Taipei MRT stands for massive fast transit, in Taiwan it is called simply MRT and it has been running since 1996. Several million people use it every day and it delivers with perfection. Taipei MRT Metro Map To use MRT in Taipei is very easy to understand, it is according to Taiwan MRT 2020 5 main color lines: (brown, red, green, orange, blue) and one additional line dedicated to Taoyuan International Airport (Purple Line). As for January 2020 there is an additional color line (yellow line). All stations are marked with colors, letters and numbers, so it is very clear where you are and how to get to your destination. Taipei MRT line for 2019 Prices for MRT Ride One MRT ride can cost vary depending on the length of the trip, the connection and the way of payment or age group. Generally it is very cheap and it is one of the most reliable transportation options around Taipei. For example: Transport between Taoyuan Airport in Taipei's main station costing 160 NT D (equal to \$5 USD more or less). This is the most expensive trip you can buy on METRO. Should I use MRT in Taipei? Definitely yes!! It's faster than all the other options around (uber, taxi, car and bike). Each station is equipped with useful staff and accessibility for disabled people. It offers a variety of payment options and easy to understand directions. Many people are confused between Taipei MRT and Taoyuan MRT because they see it as the same subway line, but when changing the subway line, as to switch line, Taoyuan MRT and Taipei MRT Δ 2 zon clearly work on behalf of BTS. Taoyuan MRT and Mrt Taipei Δ only connecting points at Taipei's main station (BL12/R10 - A1), MRT Beimen (G13) and MRT San Stationchong (O15 - A2) \neq \neq station bts connected but connected. \neq \neq in the illustration to better understand (the purple patch Taoyuan MRT), Taoyuan MRT and Taipei MRT, the subway between Taoyuan Airport and Taipei City called Taoyuan Airport MRT or Taoyuan. 2. It has been operating since 1996, paying fares through EasyCard, iPASS, iCASH, HappyCash, Taipei Pass, Taipei Metro Pass, or buying one-way tickets. Currently available on 6 lines: 1. Wenhui Line (Brown Line) 2. To download a map of Taipei MRT here, Taipei Mrt Taipei MRT Δ - Δ . Δ If you want to change the station from Taoyuan TO MRT - Taipei MRT, click on the map to exit Taoyuan STATION BTS and then walk to Taipei BTS Station. Δ , however, if you change the line between Taipei MRT and Taipei MRT or Taoyuan MRT and Taoyuan MRT. Don't touch the map to get out of the station first. Taoyuan Airport MRT - Taiwan Just note that Taoyuan MRT Abbreviation starts with A1- A23 Taipei MRT, the acronym starts with the color line, the line of the sky line is BR - Brown R - Red G - Green O - Orange and BL - Blue Taoyuan Airport - Taiwan MRT Taipei MRT MRT MRT MRT MRT MRT, distance between Taipei MRT and Taoyuan MRT \neq MRT Beimen \neq MRT Taipei Main Station (R10) - A1 Taipei Main Station 540 m. \neq MRT Taipei Main Station (BL12) - A1 Taipei Main Station in the Western Area - 470 m and and The eastern zone is 675 m. \neq MRT Sanchong (O15) - A2 Sanchong 105 m. This post should make it easier to understand the journey between Taoyuan Metro station and Taipei Metro station. If you change the station between Taoyuan MRT and Taipei MRT, you should touch the map first, as if you were replacing the BTS line with MRT at Asoke - Sukhumvit and Mo Chit stations - Chatuchak Park. TrTC map MRT Taipei (Taiwan News) - Taipei Rapid Transit Corp. (TRTC) on Monday (January 20) uploaded the official new map for Taipei Public Rapid Transit (MRT), which currently includes a circular line, or yellow line (code Y), and crosses the orange line, the blue line, and the orange line again before ending in the New Taipei Industrial Park Station of Taoyuan AIRPORT MRT, in the New Taipei city of Xinzhuang district. The interactive online map comes in four languages including Chinese, English, Japanese and Korean with a clickable link to each station that provides additional information about each stop. The legend not only covers six colored lines, but also includes symbols for airport, high-speed railway (HSR) stations, Taiwan Railway Management (TRA) stations, Taoyuan Airport METRO stations, and even hot springs. The first section of the yellow line, also known as the Chung Huan Section (central circle), began a free trial operation on Sunday (January 19). At this stage, trains will be courses from 10 a.m. to 4 p.m. with a gap of 8 minutes between trains. Electronic tickets for passengers taking the new line during the trial period will not be charged at the entrance and exit of the stations. However, those who go from and on other subway lines will be charged a regular amount, as there is no way to determine whether they have only picked up the yellow line. New Taipei City Mayor Hou Yu-ih (侯友宜) said on Sunday that his government hopes the Jun Huan section will officially open by the end of January, CNA reported. The final decision on the official opening date of the line will be made by Taipei Mayor Ko Wen Jie (柯文哲) after he returns from a trip to Europe on Wednesday (January 22). The first part of the line includes 14 stations and one depot between Dppinglin Station in the south and New Taipei Industrial Park Station to the west, with trains passing through the New Taipei urban areas of Xinjiang, Chunghe, Banqiao, and Xinzhuang. The new line will see interchanges with several other lines already completed, such as the AIRPORT MRT Line, or is still under construction. The purpose of the ring line is to allow passengers traveling from one area of outer Taipei or New Taipei city to another, and avoid the need to connect through downtown Taipei. This first section of the yellow line connects the green, orange and blue lines. The first 15.4-kilometre section of the line was originally due to be launched in June 2018, but the opening was later postponed until this month. The cost of the first phase was 69.97 billion NTS(\$2.32 billion), according to CNA. Page 3 Collar anteaters are usually shy and not dangerous to humans. (Taipei zoo photo) Ants colliers are usually shy and not dangerous to humans. (Taipei zoo photo) TAIPEI (Taiwan News) - The Taipei zoo said Thursday (October 15) that a three-year-old collared anteater who escaped from a rainforest area last month has yet to be found. According to Taipei zoo spokeswoman Erik Cao (曹先紹), an anteater, Xiaohong (小红, Little Red), has been a visitor's favorite since she arrived from the Singapore zoo in August 2018. However, on 1 September she was found missing from her enclosure along with her six-month-old child. After reviewing surveillance footage, zookeepers found that Xiaohun climbed over an electrical fence surrounding the rainforest and escaped through a culvert at 2 a.m. Although zoo staff were later able to find the anteater, his mother remains at large. The director of the rainforest zone, Weng Shao-Yi (翁紹益), expressed concern about the safety of Xiaohong, saying the anteater's collar tends to be shy and have no chance against its natural predators such as jaguars, civets, and even wild dogs. He said they tend to stretch out their hands when they feel threatened to appear bigger, but that they are capable of very little in the way of defense, reports UDN. The Taipei zoo is asking the public to keep an eye on Xiaohong, which is about 65 centimeters long and has a cream-colored coat. She stressed that the missing anteater could not harm people and that anyone who noticed her should contact the zoo immediately. Meanwhile, the Taipei zoo has beefed up security around the rainforest and removed the floating wood from the water crossings so it can't be used for escape. The zoo is also considering improving open spaces for anteaters collars, CNA reported. Anteater Siohohun and her baby. (Taipei zoo photo) photo)
