CBS Interactive does not encourage or condone the illegal duplication or distribution of copyrighted content. Download.com has decided not to provide a direct download link for this product and offers this page only for informational purposes. Download the youTube video on your Android phone Latest updated on 02/08/15 There have been 0 updates in the last 6 monthsIn this version there is one flag on VirusTotal to show reviews Although YouTube allows some of their videos to be downloaded and viewed offline using third-party apps to download YouTube videos against their terms. The YouTube Service Terms explicitly state that users should not download content unless a download button or link is displayed on a particular service. You are also not allowed to download or make copies of copyrighted content. If caught doing so, theoretically you could face a court or a fine. Although YouTube has never lashed out at a user for downloading copyrighted content using a video uploader, the activity, whatever, is illegitimate. Despite the risks, if you want to download YouTube videos, then here are some of the best Android apps to meet your needs. By default, Android blocks the installation of apps that are not from the Google Play Store. Therefore, you need to include installing an application from other sources before you get started. To allow this, go to the settings of the security. Click on the Unknown Sources button. A warning comes up. Click OK. Use these apps to download YouTube videos that you have or those with Creative Commons reusable license.9 Best Android Video Downloaders for YouTube1. YouTube GoYouTube Go is one of the easy Android apps from Google, designed for low-work smartphones. However, users who want to download YouTube videos for free and legally can take advantage of it. Unlike the usual YouTube app, which only shows a download button on selected videos and encourages you to subscribe to YouTube Premium for full access, YouTube Go is not crippled by such restrictions. YouTube Video Downloader also allows you to share high quality videos without the Internet. The only limitation of this app is that it does not allow you to capture videos from other services such as Instagram, Facebook, etc. 2. VideoderVideoder is a powerful YouTube video uploader for Android. You can choose from different sites to download videos such as YouTube, Facebook, Instagram, etc. this allows you to stream and download videos in all available formats. You can easily choose from any quality you prefer, and can also share videos from the app. Application and comes with an impressive user interface. This will help you with faster download speeds as well as packages of various night mode themes, built-in video player, etc. Videoder is not available in the Play Store, but you can download the app for free from its official website and install it on your phone. He doesn't have purchases, but contains ads. However, you can remove ads if you buy a Videoder Premium plugin from the Play Store. It all depends on your personal choice if you are comfortable with ads or you want to have a cleaner experience. Download YouTube videos on Android using YouTube VideoderOpen in the app. Search for video. Click on the download button and select the download link that pops up. You can choose the video format you want, as well as download the video in MP3 format. In addition, you can share the video on the YouTube Videoder app and download the link will pop up. Grab an online video on Android using the InsTubeLaunch app and visit the desired website. Look for the video you want to download and click on the video you want. Click on the red download button and select the quality of the video. Click on the fast download and your video will start downloading. The only downside to the app is that you have to deal with ads that keep popping up, and there is no way to remove ads.7. VidMate AppVidMate is a wonderful Android video app. The app is very reliable to download YouTube videos. You can search for files based on different categories such as movies, music, TV shows, or directly search for any files from its Search-Bar.VidMate provides you with a fast video download speed, but you can also adjust the speed and choose the preferred download location in the download settings. In addition, the app includes a built-in video player, music player, and you can also create an encrypted space in the app to hide the video. Get video on Android using the VidMateLaunch app and click on youTube's mobile website in the app. Look for the video you want to download and click on the red button to download

the content. Choose the quality of the video and tap the Download option. Your video will start downloading.8. YT3 Youtube DownloaderIt is a very simple Android YouTube video downloader where you can download YouTube videos in MP3 and MP4 formats. It has a user-friendly interface that is pretty easy to operate. Preview button look into the song before you download it. This allows faster download speeds and everything you download download Save in the Download folder. It also shows the lyrics as you listen to music. You can also download either low or high-quality video. This app downloads music and videos only from Youtube.Download YouTube videos using the YT3 DownloaderOpen app and search for the video you want to download. Choose an mp3 or MP4 download file option that appears on the right side of the video. You can also have an audio preview before you download it. You can also share a video from the Youtube app to download YT3 to download it.9. NewPipeNewPipe is an open source Android app that can be used to capture content. It's worth noting that this easy download doesn't use any proprietary YouTube APIs or Google Play Services. NewPipe aims to provide an original YouTube app experience for its users without displaying any annoying ads. It is an open source application with a very intuitive interface. Best of all about this app is the background player, which allows you to play any YouTube songs in the background while you use other apps. Some of NewPipe's notable features include: Search videosWatch, Listen, and Download YouTube videoOpen Videos in KodiTor/Orbot, 1080p/2k/4k support availableSubtitles, playlist, queues, story supportVideo download is very simple and provides fast download speeds. It offers you different file formats and resolutions to download YouTube videos and audio. In addition, the app provides privacy because it does not contain any user data and does not use services that analyze your usage behavior. Its other great features include subscription to the channel, pop-up video mode, 4K support, a few themes, etc. it's easy and free without in-app purchases or ads. How to download YouTube videos on Android using the NewPipeInstall app. Open the app and look for a video you want to download at the search bar. Click the desired video from the search results. Click on the download button and select the quality and format of the file. You can also edit the file name. Click OK, and your download link will be generated automatically. You can download the NewPipe app from F-Droid. You can also download the app directly, but installing the F-Droid ensures that you get updates as well. YMusicLast, but not least YMusic - Android app for downloading YouTube videos that also allow users to play YouTube videos in the background. In the Android app, users can go through youTube's trendy videos as well as popular music hits. Users can change the speed of the video, save the sleep timer while playing the video. The YMusic Video Downloader app allows upload a YouTube video with full HD, however, restricts users to one type of file (MP4). Meanwhile, users will also find Mp3 links to youTube videos in mp3 format, and m4a. The biggest drawback of the Android app is that it does not allow Watch the video, but only listen to the audio, and users will have to download the video to overcome the obstacle.
