biblical principles and values. Dr. Sunday Adelaja is happily married to his princess Abosed Dera Adelaja. They are blessed with three children, Perez, zoe and Pearl. Here I would like to start giving you some snacks on the laws of money. Let's start the journey: 1. The first law of money that I would set out with you today - money is not MEADE BE SPENT. The first instinct is uninformed people when it comes to money to spend it, and it is proof that they are not informed. It is also proof of why they will never become rich. Some people even say what money is meant for if not to be spent. People who understand money and its laws will tell you that when you are given a hundred dollars, you can only spend a hundred dollars made at least three times its original value. So if you are given a hundred U.S. dollars and you haven't found a way to multiply it or put it to work, so that it will produce for you three hundred dollars, you are not allowed to spend the original hundred dollars. If you do this and indiscriminately spend the money that comes to your hand, it shows that you will never become rich. Many people tell me how then can I pay my bills and meet my needs? For the informed that it is easy; of the hundred dollars that came to you on hand, put thirty dollars to work so that in the next few months, maybe a year or more that thirty percent continues to work for you. Because that hundred dollars keeps working for you, it brings back the original hundred dollars and more in your pocket. I'm talking about magn with magn with and multiplication. The mistake of poor people is that they see rich people buying and using flashy things, then people buying and using flashy things, then people want to copy them. The poor man sees only the luxury of the rich, not the laws that brought him there. Because don't know or don't know about the mechanism that works for the rich he aware that a rich man only costs after many returns are returned to their buck. Rich people don't spend the initial capital they have, they only spend overflowing. On the other hand, the poor man sees the luxury of the rich and rushes to become like him and throws the initial meager amount of money into his own hands. Some people are even worse, they don't just spend some money in their hands and borrow or spend in installments that they haven't done yet. Thus, these people are constantly not only becoming poor, but slaves to rich people, as they must continue to work for them in order to pay their debt. Meanwhile, those rich people who are poor copy already built companies, factories, shops, where the poor man eventually goes to spend the little money that he has in his hands. Therefore, as soon as rich people pay their poor workers wages, they have already built outlets, where the poor immediately rush to spend this money, returning this money in the service of the rich. It becomes an effective manipulator of the poor to go and part with their hard earned money, back in the pockets of the rich. Thus, leaving the poor poorer and richer richer. (More on this in my book Money Won't Make You Rich) 2. The second law of money that I would like to share with you today is that - money should be RETAINED. The ability to withhold the money that comes to your hand is one of the greatest qualities of a future millionaire. What does that mean? I mean, whenever you're given a hundred dollars, money acts like God. Money dictates your desires. As soon as a hundred dollars comes into your pocket, the money starts to dish out you instructions on how you should obey his team, going to spend it. This is what made Jesus call money a god - Mammon. Because the money is the same as God. God gives commandments. God orders. Money will do the same. Money desires to obey just as God wishes to obey. Therefore, when money comes to your hand, immediately, the spirit of Mammon begins to claim its power and claim its power over you. However, by keeping the money in hand, you proclaim your freedom over the Mammon God. Thus, you declare your independence over the spirit of greed, anxiety and lust. If you could take the money and put it down without looking at it and disobeying its dictates, run out to spend it, you just turned the table on the god mammon. You tell money that it's no longer your Lord. You're asserting your power over the power of money by telling him that I can bring you here, not spend it, because I'm the boss. I tell you the money that I want to do with you, you do not dictate to me. I obey only my Lord and Teacher of Jesus Christ. That's how you break through from the power of money. Remember that money is a good servant, but a bad master. The ability to withhold money allows you to become the master of money and mammon. You will cease to be his slave, and you take over the rule over him. Ladies and gentlemen let me tell you why this is important. Only a person, having mastered the act of withholding money, can safely distribute this money for reasonable use. When you already have a victory over money, only then can you begin to hear the voice of God leading the Spirit, because when the voice of the Holy Spirit, which begins to lead you to where you can wisely spend that money, because God speaks only in yasness and peace. You must stop listening to the voices and dictations of mammons before you can begin to clearly distinguish and hear the voice and the leading role of the Holy Spirit. It will lead you to where to invest, it will lead you to where to save, it will lead you to the right people, it will give you an understanding of the right area of business to invest in etc. Only a person who has been able to do this can dominate and conquer the money. Once you storp accepting his order, he now starts taking your orders. When you storp being to his service, the money now begins to come to your service. 3. The third law of money that I would like to share with you today is from about 25 that I have- ANY WINNER that COMES TO YOUR HAND should not be SPENT UNTIL SIGNIFICANT PART OF IT INVESTED. The lesson of the parable about talents, as Jesus said in Matthew 25:13-30, is that any person who spends everything that comes in his hands is either on account or pleasure, as angry and lazy. The servant jesus condemned in this story was condemned in this story was condemned because he did not invest the basic capital that was entrusted to him. I guess I won't exaggerate if I say that most people reading this article fall into the same category as this servant. Most of us don't even consider investing money that is entrusted into our hands. The reason is that we are basically unaware of the first two laws of money I stated above. Before I met the Lord in this regard, I lived like everyone else. At that point our church was earning \$20,000 a month, but by the end of the month we were already in the red. It was a disaster until The Lord pointed me out to read this story again. Reading the story, I continued to console myself that I was a good servant because I had a large church at the time, and people were grateful to me for the changes and differences God used me to make in Life. What a shock it was to me when God told me that I was worse than the last servant he had condemned in that parable. My sense of pride and self-respect was so offended that I was angry with God for a moment. I felt that it was by all means unfair to compare me to a wicked and lazy servant. But now to say that I was worse than it completely destroyed and ruined my day. I needed proof and explanations. Then God started taking me to school. He said that, at least in the case of a wicked and lazy servant, he was smart enough not to spend everything his master trusted in his hands. In my case, however, I spent over \$20,000,000 on needs and bills, thinking I had excuses. couldn't bring myself to keep talking less multiplication. The Lord also reminded me that there was a time when I was only making \$2,000 a month. At that time, I prayed to God that He would bring me. My belief was that if God could only help me make \$5,000 a month, I would be grateful, and that would be more than enough for me. Guess what? God answered this prayer, but as soon as we started earning \$5,000, the needs were already overwhelming, so much so that this amount was again not enough, because I did not follow the laws of money. When you don't abide by the laws of money and as in my case you don't even know them, it means that caterpillars and cankerworms have always stood to consume little of what you do. Here I again rushed to God in prayers to increase our income to 10,000 U.S. dollars. I was sure that if we could make \$10,000, we would never need to again. Well, you can guess what happened. My rude awakening happened when we were already making \$20,000 and at the same time not meeting our needs. My conviction was so strong that I had no choice but to break down in sorrow and repentance. The stroke that broke the camel's back came when I asked the Lord, I know I am not lazy by any standards, but you talked about that person as lazy. At that point I was working 18 hours and still be called lazy? Again the Lord came to my aid, He said, lazy here, He speaks of my refusal to think, laziness of the mind in dealing with money. He said the laws and principles of money management are there; I shouldn't have been lazy to go in search of them, and my inability to develop myself in the matter of finance is also a form of laziness. The fact that I didn't bother to study financial matters or even go for financial advice all pointed in the direction of this laziness - mental laziness. I am that excuse, my argument was I'm a pastor, I want my face to near I have never heard a pastor preach or teach on the subject. To which the Lord has told me that this is no excuse, and I will only answer to Him. It has all forms of knowledge out there for those who are diligent enough to ask, search and knock. This revelation changed my life forever. From there I called the board of our expenses, a significant portion of our income would save and end up in investment. It was another huddle I needed to overcome because my board said we are a church and we don't make investments, we only spend, we don't invest or multiply. In short, I was able to get the church to start by putting aside the first ten percent of everything that came for savings and investment. We gradually moved from there to thirty percent of all that came to savings and investments. As a result, I was able to make our church a millionaire church, I dared to challenge myself to make my first million U.S. dollars in the next two years. I studied everything I could on the subject. With my experience from helping churches make money, I was surprised when after nine months I was able to make my first million US dollars instead of two years. Further in my goal, I decided to prove the effectiveness of these principles by helping my members of the church become millionaires. I started with ordinary people and by the grace of God in the next three years, I was able to raise 200 millionaires in U.S. dollars from our congregation. Yes, death was thrown. God was right after all. I've learned my lessons. No more coming back!!! Ladies and gentlemen, what am I trying to tell you -- why am I taking my time to go for all these details? I just want to help you understand that if we could open our eyes to our people in Africa and other developing countries to know the laws of money, we can really help our continent. I am convinced that it will not be long to give away food or money, but if we change the approach to money in our people, we will be able to be free for good. Ignorance really is the only killer around. My people are dying because of a lack of knowledge. Hosea 4:6. It's that we don't know what's killing us. Because of ignorance, most people spend money. others spend money, while only a few invest. Looking back, I see now that even in my 40th hut the village of Idomila, with extreme poverty around, I might have had enough if I knew these laws of money. No one could live in the kind of poverty in which I grew up, if only we were educated in the rudiments of the laws of money. Therefore, I believe that the true key to financial freedom for our continent and the world as a whole is to bring knowledge of the laws If we could teach our people not only to know these laws, but also to observe them religiously, we would deal a heavy blow to the dragon of poverty in our world.
