YAMAHA PSR-EW410 Keyboard Amazon With 758 different programmed voice instruments and 76 touch keys (by reviewers), Yamaha's PSR-EW410 is the overall best piano keyboard on this list. At \$430, it's a bit pricey - but the included features make the cost totally worth it. This one is MIDI- and USB-compatible, and it boasts a backlit screen and headphone jack. Also, you won't need a band to jam with you during the game: There are 235 accompaniment styles that provide real-time backing tracks that actively respond to the chords you play, as well as pens that you can assign to specific sounds. And if you've ever thought about trying to hand in creating electronic music, there's also the Groove Creator feature that lets you add intros, section changes, sound effects, and more - just like a real DJ. It doesn't include a stand, chair, maintain pedal, or AC power adapter - but if you choose to splurge on this professional choice, you probably already have these things. The same keyboard is also available with 61 keys if you prefer to choose that one. What musicians think about it: You can say it's a well-made keyboard, the sound quality is great and it can get very loud. The voices are realistic and it's touchy, I'd definitely recommend this keyboard and it's definitely worth the price. Follow the latest daily buzz with BuzzFeed Daily Newsletter!
