Larsen's human embryology works as a well-organized, direct guide to this very complex subject, emphasizing the clinical application of embryology and presenting it in an easily digestible way. Perfect for visual students, this updated medical tutorial includes an excellent art program, brand new online animations, and high-quality images throughout; clear descriptions and explanations of human embryonic development, based on all the latest scientific discoveries and understandings, keep you up to date with the latest knowledge in this field. Consult with this title on your favorite e-reader, search quickly and adjust font sizes for optimal readability. Take advantage of the latest advances in molecular biology and genetics. View the material in a flexible manner that meets your specific needs with a user-friendly design. Get access to high-yield content and quickly find key information with newly compressed text and additional summary tables. Take advantage of key pedagogical functions, such as opening Summary boxes. Visualize complex concepts more clearly than before, through an excellent art program and outstanding clinical content and images throughout. Strengthen your understanding of the material and how it will treat real scenarios with Embryology to practice clinically closer added to each chapter. Key features - Larsen Human Embryology Take advantage of the most modern advances in molecular biology and genetics. View the material in a flexible manner that meets your specific needs with a user-friendly design. Table 1 Gametogenesis, Fertilization and the first week 2 Second week: Become Bilaminar and fully implantation 3 Third week: Becoming Trilaminar and Creation of the axe body 4 Fourth week: Formation of embryo 5 Principles and mechanisms of morphogenesis and dysmorphogenesis 6 Fetal development and Fetus as Patient 7 Skin Development and Its Derivatives 8 Development of the Musculoskeletal Brain 9 Development of the Central Nervous System 10 Development of the peripheral nervous system 11 Development Of the Respiratory System and Body Cavity 12 Heart Development 13 Vascular Development 14 Gastrointestinal Development 14 Gastrointestinal Development Tract 15 Development of the urinary system 16 Reproductive System Development 17 Development of the Pharyngal Apparatus and Face 18 Development of the Ears 19 Eye Development 20 Development of the Index of Limbs (PDF) Larsen in Human Embryology , 5e (Schoenwolf, Larsen Human Embryology) Larsen Human Embryology, 5e (Schoenwolf, Larsen Human Embryology) Gary C. Philadelphia, PA : Elsevier/ Churchill Livingstone, 2015 (OCOLC)883881405 Material Type: Document Type Document Document: Internet Resource, Computer File All Authors /Authors: Gary C Schoenwolf; Stephen B Bleil; Philip R. Brower; P H Francis-West; William J Larsen Find more information on: Gary C Schoenwolf Steven B Bleyl Phillip R Brauer P H Francis-West William J Larsen ISBN: 978145706846 145570684 1 978 1455727919 1455727911 OCLC Number: 862800082 Notes: Precedes: Larsen Man Embryology / Gary K. Schoenwolf (and others). 4th. c2009. Description: 1 online resource : illustrations (mainly color) Content: Gametogenesis, fertilization, and the first week - The second week : becomes bilaminar and fully implantation - Week Three : becomes trillamine and the creation of body axes - Fourth week : the formation of the embryo - Principles and mechanisms of morphogenesis and dysmorphogenesis - The development of the fetus and fetus as a patient - The development of the skin and its derivatives - the development of the mainstay --motor organ-system -- Central nervous system development -- Development of the respiratory system and body cavities -- Heart development -- Vascular development -- Gastrointestinal development -- Development of the urinary system -- Development of the pharyngal apparatus and face -- Development of the ears -- Eye development -- limb development. Series title: ClinicalKey. Other titles: Responsibility for Human Embryology: Gary K. Schoenwolf, Stephen B. Blyle, Philip R. Brower, Philippa H. Francis-West. Additional information: This book provides in-depth coverage of both clinical and biological aspects of human development. It examines the relationship between basic science and embryology and describes potential clinical disorders arising from embryonic problems. Strong clinical focus, practical design, and an excellent work of art with over 150 images new to this edition allow for rapid understanding and easy application of the latest knowledge in this rapidly evolving field. Convenient design allows you to view the material in a number of ways, and online access to Student Consult enhances your study of the subject and exponentially increases your reference power. It should be a convenient design allowing students to consider the material in flexible ways and instructors to tailor the book to their specific needs. Reflects the most modern advances in molecular biology and genetics. Proposals of chapters with illustrated terms of the appropriate embryonic stage. Contains a high-quality full-color art program, with excellent linear diagrams with a three-dimensional aspect, many color photographs of clinical disorders, excellent black-and-white electronphotos and linear drawings showing successive stages of development.
