AgendaPrice: $1.99Kalendar Widget Main Agenda is another new calendar app. It integrates with Google's calendar for everything Reminders. It boasts a clean user interface along with clean and customizable calendar widgets. You can change the thematic a bit and even show or hide events as you see fit. It's something a little different in this space, but it's one of the best calendar widget apps we've seen. CalenGooPrice: Free /5.99CalenGoo is a serious calendar app. It has a bunch of features including google calendar support and calendar sharing. It also has customization options, decent event options, repetitive events, and more. The app doesn't have a huge list of additional features. However, it does the basics better than most. It even supports sharing the calendar with other people. This makes it great for families or using work. There is a free trial. The pro version goes for $5.99. It's also free through Google Play Pass if you use it. DigiCal Calendar AgendaPrice: Free /Up to $4.99DigiCal Calendar is a solid calendar app. It has a material design, a dark theme, tons of add-ons, and more. Some additions include sports calendars, television schedules and more than 500,000 other events. Other features include topics, weather information, calendar widgets, and support for the Google calendar, calendar sharing, and Outlook calendar. The free version has a lot of features while the pro version gets everything. It's just a little buggy, but nothing too serious. Google CalendarPrice: FreeGoogle Calendar is a de facto app for calendars. It comes stock on many devices. Many other calendar apps integrate directly with it. It's pretty simple in terms of features. He does the usual things. There isn't much in the way of customization or themed. However, it has a good web interface, calendar additions, and some other fun stuff. In addition, Google updates it quite often with new features. It's also completely free without in-app purchases. Simple ProPrice Calendar: $0.99Simple Calendar Pro, well, a simple calendar. This is its main feature. It doesn't connect to external calendars like Google Calendar or anything like that. There is additional support for CalDAV, however. Otherwise, the calendar is almost completely offline. There used to be a free version of this, but it's no longer supported. The current option goes for $0.99 without additional ads or in-app purchases. It's also completely open source and relatively inexpensive. This is a good option for people who want some minimalism and may not want everything stored in the cloud. Bonus: Other apps with integrated Price calendars: FreeCalendar apps are great. However, some people just need a calendar Sometimes other apps include the calendar as part of their functionality. These calendars aren't as strong, but they get work done for basic things. Some email apps, such as Newton or Outlook, have calendars. Widget packs like beautiful widgets and HD widgets have calendar widgets as well. Even some cases apps like TickTick have built-in calendars. Even Facebook has a built-in calendar there are too many listings here. We recommend looking for apps that cover multiple bases. This is a good start for basic calendar usage. Bonus: Stock Calendar appsPrice: Free (usually) stock calendar apps on most phones do a good job for basic needs. They can perform repetitive tasks (usually), remind you of upcoming holidays, and create meetings and events. They don't have additional features such as the above calendar apps, but some people just don't always need them. Also, most of them integrate with Google and Facebook Calendar at least. They are also free and pre-installed. These apps are usually free, already on your device, and do the basics. It might be worth it if you just don't want to use Gmail for any reason.
