It was a land where the power of government came with a sword and a mystery, where people who devoted themselves to blades or magic could become the best warriors, wise wizards, or greatest adventurers. On this earth there are several kingdoms, separated by borders, but united throughout history. Countless stories about unions, upheavals and moments of peace washed this tapestry, but it is a fairy tale for another day. Our story begins in a remote kingdom to the north, Iblis, an obscure and often forgotten place. It is a wild and barren land, a place where its people scrape life off the ground, mining for the lords of the south. Sometimes adventurers stop at night, but never stay. Until one day, the young adventurer got lost and stumbled into the pit. The story could have ended then if he hadn't returned, but the return he made, with bags of gold and sparking treasures. Like a ferocious storm from the north, news of its glory and fortune fanned out over the kingdoms overnight, and the kings sent their bravest warriors and adventurers to clear the cave of monsters in search of treasure. Even the peasants, wanting a part of this newfound wealth, took part in these expeditions. Never in this forgotten place there was no noisy city. People set up camps, and formed their own groups to explore the cave. Smart merchants, not missing this opportunity, built near the cave taverns and shops, selling equipment and potions to impatient adventurers. At first everything seemed fine. When the explorers delved into the caves, they encountered new creatures and discovered new treasures. Mysteries continued to pour out of the cave, but no one knew where the source of the secrets was. However, as the research continued, the balance of wealth outside the cave began to fluctuate, and cracks appeared among those adventurers who had previously worked hand in hand. Lateness or weak, limited wandering on the upper floors of the cave, could only watch as veteran adventurers brought treasures for treasures from the depths. They began to harbour dark thoughts as they watched veteran adventurers grow arrogant from their generosity, ordering people around, accumulating secrets from the rest. The place became a gring pool of suspicion and greed, mired in jealous rage. It all started with the fact that the adventurer disappeared in the cave. There were rumors that he had found some legendary treasure and had accumulated it for himself. Others said he was guided into another world by some mysterious magical power in the cave. However, the unspoken belief was that he had been killed by a rival party and was buried somewhere under the caves. No one knows exactly what happened, but since then people continue to disappear. As more and more people went missing, some called it goes away, other others hope, and some continue to wait and see. Which brings us to you, an ordinary young man, entering into this extraordinary circumstance with unknown other purposes. Can you find what you are looking for in ... ——— In a greedy cave, you are a brave adventurer tasked with exploring a mysterious cave and battling all kinds of monsters. Use your mind to defeat them, learn different skills, get mighty equipment, challenge evil monster bosses, and decipher the mysterious surroundings of this cave... The game's randomly generated cave levels provide a different gaming experience each time! Hundreds of monsters to win! Hundreds of equipment to collect! Hundreds of quests and achievements to win! Enchant/Reform/Level Up/Gold Collection, and more plentiful systems to explore!
