Many of us rely on technology more than we understand. This creates tools to solve problems that allow us to do more with our time. Think about most of the smartphones we carry with us, i.e. cameras, watches and computers, as well as phones. Even the technology we use not every day, like sewing machines, has dramatically changed the way we live. The technology industry is booming, and new innovations are constantly entering the market. The time it takes for companies to be ready to view new products is shorter than ever. As a consumer, it pays to do your research on which products are worth your hard earned money. Not every new release will knock it out of the park for the first time. Many find it helpful to wait until after the product launch to read the reviews before buying. Although, there are those that enjoy lining up for midnight releases. Sometimes be the first to own something exciting in itself. Exploring up-and-coming technologies can be difficult, as the flow of information can be overwhelming. Facty is your tool for solving this problem. For the latest in games, wearable technology, technology survival and smartphones; This is the place to turn. Find out what you need to hear in the future. Here's what's interesting about TWTR compared to other tech stocks. Stocks have been very strong the last six months or longer. Follow comments on demand trends in the fourth quarter, film licensing activities and the expected impact of a production shutdown in 2021. While a huge move is not expected based on the chart, here's what I... Predict. The resumption of force may not appear until the end of the year. The quick big run-up in the weeks leading up to his warning is a cautionary example of how much tech stocks are moving had little to do with an informed analysis of the company's fundamentals. The technical picture is not inspiring. While the 5G has taken center stage, the iPhone 12 camera improvement line may end up being a bigger draw for many consumers. Some templates reveal themselves easily and you can spot them ahead of computer programs. Here are examples of them, and how to act. There is an opportunity to buy some of these names at a discount to their highs, with Amazon presenting the best choice. Buying options usually won't drive the market - except when buying on a SoftBank scale. Let's look at the three main ways stocks can go up, and which one we're seeing in action right now. The world's largest consumer electronics company. Never. What's the question? Just jump on board. Let's check the graphics of this speculative hydrogen game. The company's upside-down cybersecurity shares without volume gives reason for pause. What stocks are doing from here will, for selective risk and potential incentives, rely on fourth-quarter leadership. Let's take a look at the graphs and indicators. October can be a difficult month. But all asset classes linked to the US dollar right now. I see enough technical clues to be concerned about the next step on TWLO. AKAM has been trading sideways for the past three months, but this impasse may not last much longer. Let's check the latest charts and indicators. GME will be able to standardize business operations with MSFT cloud solutions and expand its video game offerings. While much more work needs to be done, new CEO Arvind Krishna seems to understand that major structural changes are needed if IBM is to achieve its goal of organic growth. Is the correction over or are we ready for another leg below? It would be remiss if I ignored these signals. Buying stocks is a good, direct approach. I would also consider replacing stocks with a November money call. A month after our last update on Increase Communications, we check the charts and indicators again for a new strategy. Let's take a look at the graphs and indicators. While the breakups of tech giants still look unlikely, a House report does show a thing or two about current political sentiment. That's how we're going to play the action now. How to change Airtel's broadband planAirtel recently began offering unlimited data in all of its broadband plans to give other market players a run for their money.
