Continue to use SAFE UNLIMITED SMART UNFOLLOW ALL your not following back and lost followers or UNLIMITED SMART FOLLOW all your fans and follow the statistics of home widgets for Instagram . More than 2,000,000 users trust our safe login stream because we use https, more information can be found in terms and conditions. All you have to do is choose how many users you would like to unfollow or follow with NO LIMITS, and it's IT! - Our app can automatically control 60 unfollow/follow actions per hour, keeping your Instagram account safe. Unfollow Pro for Instagram keeps you updated on your activities on Instagram. Using this app, you can track useful information such as: Lost followers are the ones who unfollowed you; Not followers - those who don't follow you back; The fans are the ones who follow you, but you don't follow them yet. Reach your individual Instagram stats NOW!! Daily followers and followings to see how your Instagram growth strategy works, Daily counting of your non-followers, lost followers and fans. Some other features include: Show all your followers and followings that have a personal profile; show the most popular Instagram followers and following from your account. Useful notes: Please make sure you don't close our app until the work is done on the next work, and make sure that you don't have clean memory apps that could kill our background service. Your battery can drain much faster, and your internet traffic consumption will increase. For the sheer number of selected users, you have to connect the charger, connect to the Wi-Fi network and forget about all your non-followers back, lost followers or fans. :) You can use the simple version for free, with some ads and special limit features or you can have it all without limits and without advertising using one of our PRO packages designed for each user's needs. Caution! Instagram allows a limited number of unfollows per hour between 60 and 200 requests depending on the age of your account. We recommend not to exceed this limit! If a limit is reached, it may be that your simply untraceable users still remain as the following. This app is only available in the App Store for iPhone and iPad. Follow your followers with the best follower analytics tool for Instagram. See who unfollows you and who doesn't follow you back. See the ranking of your best followers and who loves you the most. This should be done 24 hours before the end of the free trial or subscription period to avoid being charged. Cancellations will take effect the day after the last day of the current subscription period and you will be downgraded to a free service. Terms of use: policy: Denial of liability: this app is by no means associated with Instagram Daily Limit : 200 (UN) follows per day - 50 in 1h This app will not help you get, earn, or buy followers or likes, and it's just a tool that provides you with reports and analytics on your followers Bug fixes and improve the user interface My first option in this application nonfollowers!s I do not understand who unfollowed me! can you add an option that we can remove followers from our page? Is it possible? Yes. We'll try to add it TO THE REVIEW- My first review was glowing (see below) but now it doesn't work. I can't unfollow but now get a 400 error. This complaint appears to be continuing on the basis of previous reviews. In these reviews, the developer never responds. When the app worked it was great and I was considering upgrading to a professional version, but won't until Fixed. PREVIOUS REVIEW- This app is very accurate and quick to educate those who are not followers. I like that I have the ability to unfollow manually, just running down the list and clicking to avoid being seen as an IG bot. Also, the ability to make 15 at a time. It also allows you to see other categories such as fans, active followers, mutual followers and ghost followers. Other apps have brought up all your followers and surrounded your profile pictures of those who haven't followed you. This meant that you had to scroll through all your followers and click the ones that were circled if you wanted to do it manually. It's been a long time. With this app, it educates non-followers in an easy-to-use list format. Love this app The only free service is the unfollows part and you have to manually unfollow each of your unfollowers. That's for sure, unlike some of the other apps I've used in the past. You have to walk yourself if you have a lot of unfollowers, as it gives you a 429 bug and blocks the app if you don't - which is why I give 3 stars instead of 5. Definitely annoying. Pop-ups are not brutal like other apps I've used is definitely a plus! Don't use its fast Developer Website Support Privacy Policy Great Features. Great user interface. Provides a lot of insight and analytics, including who followed you, who unfollowed you, what profiles liked and commented on most and can manage multiple accounts. The annoying part of the feature is that if you want to cancel a subscription to multiple profiles based on analysis (such as profiles that unfollowed you), you can't. You have to go through each one individually, and the app will take you to IG for you to make a guide unfollow. The biggest problem with the app is its lack of stability. It freezes the way to often. It gets stuck on IG entry cycles and even if you've already logged in). Right now, despite having paid for a full app, it's unusable. It just won't work. Stuck in an entry loop that I can't get out of. I had to buy another app. Visit the site Of External Download site I think this app is awesome, easy to use and very functional for what I need (to see who is mutual, fans, not followback). And what's great is that it's a fast, friendly user interface, and can handle multiple accounts from Twitter and Instagram. The ads are not too much and are still adequate. Hope that every upda ... upda... unfollowers instagram premium apk ios
