Critical Strike Portable is a first-person game that pays homage to Counter Strike 1.6, offering an experience almost identical to Valve's legendary game, but without leaving your Android device and with a control system fully adapted to touchscreens. The first thing that catches your attention in critical Strike Portable is that it has an interface that is a bit crowded. On the screen you always have (although you can hide them) buttons to jump, sit down, move, watch, shoot, switch arms, recharge, look at stats, chat, and menus. And if that wasn't enough, you'll also see radar, a rescue bar, and ammunition. Once you start playing and ignoring the baroque interface style, you'll find that critical Strike Portable is really a portable version of Counter Strike. You will find the same modes of play, the ability to play over the Internet, as well as alone with bots, the same weapons, and even a little similar scenarios. Graphically, Critical Impact Portable is also amazing. Reason? It has a visual aspect a little better than the Counter Strike original, and it moves very smoothly, even in devices that are several years old. Critical Strike Portable is quite possibly the best first-person shooter game for mobile devices that exist. Not so much for graphics as for this there is much better (most Gameloft titles, for example), but because it reminds us what a real game of this genre should be. Critical Strike Portable is also known as CSP, CS Portable, Counter-Strike Portable or Critical Missions. The game is based on Counter-Strike (mostly version 1.6). Throughout the game, there are two teams: counter-terrorists and terrorists, fight to complete the goal or eliminate the opposing team with weapons purchased from the buy menu. Critical Strike Portable is a first-person action game that can provide players with almost the same Counter Strike 1.6 gaming experience. At the same time, the touch screen design for the control system will also provide a very convenient experience for Android users. In Critical Strike Portable, the first person to get your attention will be its slightly crowded user interface. Jump, squat, move, watch, shoot, switch weapons, set bullets, view stats, chat, menu, Buttons will always appear on the screen (but you can hide them). If that's not enough, you can also browse the radar, rescue bars bars Ammunition. When you play the game, you'll find Critical Strike Portable, a really portable version of Counter Strike portable version, the same game mode, the same weapon, and support for online games and anti-robot, and even game scenes are somewhat similar. Critical Strike Portable is probably the best first-person shooter in mobile gaming. This is because critical Strike Portable that we know what kind of game can be considered as a real first person shooting game.
