Естественное число является положительным integer, таких как 1, 2, 3, 4, 5 и т.д. 6. Цельй цельй номер, или число, которое не является фракцией, такой как 1 или -1. -1 is the right answer because it is an integer, but it is not a natural number because it is negative. C. A rational number is a number that can be expressed as a share. \$\frac{3}{7}\$ is the right answer because it's a share and it's not a whole number, so it's not a whole series. D. An irrational number is a number that cannot be represented in the ratio of the two integrators. \$\pi\$ is an irrational number because it cannot be represented in a ratio of two prices.
