Tanzania is a sovereign state in Africa and it is also referred to as the United Republic of Tanzania. The east of this country is located in the Indian Ocean, and in the west - Rwanda, Congo and Burundi. Tanzania is the 31st largest country in the world with an area of about 945,087 square kilometers. The size of this country is more or less similar to the size of Nigeria. The north-eastern part of the country is hilly, and Mount Kilimanjaro (the highest peak in Africa) is located on this part off the coast of the country. The largest lake in Africa, Lake Victoria, is located in Tanzania. The country is also home to Lake Tanganyika, the deepest lake on the continent, and this lake is very famous for its unique species of fish. There are many wildlife parks in Tanzania and these parks are not only large, but they are economically important as well. The Kalambo Water Falls are being promoted by the Tanzanian government, and this drop in water is considered one of the most popular tourist destinations in the country. It is also the second largest fall on the African continent. The country is experiencing a climate similar to the tropical climate. People from Tanzania are called Tanzanians. This detailed map of Tanzania is provided by Google. Use the buttons under the map to switch to different types of cards provided by Maphill itself. Look at Tanzania from a different perspective. Each style of the card has its advantages. No type of card is the best. The best thing is that Maphill allows you to look at the same country from different perspectives. Read about the styles and projection maps used on the map above (Detailed roadmap of Tanzania). Roadmap Detailed street map and route planner provided by Google. Find local businesses and nearby restaurants, see local traffic and road conditions. Use this type of map to plan your trip and get a direction in Tanzania. Switch to Google Earth for detailed virtual globe and 3D buildings in many major cities around the world. Mercator Map Projection This map of Tanzania is provided by Google Maps, whose main purpose is to provide local street maps rather than planetary views of Earth. In the context of local street searches, the angles and directions of the compass are very important, as well as ensuring that distances in all directions are shown on the same scale. The Mercator projection was developed as a navigational tool for maritime travel. It keeps the corners. If you want to travel from Tanzania to anywhere on the map, all you have to do is draw a line between the two points and measure the angle. If you lead this compass direction, and keep going, you will reach your destination. Administrative Classification of country Subregions 26 South 11 44' 44 S North 0 59 26 S West 29 19' 37 E East 40 26' 35 E Minimum Height -3430 m Maximum Height 5790 m Land/Water Coastal, Lake Page 2 Maphill is a set of image maps. This view of Tanzania at an angle of 60 is one of these images. Click on the detailed button below the map for a more comprehensive map. Look at Tanzania from a different perspective. Each style of the card has its advantages. No type of card is the best. The best thing is that Maphill allows you to look at the same country from different perspectives. Compare hotel prices, book online and save money. Learn more about card styles Each type of card offers different information, and each style of map is designed for different purposes. Read about the styles and projections of the map used on the map above (Satellite 3D map of Tanzania). Satellite map Satellite map shows the Earth's surface as it really looks. The above map is based on satellite images taken in July 2004. This satellite map of Tanzania is designed only for illustrations. For more detailed maps, new satellite and aerial photographs are switched to a detailed view of the map. Hillshading is used to create a three-dimensional effect that provides a sense of relief of the earth. The shadows drawn on the map simulate the impact of sunlight falling on the surface of the landscape. The Map Plate Carree Projection map is a way of converting points on Earth into dots on a map. This 3D map uses a projection of the Curry Plate, a simple variant of equidistant cylindrical projection that originated in ancient times. Parallels and meridians are equally mixed, they together form squares of the same size throughout the world map. Using a simple grid, where each cell is the same size and shape, brings significant benefits. By comparison, the detailed maps of Tanzania instead use a Mercator projection. The Mercator projection better preserves the shapes and corners of small areas, but, on the other hand, significantly distorts the size of the plots. Administrative Classification of country Subregions 26 South 11 44' 44 S North 0 59 26 S West 29 19 37 E East 40 26' 35 E Minimum Height -3430 m Height Maximum 5790 m Land/Water Coastal, Lake Page 3 Maphill is the most comprehensive map gallery on the Internet, that's for sure. But the gallery is not much of a gallery without visitors. If you like any of the cards, please don't keep it to yourself. Share this page.
